Muros de discriminación y exclusión en la construcción de identidades: la mirada de las ciencias sociales. Almudena Cotán Fernández, José Carlos Ruiz Sánchez, 2021 Si algo caracteriza a la globalización contemporánea es la apertura, flexibilización y, sobre todo, la hibridación de la que estamos siendo testigos a la hora de construir las identidades. Antes de que la interacción en internet por medio de las redes sociales hiciera acto de presencia, la edificación de identidades tenía un marcado carácter de proximidad y presencialidad. Los referentes en torno a lo cuales pivotaba la pedagogía identitaria estaban configurados en los círculos de intimidad que se experimentaban en vivo y en directo, que poseían un testimonio claro y personalmente conocido. En este sentido, el plano mediático como eje referencial para esta construcción de la personalidad se percibía desde la lejanía y se caracterizaba por un halo ilusorio.

Handbook on Teachers' Work Nina Bascia, Rhiannon M. Maton, 2025-09-30 The Handbook on Teachers' Work brings

together research and evidence-based authoritative writings from across the globe that explicitly theorizes and studies teachers' work. Drawing on research from twelve countries across 6 continents, the chapters are grouped into themes that represent key issues related to work from global perspectives, including: The Political and Policy Contexts of Teachers' Work Teaching as an Occupation Diverse Teacher Identities and Roles Teaching as Collective and Relational Work; and Teaching and Activism The volume explores the idea of teaching as an occupation with a history and trajectory that are shaped by political economies; historical progressions; organizational structures; social relations among educators, students, and others; teachers' career and labor patterns; their professional norms; and raced, gendered, classed, and culturally linked expectations of teachers and about public schooling. This essential handbook will be of interest to teacher educators, policymakers, and students and researchers in the fields of teachers' work, curriculum theory, educational policy and politics, foundations of education, multicultural education and teacher education.

The Politics of Education Christos Kassimeris, Marios Vryonides, 2012-03-12 Education is a thoroughly political enterprise. The process of determining the purpose of education has always been highly controversial. It has resulted in disputes that have not only divided people philosophically, but also on the basis of religion, region, class, race, and ethnicity. As a result, education provides us with a spectacular arena in which to explore the tensions inherent in European and North American societies, as well as an understanding of how current politics shape education policy. This book focuses on the politics of education, relating to the formation of national identities as affected by globalization and multiculturalism. It assesses the ways in which governance institutions, political ideologies and competing interests, both within and outside of the education community, influence the content, form, and functioning of education. As a collection of studies of the political aspects of education and educational policy-making, this book reaffirms that educational phenomena reflect and inevitably serve specific political agendas. Political scientists, sociologists and education scholars will find this to be an important and valuable text.
