Wetland Indicators Ralph W. Tiner, 2016-12-19 Understand the current concept of wetland and methods for identifying, describing, classifying, and delineating wetlands in the United States with Wetland Indicators - capturing the current state of science's role in wetland recognition and mapping. Environmental scientists and others involved with wetland regulations can strengthen their knowledge about wetlands, and the use of various indicators, to support their decisions on difficult wetland determinations. Professor Tiner primarily focuses on plants, soils, and other signs of wetland hydrology in the soil, or on the surface of wetlands in his discussion of Wetland Indicators. Practicing - and aspiring - wetland delineators alike will appreciate Wetland Indicators' critical insight into the development and significance of hydrophytic vegetation, hydric soils, and other factors. Features Color images throughout illustrate wetland indicators. Incorporates analysis and coverage of the latest Army Corps of Engineers delineation manual. Provides over 60 tables, including extensive tables of U.S. wetland plant communities and examples for determining hydrophytic vegetation.

Génesis y clasificación de suelos del Sistema Central ,1978 Se ha realizado un estudio genético y de clasificación de los suelos situados en la parte occidental del sistema central. la génesis de los suelos se considera en función de los factores del medio de sus propiedades físicas y químicas así como de su composición mineralógica. para la clasificación se ha utilizado la soil taxonomy (1975) pero se ha buscado una analogía con las clasificaciones siguientes: española (1968) fao (1968) y la clasificación ecológica de duchamfoen (1977). de esta forma se intenta contribuir al mejor conocimiento y establecimiento de caracteres que definen a las genéricamente denominadas tierras pardas.
