Practices and Perspectives of Teaching and Teacher Education in Africa Boadu, Gideon, Odhiambo, George, Marandi, Pegah, 2023-09-25 Teacher education is a known variable that impacts the quality of teaching and schooling, yet while research on practices in teaching and teacher education abound in other contexts, there seems to be no comprehensive reference work on teaching and teacher education in Africa. With Africa and the diaspora boasting rich, diverse political and educational contexts and practices, this gap in knowledge requires that attention be focused on investigating issues that shape the pace, course, and direction of teaching and teacher education in these contexts. *Practices and Perspectives of Teaching and Teacher Education in Africa* facilitates scholarly discussions among scholars and practitioners about practices, innovations, and future possibilities for educating the next generation of competent students and teachers in Africa. Covering topics such as educational reforms, equity, career progression, and curriculum development, this major reference work is ideal for administrators, industry professionals, researchers, academicians, scholars, practitioners, instructors, and students.

Online Teaching and Learning in the COVID-19 Era Felix Maringe, Otilia Chiramba, 2023-11-30 This book examines the ongoing changes initially caused by the COVID-19 pandemic and the future prospects of teaching and learning in higher education institutions. It focuses on the impact of online education on issues of learning equity and epistemic justice. The transition from traditional face-to-face teaching to remote learning has exacerbated existing inequalities in epistemological access among higher education students, despite the shortcomings of the former in this regard. The book features essays by African academics who reflect on the challenges of epistemological access during the sudden shift to hybrid, blended and remote teaching and learning. It specifically explores the question of equitable learning in diverse home contexts, drawing on both theoretical and empirical studies conducted by the authors in South African universities and the region. The chapters employ the conceptual framework of epistemic injustice to define and explore various forms of such injustice, providing a basis for analyzing the implications of the transition to online pedagogy.

The Geopolitics of Postdigital Educational Development Michael A. Peters, Benjamin J. Green, Olivera Kamenarac, Petar Jandrić, Tina Besley, 2025-11-03 This volume examines the evolving role of education in contemporary geopolitical landscapes, where technological innovation, global networks, and national interests redefine its purpose. Moving beyond territorial geopolitics, it explores education as a critical asset in postdigital societies, embedded in techno-nationalist agendas and

global power structures. In AI, genomics, nanotechnology, and quantum technologies, education serves dual functions: shaping epistemic authority and underpinning knowledge economies. These developments challenge paradigms of truth, consciousness, and equitable knowledge access. The chapters engage with discourses on digital sovereignty, postdigital privilege, democracy, and resistance, illustrating how education restructures global power relations. Synthesizing perspectives from geopolitics, digital transformation, and postdigital educational development, it underscores understanding education as a contested terrain where global equity, inclusion, and ethical technological governance are negotiated. This book is particularly suited for researchers of postdigital education. The *Geopolitics of Postdigital Educational Development* is complemented by *Postdigital Education for Development*, also edited by Michael A. Peters, Olivera Kamenarac, Ben Green, Petar Jandrić, and Tina Besley.

Perspectives on Enhancing Learning Experience Through Digital Strategy in Higher Education Munna, Afzal Sayed, Nadda, Vipin, Allahyari, Theo Ammari, Cantafio, Giuseppe, Bilan, Sahidi, 2023-07-24 Digital technology is changing the way we think, operate, communicate, and avail services including education. In recent years, there has been an increasing demand in the higher education sector to implement digital transformation, especially in the way we deliver education. *Perspectives on Enhancing Learning Experience Through Digital Strategy in Higher Education* explores various factors enhancing the learning experience, considers the impact of digital strategy to enhance the learning experience, and analyzes learning challenges and opportunities for students in the higher education environment. The book also helps improve students' perceptions, communication, quality of education, critical thinking, self-learning, and satisfaction in higher education. Covering key topics such as digital technology, critical thinking, and digital innovation, this premier reference source is ideal for industry professionals, administrators, policymakers, higher education faculty, researchers, academicians, scholars, practitioners, instructors, and students.
