Fabio Alberto Arias Arbeláez

Sustainable Management of Natural Resources Fortunato Garza-Ocañas, 2023-09-13 Climate change and human activities are impacting the environment around the world and there is a great need to update our knowledge of natural resources in order to sustain the livelihoods of rural communities and urban dwellers. Educational tools help people to understand the ecology, and the management of natural resources and to participate in actions to protect the environment. This book has a multipurpose focus regarding biodiversity, management, and conservation of the natural resources as species are linked in nutritional webs in the ecosystems. Ecology, diversity, conservation, and management practices such as plant species, native fish, edible mushrooms, and woody species are important for improving people livelihoods and incomes. It is expected that readers will learn to apply similar multipurpose approaches to natural resources in other parts of the world when their environments are affected by climate change or human activities. This book introduces the importance of the sustainable management of natural resources to a wide audience, including policy decision makers, but also researchers.

Ecología y capital Enrique Leff, 1994 La destrucción ecológica, la degradación ambiental y el deterioro de la calidad de vida de las mayorías aparece como un signo elocuente de los límites de la racionalidad económica sobre la cual se ha construido la civilización moderna. En la carrera desenfrenada del crecimiento económico se ha desterrado a la naturaleza de la esfera de la producción, subyugando las identidades culturales, socavando las bases de sustentabilidad ecológica del planeta y ensanchando las desigualdades sociales. Desde una postura crítica del discurso de la globalización y del desarrollo sostenible, Enrique Leff desentraña las raíces profundas de la crisis ambiental -crisis de la razón instrumental y de la racionalidad económica dominantes-- y elabora los fundamentos de un nuevo paradigma productivo.

Guanacos and People in Patagonia Pablo Carmanchahi, Gabriela Lichtenstein, 2022-08-16 This book relates one of the most representative species of Patagonian wildlife, the guanaco, to human societies across time, and explores how that relationship has changed over time due to different land uses and productive interests. The book provides information to understand these interactions, and contextualizes the current situation of this species. In some cases, it proposes possible solutions to conflicts, and also shows ongoing activities aimed at sustainable use and conservation. The audience for this

book includes researchers, graduate students, policy makers and conservation and rural development professionals. In addition, it will serve as a tool for application authorities and field technicians on the use and conservation of wildlife, to define management actions for this species.

Aportaciones científicas y humanísticas mexicanas en el siglo XX Octavio Paredes-Lopez, Sergio Estrada Orihuela, 2008
Que sabemos de las mayores aportaciones científicas y humanísticas realizadas a lo largo del siglo XX por investigadores nacionales? alguna vez has escuchado hablar del Factor de Transferencia? Un inmunorregulador que suele emplearse en pacientes con enfermedades alérgicas y que llega a producirse con una tecnología desarrollada en el Departamento de Inmunología del IPN. En este libro, más de 900 páginas en relación a aquellos descubrimientos que han contribuido a colocar a México en el escenario mundial. El resultado de eminentes biólogos, médicos, antropólogos, químicos, geólogos, ingenieros, historiadores, físicos, matemáticos, geógrafos o filósofos.

Bolivia Federal Jorge Ivan Roca Urioste, 2022-04-01 Para poder unir al país con una sola propuesta en contra de la dictadura, se propone el modelo federal, que divide en nueve departamentos el poder político. Con esta propuesta, las fuerzas sociales de cada departamento pueden tener una guía en la cual basarse para elaborar su propia constitución y estatuto y presentarse a una constituyente con documentos ya elaborados, socializados y consensuados en cada municipio y con todas las instituciones, asociaciones y grupos sociales. Con eso, se pretende llegar a un pacto social tan necesario para poder desarrollarse.

Género, medio ambiente y sustentabilidad del desarrollo Nieves Rico, 1997 La sociedad global se enfrenta, a fines de este siglo, al agotamiento de un estilo de desarrollo caracterizado por sus nocivos efectos para los sistemas naturales y su falta de equidad. En consecuencia, se hace evidente la necesidad de avanzar hacia un nuevo estilo de desarrollo, y por ende una nueva conceptualización de este, basada en criterios de sustentabilidad y equidad. En este contexto, el conocimiento de las modalidades que asume la participación de los distintos grupos y sectores de mujeres en el desarrollo ha dado relevancia a la conexión entre las relaciones de género, el medio ambiente y la sustentabilidad. Además, en el proceso de transición para

alcanzar este objetivo las mujeres aparecen como una fuerza que contribuye al logro de un manejo adecuado del medio ambiente y que también exigen una mejor calidad de vida y mayor equidad social. Esto se reconoce en los documentos, las declaraciones y los planes de acción emanados de las distintas reuniones internacionales realizadas en los últimos años. Pese a que la interrelación entre las mujeres, las relaciones de género y el ambiente es un tema de interés y de análisis emergente, ya es posible identificar distintas orientaciones teóricas en este ámbito.

Geografía aplicada en Iberoamérica Carlos Garrocho Rangel,Gustavo D. Buzai,2021-06-23 El libro incluye 23 autores de diversos países iberoamericanos, además de una introducción y la reflexión final. Se divide en tres grandes apartados: el primero: El radar geográfico: aproximaciones de amplio espectro examina la Geografía Social, Económica y Ambiental; el segundo: Temas transversales estudia los ejes que cruzan las ciencias sociales especialmente integradas: terminología, análisis espacial, tecnologías vinculadas a la información geográfica y el tercero de ellos: Investigación aplicada, donde se presentan ejemplos de investigación de punta en la región iberoamericana. Los autores destacan que desde algunos años, los trabajos en ciencias sociales que le otorgan un papel estratégico a la dimensión espacial están registrando un enorme interés en el mundo y que Iberoamérica no escapa a esta tendencia. Esto se puede observar en la abundante producción científica de la región, derivada de este enfoque, en sus contribuciones claves al diseño de políticas públicas y privadas o en la consolidación de numerosas revistas especializadas (como EURE: Chile Economía, Sociedad y Territorio: México).
