Artistic Practice as Research in Music: Theory, Criticism, Practice Mine Dogantan-Dack,2016-03-03 Artistic Practice as Research in Music: Theory, Criticism, Practice brings together internationally renowned scholars and practitioners to explore the cultural, institutional, theoretical, methodological, epistemological, ethical and practical aspects and implications of the rapidly evolving area of artistic research in music. Through various theoretical positions and case studies, and by establishing robust connections between theoretical debates and concrete examples of artistic research projects, the authors discuss the conditions under which artistic practice becomes a research activity; how practice-led research is understood in conservatoire settings; issues of assessment in relation to musical performance as research; methodological possibilities open to music practitioners entering academic environments as researchers; the role of technology in processes of musical composition as research; the role and value of performerly knowledge in music-analytical enquiry; issues in relation to live performance as a research method; artistic collaboration and improvisation as research tools; interdisciplinary concerns of the artist-researcher; and the relationship between the affordances of a musical instrument and artistic research in musical performance. Readers will come away from the book with fresh insights about the theoretical, critical and practical work being done by experts in this exciting new field of enquiry.
