Strength Based Perspective in Working with Clients with Mental Illness Kam-Shing Yip, 2008 This book offers to serve as a guide for professionals in understanding and applying a strength based perspectives for Chinese clients with mental illness and to discuss the Chinese articulation of concepts and practice of these perspective within Chinese culture. Ever since the emergence of a medical model in the explanation of mental illness, the disease model or deficit/problem orientation became the dominant paradigm in perceiving, treating and rehabilitating persons with mental illness. The terms 'mentally ill' and 'mental patient' serve as labels for both professionals, family caregivers and members of community to describe the burden, the needs of care and treatment for persons with mental illness. These labels also justify the establishment and implementation of mental health services. Under the influences of the disease model, persons with mental illness are regarded as subjects for academic research, patients for treatment, clients for intervention, and objects for stigmatisation and labelling.

Disability, Intersectionality, and Belonging in Special Education Elizabeth A. Harkins Monaco, L. Lynn Stansberry Brusnahan, Marcus C. Fuller, Martin O. Odima Jr., 2024-02-23 Disability, Intersectionality, and Belonging in Special Education focuses on preparing educators who use socioculturally sustaining practices, curricula, and instruction through an intersectional lens. This book empowers preservice students and special education practitioners and administrators to meet the needs of disabled individuals. Understanding the full range of requirements relating to socioculturally sustaining practices is imperative to working with individuals with disabilities as well as with their families and caregivers. Being able to understand and explain this complex issue to others is important and often necessary. Social injustices in special education are historical and systemic. Special education practitioners are typically unaware of the importance of intersectional differences because they have been prepared to address cultural perspectives only during awareness days or through specific units in curricula. At other times they discuss the topic diagnostically—for example, as part of an educational plan or when teaching English as a second language. Other issues stem from the value system of the special education practitioners themselves; some are not willing to engage in these concepts, while others prioritize treating all students the same by using the terms “fairness,” “equity,” and “colorblindness” to justify this treatment. Even when special educator practitioners attempt to address injustices on behalf of their students, they tend to center on only the student’s disability, which means they are ignoring or erasing other aspects of their students’ identities. These concerns highlight the importance of building the sociocultural competence of our teaching force. This book will help practitioners build this competence in their own spheres of influence.

Strengths-Based Approaches to Educating All Learners with Disabilities Michael L. Wehmeyer, 2019 Michael Wehmeyer, a leading scholar with over four decades of experience as a teacher, teacher educator, researcher, and advocate, provides a cogent but accessible account of the evolution of special education. Offering a compelling vision of where the field should be headed in the next decade, he notes how the digital revolution has made it possible for all learners to gain access to content and instruction. This text focuses on the need to consider how young people with (and without) disabilities learn and the importance of creating personalizable education as strengths-based approaches to disability move education away from diagnosis and remediation to schoolwide instruction for all students. This book is not written as a criticism of traditional special education models, but instead examines the big ideas for going beyond special education that can improve outcomes for learners with disabilities and prepare them for the 21st-century world. “If you are part of the field, you must choose

whether to look backward or forward. This book includes the tools you need for the latter.” —Sue Swenson, president, Inclusion International “Dr. Wehmeyer masterfully articulates the flaws in our current approach and offers a roadmap to a more promising future for our nation’s children.” —Melody Bruce Musgrove, The University of Mississippi

Physical Disability--a Psychological Approach Beatrice Ann Posner Wright, 1960 The present volume is concerned with one segment of the relation between man and his physique, namely, the somatopsychological problem as seen in disablement. Written for the practitioner in the field of rehabilitation, especially for the professional in training, the emphasis is on the kinds of social-psychological situations that confront a person with an atypical physique, and how he copes with them. Factors within the person and factors attributable to the environment are considered in terms of how they aid psychological adjustment or, on the negative side, how they create difficulties. The author cautions that many topics of importance to the problem of adjustment to disability do not appear within the pages of this volume, the reasons for exclusion being varied. Further, there is no doubt that to some extent the contents of this volume have been shaped by

preconceived notions. However, it should also be noted that such notions have been reshaped as the evidence of scientific investigation and considered opinion added to the perspective of the person as an active agent in meeting the impositions of a disability.
