Textbook of Basic Nursing Caroline Bunker Rosdahl, Mary T. Kowalski, 2008 Now in its Ninth Edition, this comprehensive all-in-one textbook covers the basic LPN/LVN curriculum and all content areas of the NCLEX-PN®. Coverage includes anatomy and physiology, nursing process, growth and development, nursing skills, and pharmacology, as well as medical-surgical, maternal-neonatal, pediatric, and psychiatric-mental health nursing. The book is written in a student-friendly style and has an attractive full-color design, with numerous illustrations, tables, and boxes. Bound-in multimedia CD-ROMs include audio pronunciations, clinical simulations, videos, animations, and a simulated NCLEX-PN® exam. This edition's comprehensive ancillary package includes curriculum materials, PowerPoint slides, lesson plans, and a test generator of NCLEX-PN®-style questions.

All-in-one Care Planning Resource Pamela L. Swearingen, 2004 This exciting new resource contains selected care plans for pediatric, maternal, and psychiatric nursing in addition to medical-surgical nursing care plans - 101 care plans in all. This allows students to use one book throughout the curriculum. Care plans are organized in four separate sections (medical-surgical, pediatric, maternal, and psychiatric) and within each section alphabetically by disorder/condition. The open and attractive two-color design, the latest NANDA nursing diagnoses, and desired outcomes featuring specific timeframes, make this the most student-friendly and clinically relevant nursing care plan book. The unique four books in one approach includes pediatric, maternal, and psychiatric nursing care plans in addition to medical-surgical care plans. Written by clinical experts in each subject area to ensure the most current, accurate, and clinically-relevant content available. Each

care plan employs a consistent format of: Overview, Health Care Setting, Assessment, Diagnostic Tests, Nursing Diagnoses, and Patient-Family Teaching and Discharge Planning. Detailed rationales for each nursing intervention help students to apply concepts to clinical practice. An open and attractive two-color design facilitates quick and easy retrieval of information. Nursing interventions and rationales are listed in a clear two-column format to make the information more accessible. Related NIC interventions and NOC outcomes are listed for each nursing diagnosis. The Patient-Family Teaching and Discharge Planning section highlights key patient education topics, as well as resources for further information. Health Care Setting is specified for each care plan, since these conditions are treated in various settings such as hospital, primary care, long-term care facility, community, and home care. Outcome criteria with specific timelines enable nurses to set realistic goals for nursing outcomes and provide quality, cost-effective care. Includes the most recent NANDA Taxonomy II nursing diagnoses. Separate care plans on Pain and End-of-Life Care focus on palliative care for patients with terminal illnesses, as well as relief of acute and chronic pain.

Medical-surgical Care Planning Nancy Meyer Holloway, 2004 Revised for nursing students, educators, and practicing nurses, this complete reference contains almost 100 comprehensive clinical care plans for adult patients in medical-surgical units. New to this edition are care plans for acute alcohol withdrawal, hypertensive crisis, Parkinson's disease, sickle cell disease, transplantation, and end of life.

Medical-surgical Nursing Lois White, Gena Duncan, 2002 *Medical-Surgical Nursing: An Integrated Approach, 2E* examines all aspects of this nursing field, from how and where the health care delivery system is set up, to the nurse's role in care related to IV therapy and diagnostic testing, to legal and ethical responsibilities, communication, and cultural diversity. This revised edition also includes new chapters covering alternative therapies, and responding to emergencies. Case studies, critical thinking questions, and exercises developing care plans encourage students to think beyond the classroom. Full color illustrations, cross-referencing between chapters, and suggested resources are among the many features that will appeal to students. Diagnostic tests are listed alphabetically in chart form making important information about the test, normal values and nursing responsibilities easy to find. Chapter end critical thinking questions help students apply chapter content. Web Flash box suggests Internet sites students can consult for additional information. Text includes a glossary, a list of abbreviations and acronyms, a listing of the latest NANDA nursing diagnoses and Standard Precautions

Risk Control and Quality Management in Neurosurgery H.-J. Steiger, E. Uhl, 2001-10-15 Quality in an invasive discipline such as neurosurgery comprises evidence based medicine, cost effectiveness and also risk control. Risk control and quality management have become a science on their own, combining the expertise of many specialists such as psychologists,

mathematicians and also economists. Intensive communication with basic safety scientists as well as safety experts from the industry and traffic promises ideas and concepts than can be adopted for neurosurgery. An international conference was held in Munich in October 2000 bringing together neurosurgeons and safety experts from outside medicine in order to discuss basic aspects of risk control and quality management and to develop structures applicable to neurosurgery. Basic aspects such as principles of risk and safety management, the human factor as well as standards of neurosurgical patient care, proficiency of staff and residents, and industrial quality standards were discussed. The presentations and discussions resulted in a wealth of new ideas and concepts. This book contains this material and thus provides a unique and comprehensive source of information on the current possibilities of quality management in neurosurgery.
