The Hundred-page Machine Learning Book en Français Andriy Burkov, 2019 Le livre d'Andriy Burkov suit la même philosophie. Il évite les détails trop théoriques, au profit des conseils techniques concernant l'implémentation pratique des approches présentées. C'est un guide compact de la science des données appliquée et je prédis qu'il va devenir une ressource de référence pour les universitaires et les praticiens. Avec 100 pages (ou un petit peu plus), ce livre est suffisamment court pour être lu d'une traite. Cependant, ne vous y fiez pas : il couvre toute les principales approches de l'apprentissage machine, allant des classiques régressions linéaire et logistique, en passant par les méthodes les plus modernes comme les séparateurs à vaste marge, l'apprentissage profond, le boosting et les forêts aléatoires.--Avant-propos de l'édition anglaise.
