**Oncofertility Communication** Teresa K Woodruff,Marla L Clayman,Kate E Waimey,2013-10-08 Oncofertility integrates the two previously distinct fields of cancer treatment and fertility research and aims to explore and expand the reproductive future of cancer survivors. In order to achieve the goal of fertility preservation, the Oncofertility community must focus on communication and the way data is provided and received. Concomitant with the rapidly changing technology of Oncofertility, there have been radical shifts and advances in the way health educators and clinicians can produce and share information. As success rates of reproductive techniques such as egg freezing and banking continue to rise, providing increasing opportunities for young cancer patients to preserve their fertility prior to the onset of cancer treatments,

communication among professionals in oncology, reproductive medicine, and psychosocial work, among others, becomes crucial, and clinical demand for Oncofertility information is expected to rise considerably. Oncofertility Communication describes and addresses the myriad channels through which the multiple audiences involved in Oncofertility can be served with appropriate and accurate information about cancer-related fertility issues. The text answers frequently asked questions and provides invaluable insights to scientific and health care professionals about communication among the diverse Oncofertility audiences. It incorporates timely discussions about traditional and emerging electronic communication tools and discusses the impact of health care policy changes on the Oncofertility field.

Moreover, it contains case studies that are prismatic for new entrants into the field. The book is organized around the major themes of the discipline and includes current research, clinical practice, emerging technologies and didactic questions and is divided into six thematic sections: Fertility implications in both oncologic and non-oncologic settings Options for fertility preservation, both male and female Care of the oncofertility patient, including contraception and pregnancy considerations Oncofertility in clinical practice, from setting up a new program to genetic counseling and communication Ethical and legal considerations Advances in the basic science of oncofertility In each chapter, bulleted key learning points and review study questions bookend the text. Six additional sections, comprised exclusively of clinical case studies illustrating the management of both oncologic and non-oncologic conditions, add to the pedagogical value of the text.
