The CISO 3.0 Walt Powell, 2025-08-05 This isn't just a book. It is a roadmap for the next generation of cybersecurity leadership. In an era where cyber threats are more sophisticated and the stakes are higher than ever, Chief Information Security Officers (CISOs) can no longer rely solely on technical expertise. They must evolve into strategic business leaders who can seamlessly integrate cybersecurity into the fabric of their organizations. This book challenges the traditional

perception of CISOs as technical leaders, advocating for a strategic shift toward business alignment, quantitative risk management, and the embrace of emerging technologies like artificial intelligence (AI) and machine learning. It empowers CISOs to transcend their technical expertise and evolve into business-savvy leaders who are fully equipped to meet the rising expectations from boards, executives, and regulators. This book directly addresses the increasing demands from boards and regulators in the wake of recent high-profile cyber events, providing CISOs with the necessary skills and knowledge to navigate this new landscape. This book isn't just about theory but also action. It delves into the practicalities of business-aligned cybersecurity through real-life stories and illustrative examples that showcase the triumphs and tribulations of CISOs in the field. This book offers unparalleled insights gleaned from the author's extensive experience in advising hundreds of successful programs, including in-depth discussions on risk quantification, cyber insurance strategies, and defining materiality for risks and incidents. This book fills the gap left by other resources, providing clear guidance on translating business alignment concepts into practice. If you're a cybersecurity professional aspiring to a CISO role or an existing CISO seeking to enhance your strategic leadership skills and business acumen, this book is your roadmap. It is designed to bridge the gap between the technical and business worlds and empower you to become a strategic leader who drives value and protects your organization's most critical assets.

The Decision Intelligence Handbook L. Y. Pratt, N. E. Malcolm, 2023-06-21 Decision intelligence (DI) has been widely named as a top technology trend for several years, and Gartner reports that more than a third of large organizations are adopting it. Some even say that DI is the next step in the evolution of AI. Many software vendors offer DI solutions today, as they help organizations implement their evidence-based or data-driven decision strategies. But until now, there has been little practical guidance for organizations to formalize decision making and integrate their decisions with data. With this book, authors L. Y. Pratt and N. E. Malcolm fill this gap. They present a step-by-step method for integrating technology into decisions that bridge from actions to desired outcomes, with a focus on systems that act in an advisory, human-in-the-loop capacity to decision makers. This handbook addresses three widespread data-driven decision-making problems: How can decision makers use data and technology to ensure desired outcomes? How can technology teams communicate effectively with decision makers to maximize the return on their data and technology investments? How can organizational decision makers assess and improve their decisions over time?

Code of Practice for Disability Equipment, Wheelchair and Seating Services Brian Donnelly, 2015-04-28 Discover everything you need to know about planning, commissioning, assessing for and providing disability equipment, wheelchair and seating services safely and effectively in this comprehensive and unique Code of Practice. To address the impending global care crisis resulting from the growing elderly population and an increase in the number of people living with long term conditions, there needs to be better deployment of the full range of disability equipment, with a clear strategy, for enabling independent living, enhancing disabled people's employment prospects and empowering individuals to take control and manage their own care. To achieve this effectively there need to be the right structures and processes in place to ensure timely and safe provision of the right equipment and associated services, thereby improving outcomes for service users. This Code provides a template for taking these actions and following it will go a long way in achieving these aims. As this new Code spans across a range of disability equipment and assistive technology related services, including wheelchair and seating, and across all sectors, it will play an important role in supporting seamless care pathways, paving the way for true integration and breaking down the artificial and long standing silos between services and organisations - something that needs to happen if we really want to address the funding crisis and support disabled and elderly people. Sir Bert Massie CBE, DL The Code relates mainly to disability equipment, wheelchair and seating services, and applies in every setting where these services are provided. It also applies more generally to other assistive technology related services, and provides the necessary links to these services so that holistic, integrated and person-centred care can become a reality. The Code can be used for many purposes: as a general guide, for tendering services, performance and risk management, regulatory compliance, strategic and operational purposes and much more. It puts the user at the heart of services. The Code sets a national (UK), and perhaps international, benchmark against which services can be measured, as well as a realistic level of service people should expect to receive. However optimistic and committed governments and organisations are to improving outcomes for disabled people, practical steps are required to make these improvements; I believe this Code lays down steps that need to be taken. Let's just hope it is followed! The Baroness Grey-Thompson DBE, DL
