American International Pictures Rob Craig, 2019-03-05 American International Pictures was in many ways the missing link between big-budget Hollywood studios, poverty-row B-movie factories and low-rent exploitation movie distributors. AIP first targeted teen audiences with science fiction, horror and fantasy, but soon grew to encompass many genres and

demographics--at times, it was indistinguishable from many of the major studios. From Abby to Zontar, this filmography lists more than 800 feature films, television series and TV specials by AIP and its partners and subsidiaries. Special attention is given to American International Television (the TV arm of AIP) and an appendix lists the complete AITV catalog. The author also discusses films produced by founders James H. Nicholson and Samuel Z. Arkoff after they left the company.

American Silent Horror, Science Fiction and Fantasy Feature Films, 1913-1929 John T. Soister, Henry Nicolella, Steve Joyce, 2014-01-10 During the Silent Era, when most films dealt with dramatic or comedic takes on the boy meets girl, boy loses girl theme, other motion pictures dared to tackle such topics as rejuvenation, revivication, mesmerism, the supernatural and the grotesque. A Daughter of the Gods (1916), The Phantom of the Opera (1925), The Magician (1926) and Seven Footprints to Satan (1929) were among the unusual and startling films containing story elements that went far beyond the realm of highly unlikely. Using surviving documentation and their combined expertise, the authors catalog and discuss these departures from the norm in this encyclopedic guide to American horror, science fiction and fantasy in the years from 1913 through 1929.

Dust Or Magic, Creative Work in the Digital Age Bob Hughes, 2007 A book for the interface workers. Dust or Magic was primarily written for the young, talented people whose creative instincts are kindled by computers and live to create 'good stuff', but who are systematically betrayed by the managerial types in suits who hire them, set them absurd tasks, and sack them when their half-baked schemes go belly-up. It is also for people who simply want to know how human creativity fares in the digital age. Originally published by Addison-Wesley (under the title 'Dust or Magic, Secrets of successful multimedia design') this book is, in part, a 'secret history' of computers: a history told from the vantage point of the people who did the work. We have insiders' accounts of a range of influential products and projects, many of which were in danger of being forgotten. The scene is illuminated by recent insights into creativity and well-being from the fields of psychology and neuroscience, as well as tried-and-tested, practical strategies for workplace survival from other industries. The author, Bob Hughes, has been a 'creative' for most of his working life: first a calligrapher, then an advertising artist and copywriter before discovering computers in the mid-1980s. He now teaches at Oxford Brookes University on the MA in Interactive Media Publishing, and researches and writes about the wider impact of electronics and computers in workplaces world-wide. He also campaigns on behalf of migrants, refugees and all precarious workers. What you are doing is stripping away the corporate bullshit from this 'revolution' - its ours not theirs. Reclaim the pixels - Chris McEvoy (Creator of 'Usability Must Die' www.usabilitymustdie.com). There are many books explaining why software projects go sour; this one breaks the mold by showing how they come good. - Malcolm Cook (Senior Lecturer in Human Factors, University of Abertay) It was incredibly engrossing. I expected to skim through it, and found myself reading it avidly, putting aside all the other work I should have been doing... It rang so true about so many things about the process of creating the virtual world we spend so much time in that I'm dying to share it with others who also create for it, or want to. - Aleen Stein (co-founder of the Voyager Company and CEO of Organa inc. www.organa.com). Shadowheart Tad Williams, 2011-11 When it comes to inventing new worlds, he's as skilled as J.R.R. Tolkien and Frank Herbert. -Christopher Paolini, bestselling author of Eragon. Through the Pale Door Frederick S. Frank, 1990-05-23 *Through the Pale Door* is a bibliographical guide to the primary sources and central texts of American Gothic literature. It surveys and defines the Gothic achievements of approximately 200 American writers who were working in and were influenced by various modes of Gothicism from 1798 to 1982. The book collects, selects, identifies, and classifies all specimens of American Gothic literary activity from its initial expression at the end of the 18th century in the novels of Charles Brockden Brown, to the writings of the modern masters such as H.P. Lovecraft, Shirley Jackson, Joyce Carol Oates, and Stephen King. The historical introduction explains and emphasizes those special characteristics, tendencies, and directions taken by the shapers of an American Gothic tradition which made it different from the British model form. The core bibliography brings together 509 entries selected to suggest the development

and variety of American Gothic endeavor in both its popular and more serious manifestations. Each item in the bibliography is analytic and critical as well as synoptic in its substance with each item assigned a single number for instantaneous referencing and cross-referencing. An appendix citing the important secondary studies of American Gothicism and three indexes, an author-and-title index and an index of critics and subjects, are provided to enhance the researcher's task and to give immediate access to all of the materials of *Through the Pale Door*. This book is suitable for any library and can be read in its entirety by general students as a bibliographical chronicle of the American Gothic movement.
