Gary Jeffrey

Science Fiction Literature through History Gary Westfahl, 2021-07-19 This book provides students and other interested readers with a comprehensive survey of science fiction history and numerous essays addressing major science fiction topics, authors, works, and subgenres written by a distinguished scholar. This encyclopedia deals with written science fiction in all of its forms, not only novels and short stories but also mediums often ignored in other reference books, such as plays, poems, comic books, and graphic novels. Some science fiction films, television programs, and video games are also mentioned, particularly when they are relevant to written texts. Its focus is on science fiction in the English language, though due attention is given to international authors whose works have been frequently translated into English. Since science fiction became a recognized genre and greatly expanded in the 20th century, works published in the 20th and 21st centuries are most frequently discussed, though important earlier works are not neglected. The texts are designed to be helpful to numerous readers, ranging from students first encountering science fiction to experienced scholars in the field.

Recognitions Enrico Botta, Gianna Fusco, Pilar Martínez Benedí, Anna Scannavini, 2024-11-04 This volume offers a critical exploration of the many ways in which transcodification acts at the intersection of literature, art, history, and social and cultural artifacts to foster instances of recognition in the US. Recognition covers a wealth of meanings: from the mere acknowledgement of existence, validity or legality, or appreciation of something as valuable, to the identification of something as known or familiar. Accordingly, this volume deals with different struggles for recognition. One focus of the volume is the assessment of artistic achievement in relation to a so-called original, with essays concerned with cultural codes and with the role that translation, adaptation, and cross-cultural encounters have played in US artistic and literary productions. A second, parallel, strand focuses on the fight for political and social inclusion, or on the dynamics beneath the recognition of group and gender identities, to explore how activism and artistic/literary productions challenge received identity boundaries and accepted social and cultural hierarchies. Bringing together recognition and transcodification/transculturality, the book deconstructs crystalized and codified categories and celebrates the crossing of boundaries.
