Andrew Strauss: Coming into Play - My Life in Test Cricket Andrew Strauss,2012-03-01 On May 21, 2004, playing against New Zealand, Andrew Strauss wrote his name into the record books when he became only the fourth batsman to score a century at Lord's on his Test debut. He made 112 in the first innings and was only denied a historical second hundred when he was run out on 83 by Nasser Hussain. England went on to beat New Zealand 3-0 before returning to headquarters to welcome the West Indies, Strauss scoring 137 as the hosts laid the foundations for another whitewash. He then raised the bar again when touring the country of his birth, making three centuries in England's first win in South Africa in 40 years. This sensational start to his international career has ensured that he has been celebrated as a world-class opening batsman, and was voted Wisden's Cricketer of the Year 2005. In THE STORY SO FAR, Andrew Strauss looks back on his early cricketing days and astounding first year in Test cricket, and gives the inside story on what it is like to be part of an incredible England side fighting to overtake Australia as the number one cricketing nation. THE STORY SO FAR also includes his personal story of how England beat Australia in the 2005 Ashes Series, in which he played a major part.

Silent Warriors, Incredible Courage Wolfgang W. E. Samuel, 2019-02-19 The outbreak of the Korean War in June 1950 took the American military by surprise. Rushing to respond, the US and its allies developed a selective overflight program to gather intelligence. *Silent Warriors, Incredible Courage* is a history of the Cold War overflights of the Soviet Union, its allies, and the People's Republic of China, based on extensive interviews with dozens of pilots who flew these dangerous missions. In 1954 the number of flights expanded, and the highly classified SENSINT program was born. Soon, American RB-45C, RB-47E/H, RF-100s, and various versions of the RB-57 were in the air on an almost constant basis, providing the president and military leadership with hard facts about enemy capabilities and intentions. Eventually the SENSINT program was replaced by the high-flying U-2 spy plane. The U-2 overflights removed the mysteries of Soviet military power. These flights remained active until 1960 when a U-2 was shot down by Russian missiles, leading to the end of the program. Shortly thereafter planes were replaced by spy satellites. The overflights were so highly classified that no one, planner or participant, was allowed to talk about them—and no one did, until the overflight program and its pictorial record was declassified in the 1990s. Through extensive research of existing literature on the overflights and interviews conducted by Wolfgang W. E. Samuel, this book reveals the story of the entire overflight program through the eyes of the pilots and crew who flew the planes. Samuel's account tells the stories of American heroes who risked their lives—and sometimes lost them—to protect their country.
