The McDonaldization of Higher Education Dennis Hayes,Robin Wynyard,2002-08-30 Where not so long ago professors owned the tools of scholarship, controlled the labor process, and certified the quality of our product, the process of McDonaldization has torn this relation asunder. Rapidly increasing student faculty ratios, mass classes, and the use of low-wage teaching assistants and adjunct faculty have changed the job of professor (pp. 64 ff.). Faculty are pressured to recruit and retain students seen as customers (p. 67) and to compete with private for-profit [End Page 368] universities (pp. 71-72). With declining government aid for higher education, students increasingly see education as a form of consumption and demand control, choice, and edutainment (p. 64 and elsewhere). This is seen most obviously in course evaluations which some of the authors refer to as customer satisfaction surveys (pp. 36, 132, 147). At the same time, faculty are relentlessly

pushed to publish, engage in funded research, and develop new technological competencies. Control over product is threatened as universities make demands on ownership of intellectual property including patents and licenses, publications and courseware (pp. 79-81). From the perspective of faculty, McDonaldization represents a dramatic loss of pedagogical authority. Simultaneously, the state, which still pays for much of the cost of education as a public good, is increasing demands for accountability and standards. This takes the form of schemes for standardizing promotion and tenure, quantifying and measuring the product being delivered, and attempting to assure quality.

Von der Industriegesellschaft zur Informationsgesellschaft - eine Einführung zu Manuel Castells "Das Informationszeitalter" Anton Padtberg,Tino Kreßner,2008 Studienarbeit aus dem Jahr 2008 im Fachbereich Medien / Kommunikation - Theorien, Modelle, Begriffe, Note: 1,0, Hochschule Mittweida (FH), 16 Quellen im Literaturverzeichnis, Sprache: Deutsch, Abstract: Manuel Castells wird laut der Zeitschrift The Economist als der erste große Philosoph des Cyberspace bezeichnet. 2002 beschreibt ihn das Internetmagazin TELEPOLIS als Voltaire des Informationszeitalters. Mit den neuen Kommunikationstechnologien ist, nach Manuel Castells, eine Revolution eingeleitet, eine neue Epoche der Menschheit, dessen physische, aber vor allem geistige Möglichkeiten ins Grenzenlose erweitert werden können. Information wird zum entscheidenden Rohstoff, aus dem alle gesellschaftlichen Prozesse und soziale Organisationen gebildet sind. Als

neue Herausforderung steht die Erzeugung und Steuerung von Wissen, Informationen und Technologie zur Organisation der gesamten Gesellschaftsstruktur. Wenn die Informationstechnologie für unsere Zeit das ist, was die Elektrizität im Industriezeitalter war, so lässt sich das Internet sowohl mit dem Stromnetz oder dem Elektromotor vergleichen, denn es besitzt die Fähigkeit, die Kraft der Information über den gesamten Bereich menschlicher Tätigkeit zu verbreiten. Und genauso, wie die neuen Technologien der Energiegewinnung und -verteilung die Fabrik und den Großkonzern als die organisatorischen Grundlagen der Industriegesellschaft möglich machten, bildet das Internet die technologische Basis für die Organisationsform des Informationszeitalters: das Netzwerk. Die Transformation vom Industrialismus zum Informationismus wird dabei als informationstechnologische Revolution beschrieben. Sie setzt eine Rückkopplungsspirale der Anwendung von Wissen auf Wissen in Gang, als Hauptquelle der Produktivität.
