Louis Kahn John Lobell, 2020-06-30 For everyone interested in the enduring appeal of Louis Kahn, this book demonstrates that a close look at how Kahn put his buildings together will reveal a deeply felt philosophy. Louis I. Kahn is one of the most influential and poetic architects of the twentieth century, a figure whose appeal extends beyond the realm of specialists. In this book, noted Kahn expert John Lobell explores how Kahn's focus on structure, respect for materials, clarity of program, and reverence for details come together to manifest an overall philosophy. Kahn's work clearly conveys a kind of transcendent rootedness--a rootedness in the fundamentals of architecture that also asks soaring questions about our experience of light and space, and even how we fit into the world. In *Louis Kahn: Architecture as Philosophy*, John Lobell seeks to reveal how Kahn's buildings speak to grand humanistic concerns. Through examinations of five of Kahn's great buildings--the Richards Medical Research Building in Philadelphia; the Salk Institute for Biological Studies in La Jolla; the Phillips Exeter Academy Library in New Hampshire; the Kimbell Art Museum in Fort Worth; and the Yale Center for British Art in New Haven--Lobell presents a clear but detailed look at how the way these buildings are put together presents Kahn's philosophy, including how Kahn wishes us to experience them. An architecture book that touches on topics that addresses the universal human interests of consciousness and creativity, *Louis Kahn: Architecture as Philosophy* helps us understand our place and the nature of well-being in the built environment.

Shadow-Makers Stephen Kite, 2017-10-19 The making of shadows is an act as old as architecture itself. From the gloom

of the medieval hearth through to the masterworks of modernism, shadows have been an essential yet neglected presence in architectural history. *Shadow-Makers* tells for the first time the history of shadows in architecture. It weaves together a rich narrative – combining close readings of significant buildings both ancient and modern with architectural theory and art history – to reveal the key places and moments where shadows shaped architecture in distinctive and dynamic ways. It shows how shadows are used as an architectural instrument of form, composition, and visual effect, while also exploring the deeper cultural context – tracing differing conceptions of their meaning and symbolism, whether as places of refuge, devotion, terror, occult practice, sublime experience or as metaphors of the unconscious. Within a chronological framework encompassing medieval, baroque, enlightenment, sublime, picturesque, and modernist movements, a wide range of topics are explored, from Hawksmoor's London churches, Japanese temple complexes and the shade-patterns of Islamic cities, to Ruskin in Venice and Aldo Rossi and Louis Kahn in the 20th century. This beautifully-illustrated study seeks to understand the work of these shadow-makers through their drawings, their writings, and through the masterpieces they built.

Louis I Kahn Robert McCarter, 2005-06-16 US architect Louis Kahn (1901-74) was one of the greatest influences on world architecture during the second half of the twentieth century. This monograph focuses on Kahn's major designs – from the Yale Art Gallery in New Haven, Connecticut, the Salk Institute, La Jolla, California, the Kimbell Art Museum in Fort Worth, Texas, Phillips Exeter Library, Exeter, New Hampshire to the National Capital of Bangladesh and the Indian Institute of Management in Ahmedabad – as well as a number of unfinished projects, in order to understand his work and philosophy

The Art Museums of Louis I. Kahn Patricia Cummings Loud, Louis I. Kahn, 1989 The art museum has become a prestige

commission for contemporary architects, and for several decades reference has been made to a museum building boom. Among these new museums, those of Louis Kahn are especially admired. This significant American architect, who ranks in this century with Frank Lloyd Wright both as a creator and as an influence, has made a special contribution to the architecture of museums and has helped create a subtle but telling change in the concept of what a late twentieth-century museum building should be. After a brief look at the development of a tradition in museum architecture, this study examines Kahn's three art museums: the Yale University Art Gallery, the Kimbell Art Museum, and the Yale Center for British Art. It traces the development of each museum through its various stages: the background of the institutions and the commissions, the programs for the buildings, their designs and evolutions, their constructions, and the evaluations of the completed buildings. Material on Kahn's plans for a museum for the De Menil collection, begun shortly before his death, is also included. Accompanying the text are illustrations of the buildings, including Kahn's personal sketches, architectural plans and sections, and presentation perspective drawings. Photographs of the finished buildings present the transformed vision of the architect in tangible form, showing that the museums, while related, are individualized accomplishments. This is the first comprehensive study of Kahn's museums.

The Paintings and Sketches of Louis I. Kahn Jan Hochstim, Louis I. Kahn, 1991 The Paintings and Sketches of Louis I. Kahn is the first comprehensive presentation and analysis of this great twentieth-century master's art works - his main pursuit for the thirty years before he achieved preeminence in the field of architecture. The charcoal sketches, pastels, watercolors, and oils presented here were made largely on Kahn's travels and vacations in Europe, Canada, and the United States. They range from his experiments in moderne-style illustration, to realism, to the stark and metaphysical abstractions of his later years - including landscapes, building sketches, still lifes, portraits, and cityscapes. Organized chronologically, each work is accompanied by a brief description and analysis. This lavishly illustrated volume provides a catalogue raisonné of all 480 known paintings and sketches by Kahn, and also includes an in-depth critical analysis of the works and their relationship to his architecture, a biographical sketch, an extensive bibliography, and an introduction by leading Kahn authority Vincent Scully. -- from dust jacket.

Beginnings Alexandra Tyng, 1984-02-14 Comprehensively traces the development of Louis I. Kahn's philosophy of architecture from its beginnings in the 1930s to Kahn's death in 1974. The author, Kahn's daughter, provides a unique presentation of biographical information, portions of letters and writings, speeches, photos, and other material inaccessible to other writers. Includes diagrams collected from published and unpublished sources. Shows how Kahn's personality and background contributed directly to his philosophical principles.

Theories and Manifestoes of Contemporary Architecture Charles Jencks, Karl Kropf, 1997-08-05 This essential compendium presents more than 150 key arguments by major architectural philosophers and gurus of today and outlines the

numerous developments that have taken place in this field since the 1950s. Each of the statements is accompanied by a short biography of the architect and an extract from their principal texts drawn from a variety of sources.

Louis I. Kahn - Silence and Light Alessandro Vassella, 2013-05-15 Louis I. Kahn (1901–74) was one of the foremost architects in America during the twentieth century. His notable buildings include the Yale Study Center; the Salk Institute in Pasadena, California; and the Exeter Library in Exeter, New Hampshire. On February 12, 1969, Kahn gave a lecture at the School of Architecture at Swiss Federal Institute of Technology in Zürich. Entitled *Silence and Light*, the lecture explains Kahn's spiritual understanding of architecture, which goes far deeper than simply constructing buildings. He also gives a remarkably prescient account of a belief in sustainable architecture that prefigures the twenty-first century's focus on green technology. The lecture is represented in transcripts into five different languages (German, Italian, English, French, and Spanish), as well as an audio recording of Kahn giving the lecture in English included on CD. To complement the original text, the editor has included a preface written by Kahn's close friend and fellow architect Balkrishna V. Doshi, as well as many of Kahn's own images and drawings, some of which have never been published before.
