The Regional Travel Guide for Istanbul and Marmara Region (Turkey) YouGuide Ltd,

The Rough Guide to Istanbul Terry Richardson, 2012-07-19 The Rough Guide to Istanbul is the perfect introduction to a vibrant mega-city, fast-becoming as popular for its nightlife and arts scene as it is for its unique historical heritage. All the major Byzantine and Ottoman sites, plus a myriad lesser-known gems, are easily tracked down using clear, comprehensive maps. Whether you wish to watch the faithful at prayer in the iconic Blue Mosque, admire the glittering gold mosaics in the Church of the Holy Wisdom, relax in an historic Turkish bath, cruise up the continent-dividing Bosphorus or dance the night away in an über-cool club, you can find out where and how in The Rough Guide to Istanbul. Evocative photographs of the city's highlights complement the text and two full-colour sections introduce the fascinating world of Ottoman Turkish architecture and the culinary delights of the Turkish kitchen. There are up-to-date descriptions of the city's best bars, cafes, clubs, hotels, restaurants and shops for all budgets, and a detailed section on 'out of town' trips including the legendary city of Troy and the former-Ottoman capitals of Bursa and Edirne. Make the most of your time, with The Rough Guide to Istanbul. Now available in ePub format.

International Perspectives on Public Transport Responses to COVID-19 Takeru Shibayama, Guenter Emberger, 2024-07-30

International Perspectives on Public Transport Responses to COVID-19 International Perspectives on Public Transport Responses to COVID-19 examines the pandemic response of transport policymakers around the world and analyzes what can be learned to prepare for the next epidemic—or any other critical event that threatens transportation services. It combines theoretical analysis with a compendium of country-focused case studies to provide scientific evidence and decision-making support for the actions that each transportation official must make going forward. This book begins with Part 1, a thematic and comparative section on response and recovery efforts. It provides insights into topics such as mitigation strategies and preparedness of the public transport sector to epidemics prior to COVID-19; responses during the COVID-19 pandemic and recovery from it; public transport services in urban and rural areas during the pandemic; and social (or physical) distancing and any other protective on-board measures. Part 2 then offers a set of international case studies, wherein various authors from different countries review their governments' and operators' responses. Each chapter is guided by a set of common

research questions based on disaster mitigation theory. Part 3 then focuses on learnings and comparative analysis from the COVID-19 pandemic for future epidemic mitigation strategies in the public transport sector. Governments, public transport authorities and operators, as well as students and researchers will learn what has and has not worked well during the COVID-19 pandemic. These insights will help them to mitigate, prepare, respond, and recover from unexpected disruptive events like pandemics in the future. - Combines case studies (country-specific chapters) and analysis (thematic chapters) to enable a deeper understanding and provide different perspectives - Puts a clear focus on public transport, the most affected mode of transport amid the COVID-19 pandemic - Analyzes the COVID-19 responses in the public transport sector through the perspective of disaster management

Urban Transport XXIV F. A. Ortega Riejos, 2019-01-30 Providing a collection of research works on the continuing requirement for better urban transport systems, this volume consists of papers presented at the 24th International Conference on Urban Transport and the Environment. The need for better urban transport systems and for a healthier environment has resulted in a wide range of research originating from many different countries. These studies highlight the importance of innovative systems, new approaches and original ideas, which need to be thoroughly tested and critically evaluated before they can be implemented in practice. Moreover, there is a growing need for integration with telecommunications systems and IT applications in order to improve safety, security and efficiency. This book also addresses the need to solve important pollution problems associated with urban transport in order to achieve a healthier environment. The variety of topics covered in this volume reflects the complex interaction of the urban transport systems with their environment and the need to establish integrated strategies. The aim is to arrive at optimal socio-economic solutions while reducing the negative environmental impacts of current transportation systems.

How do people maneuver ever-present traffic jams in Istanbul? How do low-income residents in Cairo manage their lives drawing on neighborhood social networks? The book is organized into six parts: Urban Fieldwork; Communities; Urban Structure, Inequality, and Survival; Immigrants, Migrants, and Refugees; Changing Cities; and Current Topics in Urban Anthropology. The last part addresses issues at the forefront of anthropological research and broader political debates, like environmental justice, disability and accessibility, and access to water supplies. Each part includes an introduction and each chapter is preceded by notes about its context and relevance. The rich ethnographic content of the chapters makes them highly accessible to students while addressing relevant topics and themes.
