Value Proposition Design Alexander Osterwalder, Yves Pigneur, Gregory Bernarda, Alan Smith, 2014-10-20 The authors of the international bestseller Business Model Generation explain how to create value propositions customers can't resist Value Proposition Design helps you tackle the core challenge of every business — creating compelling products and services customers want to buy. This highly practical book, paired with its online companion, will teach you the processes and tools you need to create products that sell. Using the same stunning visual format as the authors' global bestseller, Business Model Generation, this sequel explains how to use the "Value Proposition Canvas" to design, test, create, and manage products and services customers actually want. Value Proposition Design is for anyone who has been frustrated by new product meetings based on hunches and intuitions; it's for anyone who has watched an expensive new product launch fail in the market. The book will help you understand the patterns of great value propositions, get closer to customers, and avoid wasting time with ideas that won't work. You'll learn the simple process of designing and testing value propositions, that perfectly match customers' needs and desires. In addition the book gives you exclusive access to an online companion on Strategyzer.com. You will be able to assess your work, learn from peers, and download pdfs, checklists, and more. Value Proposition Design is an essential companion to the "Business Model Canvas" from Business Model Generation, a tool embraced globally by startups and large corporations such as MasterCard, 3M, Coca Cola, GE, Fujitsu, LEGO, Colgate-Palmolive, and many more. Value Proposition Design gives you a proven methodology for success, with value propositions that sell, embedded in profitable business models.

*Worth-Focused Design, Book 2* Gilbert Cockton, 2022-05-31 This book introduces the concept of worth for design teams, relates it to experiences and outcomes, and describes how to focus on worth when researching and expressing design opportunities for generous worth. Truly interdisciplinary teams also need an appropriate common language, which was developed in the companion book *Worth-Focused Design, Book 1: Balance, Integration, and Generosity* (Cockton, 2020a). Its new lexicon for design progressions enables a framework for design and evaluation that works well with a worth focus. Design now has different meanings based upon the approach of different disciplinary practices. For some, it is the creation of value. For others, it is the conception and creation of artefacts. For still others, it is fitting things to people (beneficiaries). While each of these design foci has merits, there are risks in not having an appropriate balance across professions that claim the centre of design for their discipline and marginalise others. Generosity is key to the best creative design—delivering unexpected worth beyond documented needs, wants, or pain points. Truly interdisciplinary design must also balance and integrate approaches across several communities of practice, which is made easier by common ground. Worth provides a productive focus for this common ground and is symbiotic with balanced, integrated, and generous (BIG) practices. Practices associated with balance and integration for worth-focused generosity are illustrated in several case studies that have used approaches in this book, complementing them with additional practices.

*Worth-Focused Design, Book 1* Gilbert Cockton, 2022-05-31 Design now has many meanings. For some, it is the creation of value. For others, it is the conception and creation of artefacts. For still others it is fitting things to people. These differences reflect disciplinary values that both overlap and diverge. All involve artefacts: we always design things. Each definition considers people and purpose in some way. Each handles evaluation differently, measuring against aesthetics, craft standards, specifications, sales, usage experiences, or usage outcomes. There are both merits and risks in these differences, without an appropriate balance. Poor balance can result from professions claiming the centre of design for their discipline, marginalising others. Process can also cause imbalance when allocating resources to scheduled stages. Balance is promoted by replacing power centres with power sharing, and divisive processes with integrative progressions. A focus on worth guides design towards worthwhile experiences and outcomes that generously exceed expectations. This book places a worth focus (Wo-Fo) in the context of design progressions that are Balanced, Integrated, and Generous (BIG). BIG and Wo-Fo are symbiotic. Worth provides a focus for generosity. Effective Wo-Fo needs BIG practices.

**Mastering Disruption and Innovation in Product Management** Christoph Fuchs, Franziska Golenhofen, 2018-09-07 This book is an essential guide or foundational toolkit for anyone who is involved in the process of developing, offering or selling any type of product or service. Based on how to surf on the waves of innovation and the principle of “form follows function” (System Architecture), it introduces and connects concepts like Market Understanding, Design Thinking, Design to Value, Modularization and Agility. It introduces readers to the essence of these main frameworks and provides a toolkit that explains both theoretically and practically when and how to utilize which one. The methods and processes described in this book have all been successfully tested in many industries. They apply in today’s market context of high uncertainty, complexity and turbulence, where innovation and disruption are essential. Readers will find answers to two fundamental questions: How can we implement an innovation process and environment that are conducive to successful product design? And, if our products fail to appeal to customers, how can we achieve a major turn-around with regard to product development? A wealth of examples and case studies help readers to benefit from the authors’ broad professional experience. Further, lessons learned and conceptual summaries provide valuable shortcuts to the methods and tools discussed. For today’s CEOs, enabling innovation is one of THE most complex leadership tasks. But innovation is not about theory and nice buzzwords. It’s about succeeding in the real world. This ‘hands-on’ book connects the dots and introduces the reader to some of the most relevant ideas and pragmatic concepts fitting today’s business reality. Dr. Robert Neuhauser, Executive VP and Global Head People and Leadership Development, Siemens At the most fundamental level this book brings order to chaos. It sets different and highly relevant design approaches into a complementary picture, rather than presenting them as competing ways of solving the same problem. Product designers, managers, consultants, scholars and students will surely have this valuable book within reach on a daily basis. Olivier L. de Weck, Ph.D – MIT Professor of Aeronautics and Astronautics and Engineering Systems, Editor-in-Chief Systems Engineering
