Harnessing AI in Geospatial Technology for Environmental Monitoring and Management Mobo, Froilan

D.,2024-12-06 The integration of Artificial Intelligence (AI) with geospatial technologies is increasingly vital in addressing environmental challenges facing society today. As climate change, resource depletion, and environmental degradation intensify, AI-driven geospatial tools offer powerful solutions for monitoring ecosystems, predicting environmental changes, and managing natural resources more effectively. By harnessing AI to analyze large volumes of environmental data, decision-makers can gain deeper insights and make more informed, timely decisions to protect the environment. This convergence of technology and environmental science has the potential to revolutionize how we understand and respond to environmental issues, making it a critical area of focus for sustainable development and environmental protection efforts. *Harnessing AI in Geospatial Technology for Environmental Monitoring and Management* explores the integration of AI with geospatial technologies to advance environmental monitoring and management practices. It discusses methods, challenges, and emerging technologies in the field. Covering topics such as agriculture, environmental information, and solar energy, this book is an excellent resource for academicians, researchers, professionals, policymakers, government officials, graduate and postgraduate students, and more.

Information Management and Technology in Healthcare John Michael Brittain,W. Abbott,1993

Information Management Technology Paul F. Burton,J. Howard Petrie,2013-11-11 Once again the wide-ranging and rapid developments in microcomputer technology of the last few years have meant that a detailed revision of *The librarian's guide to microcomputers for information management* was required, if it was to fulfil its objectives of providing a single source of information on the process of automating with a microcomputer. For this new edition, we have taken into account not only the developments in hardware, but also the growing sophistication and power of software, and the growing sophistication of library and information service managers. The latter are more and more familiar with the use, or at least the principles, of microcomputers, and it no longer seems necessary to spell out certain details. We have, where relevant, indicated sources of more detailed information, particularly of practical applications, and so we hope that the changes we have made will ensure that this book remains of value to practitioner and student alike. **ACKNOWLEDGEMENTS** We remain, as always, grateful to

those who have written or spoken about their experiences with microcomputers and have described applications. We would also like to thank the referees who commented of the book, and provided useful suggestions and on a first draft amendments. Mandy and Lindesay once again patiently accepted our absence during the writing of this edition.

Factors That Impact Software Project Success in Offshore ... ,

Integration and Management of Technology for Manufacturing E. H. Robson,Hugh McLaren Ryan,Dennis Wilcock,1991

To survive in the increasingly competitive economic conditions of the contemporary world, manufacturing organizations are continually seeking ways of improving their market shares by becoming more effective and efficient and by producing goods of higher quality. It appears that advanced manufacturing technology (AMT) can provide at least some of the means of achieving these improvements.

The Roots and Uses of Marketing Knowledge Terry Smith,2020-01-20 Marketing theory is often developed in isolation not collaboration; theoretical perspectives sometimes are ignorant of the diversity of marketing practice. In “The roots and uses of marketing knowledge: a critical inquiry into the theory and practice of marketing”, the author engages with the vital conversation about how marketing knowledge is created, disseminated and consumed, looking beyond the traditional reification of practice in theory and verification of theory in practice. The ontology of this work is anchored in subjective individual meaning; the epistemological stance assumes that this meaning is socially constructed. Consequently, rich empirical data, grounded in the context of experiential evidence, is extracted from a comprehensive range of marketing constituencies: academics, practitioners, managers, consultants, authors, lecturers and students. In its examination of the polarities, hybridity and iterative flow of marketing knowledge creation and consumption, this text posits a cohesive argument for a theory/practice bipartite fusion not dichotomy, adding valuable insights into the textual, contextual and pedagogical representations of marketing knowledge. The history and future of marketing knowledge is examined with the aid of instructive illustrations and insightful first-hand experience. Drawing on extensive qualitative research from a broad range of influential producers and vital consumers, Dr. Smith presents a relevant, exciting marketing knowledge framework which will be a vital resource for academics, students and practitioners.
