Inter-agency Advisory Group on Vocational Rehabilitation after Brain Injury (Great Britain), British Society of Rehabilitation Medicine

Brain Injury Rehabilitation Trust Brain Injury Rehabilitation Trust, 2016 Comprises booklet and sheet titled 'Show your brain some love!'.

Practical Neuropsychological Rehabilitation in Acquired Brain Injury Rudi Coetzer, Audrey Daisley, Gavin Newby, Stephen Weatherhead, 2018-03-26 The book aims to acknowledge the complexity of working with clients who have an acquired brain injury but aims to give the interested reader practical and useable guides to develop their practice. Throughout the text, case studies and practical suggestions are forwarded to facilitate do-able practice. It is hoped that the book will become a gold standard in this particular area and is aimed at a range of professionals in training (for those responsible providing training in psychopathology, neuropsychology and psychotherapy), and those who have an interest in working with the issues commonly seen post acute brain injury rehabilitation settings.

Vocational Assessment and Rehabilitation After Acquired Brain Injury Inter-agency Advisory Group on Vocational Rehabilitation after Brain Injury (Great Britain), British Society of Rehabilitation Medicine, 2004 These guidelines cover patients returning to employment, education, training and vocational rehabilitation and assessment after brain injury.

Assistive Technology: From Research to Practice P. Encarnação, L. Azevedo, G.J. Gelderblom, 2013-09-09 Assistive Technology (AT) is an umbrella term indicating any product or technology-based service that enables people of all ages with activity limitations in their daily life, education, work or leisure. It is a highly interdisciplinary field, encompassing research, development, manufacture, supply, provision and policy. This book presents the proceedings of the 12th biennial European conference of the Association for the Advancement of Assistive Technology in Europe, AAATE 2013, held in Vilamoura, Portugal, in September 2013. The full papers included here cover a diverse range of subjects, including: ageing, disability and technology; accessibility in Europe; ambient assisted living; AT and Cloud computing; communication access for all; monitoring and telecare; and user perspective, to name but a few. The aim of the AAATE conference is to promote a more effective dialogue between manufacturers, researchers, developers, professionals and end users, and this book will be of interest to all those directly or indirectly involved in the field of AT.

Biopsychosocial Approaches in Neurorehabilitation Huw Williams, Jonathan Evans, 2005-11-17 There has been significant progress in the field of neurorehabilitation over the past twenty years, particularly in the assessment and management of cognitive impairment. More recently, the stakeholders in neurorehabilitation - clinicians, researchers, purchasers of services and clients - have become aware of the need to develop systems and services for managing the wide ranging psycho-social sequelae of acquired brain injury (ABI). Mood, behavioural and neuropsychiatric conditions have been found to be highly prevalent. Such disorders, at clinical or sub-clinical levels, are disturbing for clients themselves, and for their families, and present a challenge for enabling survivors to regain social roles. Many individuals also experience difficulties in related areas, such as pain management, drug and alcohol misuse, and in maintaining relationships. Given the wide-ranging psychological, psychiatric, health and social sequelae of ABI, rehabilitation services are often responding to people whose needs are complex and for which the evidence base for practice may be limited. In this Special Issue of Neuropsychological Rehabilitation, leading international experts provide reviews of current thinking on mood, behaviour and neuropsychiatric conditions, along with issues of drug and alcohol use, pain, sexuality and relationships after brain injury. Assessment and management issues are addressed, along with implications for service delivery in developed and in developing world contexts. This Special Issue will be invaluable to a wide range of neurorehabilitation professionals including clinical psychologists, neuropsychologists, speech and language therapists, occupational therapists, neurologists, neuropsychiatrists, clinical nurse specialists, physiotherapists, and case managers. The volume will also be of benefit to those planning or purchasing brain injury rehabilitation services.

My Dad Makes the Best Boats Jo Johnson, 2017-07-05 'How can we talk to our children about Brain Injury?' This is a regularly asked question by parents who have suffered a brain injury and their respective partners. This book has been designed so that children between five and eight can read it independently. However, ideal if should be used with an adult to facilitate discussion about all aspects of family life and to enhance general emotional wellbeing. This book deliberately makes brain injury one of many things going on for this small group of children because for most children it is only one of many issues in their family life. This story is intended to emphasize that all families are different, with their own strengths

and weaknesses and different experiences. Brain injury is another experience that some people encounter and others do not. 'My Dad Makes the Best Boats' should prove to be a great reassurance and comfort for children coping with a parent's brain injury. The book presents situations in which brain injured people can be angry, forgetful or unreasonable and shows that it is not the fault of either parent or child and children should not blame themselves. It also demonstrates the positive aspects of life with a brain injured parent and the enjoyable times that can be spent together'. Headway: The Brain Injury Association 'This book has proved to be a very useful support mechanism for service users and families in the Brain Injury Rehabilitation Trust. We are sure that this will continue to be the case, especially with the inclusion of new activity pages; Professor Michael Oddy, Director of Clinical Services Brain Injury Rehabilitation Trust.

Traumatic Brain Injury Rehabilitation M. Anne Chamberlain,V. Neumann,A. Tennant,2013-12-11 In 1986 the Trustees of the Nuffield Provincial Hospitals Trust decided to develop a major core programme of studies concerned with the organization, development and improvement of services for physically disabled and frail elderly people. This programme developed rapidly due to the enthusiastic response of those in the field; and by 1992 the total value of the programme was in excess of £2 million and currently totals over £3. 2 million. It comprised a cohesive matrix of grants commissioned throughout the United Kingdom for work in identified areas which, taken in conjunction with existing grants, formed a comprehensive programme of much-needed studies and research in this field. The whole was to be underpinned by a major study planned and financed by the Trust but conducted by the Royal College of Physicians to survey the existing services being provided by some 180 health authorities. This study, together with concern for the handicapped schoolleaver, information about the availability of disability services and the care of mild/moderate head-injured persons, formed the prime initial thrust of the programme. In the case of head injury, the Trust was particularly concerned that there was discontinuity of care for many patients and little evidence as to which treatments were effective. Once patients had stabilized in hospital they were discharged into the community under the care of their general practitioner often without a continuing responsibility from the hospital.

Psychological Well Being and Acquired Communication Impairment Shelagh Brumfitt,2010 Psychological Well-Being and Acquired Communication Impairments is an essential resource for all health professionals working with this complex client group. It offers a unique multi-disciplinary approach to the subject, looking at the evidence base as well as clinical practice. The book covers both the assessment of people with acquired communication impairments as well as reviewing the available interventional approaches. Chapters cover such key topics as approaches to the assessment of anxiety and depression, the impact of brain injury, the role of an assessment of mood and the role of self esteem.
