**Más allá del estrés (2ª ed.)** Tomás García Castro, 2018-03-20 Antes de ser asesinado, Andrés Alberó, un brillante y reconocido inspector de policía, tiene la oportunidad de salvar su vida. Una noche de sueño convulso recibe un enigmático mensaje que parece contener las claves para escapar de la muerte. Comenzará a vivir entonces una espiral de extraños acontecimientos que, en un vertiginoso declive personal y profesional, le llevará a descubrir lo que en verdad la revelación esconde: un poderoso asesino ha estado perfeccionando durante años un plan para hacer del inspector Alberó su próxima víctima. Más allá del estrés es el doble retrato de un asesino y de su víctima, los cuales se funden por momentos en un único personaje recreando un juego de roles diabólico. ¿Y tú?, ¿crees estar a salvo del asesino? Si es así, te equivocas.

**El impacto de la inversión extranjera 1990-2000 sobre el desarrollo durable de la región minera de Antofagasta (Chile)** Jan José Cademartori, 2007 Esta investigación analiza los efectos económicos y sociales de las masivas inversiones multinacionales mineras en la década de los noventa, sobre una región del Norte de Chile llamada Antofagasta. Se propone una visión de desarrollo durable en una estructura de enclave, estructura socio-económica modelada por el autor para adaptar a la globalización la escuela latinoamericana del desarrollo. De este modo se cuestiona si el enclave tradicional se transforma en un enclave moderno que garantiza su desarrollo durable, como resultado del aparente dinamismo económico de la zona receptora. Se comienza presentando una discusión teórica confrontando el modelo de enclave con las visiones opuestas, neoclásica y de clusters industriales. En la primera parte de los resultados se recupera la historia económica social de la región de Antofagasta y las políticas mineras. En la segunda parte se estudian el contexto político institucional y las políticas regionales que han favorecido las inversiones extranjeras. En la tercera parte se miden los impactos a nivel de desarrollo productivo, fiscal y social, así como la exportación del excedente regional. Se dedica un capítulo especial a analizar las relaciones entre las EMN y los proveedores locales, así como las condiciones de vida de los trabajadores, con una gran masa de subcontratados. La tercera parte finaliza investigando de qué manera responden los actores sociales al modelo de desarrollo y al discurso de las EMN.

*Comentarios a la Ley 9/2017, de Contratos del Sector Público* Álvaro Canales Gil, Justo Alberto Huerta Barajas, 2018-07-01 Este trabajo, realizado por los profesores del Máster de Gestión de Contratos del IUGM/UNED, Doctores en Derecho, Álvaro Canales Gil y Justo Alberto Huerta Barajas, es ante todo un reto para hacer frente a la complejidad de la materia que la nueva Ley 9/2017, de 8 de noviembre, de Contratos del Sector Público, contiene. En segundo lugar, esta obra tiene una vocación didáctica, a la que une el rigor en el análisis de sus contenidos, resultado de la amplia experiencia de los autores en la formación de postgrado universitario y su dedicación al control de la contratación, como interventores y auditores de la Administraciones Públicas. En tercer lugar, la presente obra no se conforma con explicar el contenido y la aplicación de Ley 9/2017, de 8 de noviembre, de Contratos del Sector Público, pues incorpora, además, categorías jurídicas procedentes de la normativa presupuestaria, ampliamente conocida por los autores, permitiendo de esta manera un mejor acceso a sus contenidos. Por otra parte, además de los gráficos explicativos, esta publicación permite comparar y analizar las diferencias entre la anterior normativa y la nueva Ley 9/2017. Además, la Editorial de la Agencia ha adquirido el compromiso de tener la obra permanentemente actualizada en su versión electrónica, lo que implicará que el lector esté siempre informado de la materia vigente.

Atlas prospectivo territorial-industrial para la atracción de inversiones Javier Jileta Ockholm, 2025-12-09 Este Atlas prospectivo territorial-industrial constituye una de las evaluaciones más completas sobre el potencial productivo de México en el contexto contemporáneo. Basado en análisis rigurosos de cadenas globales y nacionales de valor, integra la dimensión territorial para identificar zonas con alta capacidad de desarrollo industrial sostenible. El libro combina cartografía avanzada, diagnóstico económico, análisis urbano-ambiental y criterios de innovación para delinear cinco sectores estratégicos: energía eólica, industria farmacéutica, aeroespacial, agroindustria y petroquímica. Cada sector se estudia desde su estructura global, sus eslabonamientos nacionales y su localización regional, lo que permite visualizar corredores industriales con potencial real para atraer inversiones de alto valor agregado. A partir de metodologías inspiradas en la nueva geografía económica y en las agendas globales de desarrollo sostenible, esta obra ofrece una visión integral del territorio como plataforma para un crecimiento inclusivo, inteligente y resiliente. Su propósito es servir como herramienta estratégica para responsables de política pública, inversionistas, académicos y organismos internacionales interesados en impulsar el bienestar social mediante una industrialización sostenible.

Competitividad de las ciudades en México Jaime Sobrino,2003 En la era de la globalización, la palabra competitividad es cada vez más utilizada para referirse no sólo al desempeño de las empresas, sino también al comportamiento económico de países, regiones y ciudades. La de una empresa se define en función de su actuación comercial y su habilidad para obtener utilidades que se traducen en reinversión. La competitividad de un país está en función del desempeño microeconómico de sus unidades productivas, de la instrumentación de políticas públicas para promover el crecimiento económico, y de la existencia y evolución de las ventajas territoriales y distributivas que ofrecen las ciudades para el desarrollo de las actividades económicas. Las ciudades, por su parte, compiten entre sí por atracción de inversiones para la creación de empleos y generación de ingresos. La competitividad que registran las unidades económicas de cualquier territorio resulta del aprovechamiento de una serie de factores locacionales dinámicos que se denominan ventajas competitivas.

*Psicología de la calidad de vida laboral* Antonio Duro Martín,2013-02-12 Este libro ofrece una introducción teórica y metodológica a la calidad de vida laboral desde la perspectiva de la Psicología del Trabajo y de las Organizaciones. Con tal finalidad, se examinan los factores del trabajo y del trabajador que son relevantes y propician el bienestar laboral, entendido éste como un prerrequisito para preservar la salud mental en el trabajo. En el tema que nos ocupa es clave conocer las exigencias del trabajo, la forma cómo percibe y actúa sobre ellas el trabajador, el ajuste trabajador-trabajo resultante de tal proceso y las consecuencias que tiene todo ello sobre la experiencia subjetiva del trabajo en el día a día: satisfacción, compromiso, desempeño. También se realiza una revisión de las principales iniciativas y medidas organizacionales que se han venido adoptando en las organizaciones para mejorar la calidad de vida de sus empleados y proporciona algunas directrices para una gestión eficaz del bienestar y salud de las plantillas por parte de los responsables de recursos humanos.

**Calidad de vida laboral y su relación con aspectos socio-laborales en una empresa de servicios mecanizados del sector industrial** Carolayne Linette Fierro Cano,2018 La Calidad de Vida en el Trabajo es un concepto multidimensional que se basa en la satisfacción de una amplia gama de necesidades personales, presentadas en su lugar de

trabajo, ubicándolo como clave para la realización personal, familiar y social del trabajador y, como medio para preservar su economía y salud. Ello implica la valoración objetiva y subjetiva de siete dimensiones: soporte institucional, seguridad en el trabajo, integración al puesto de trabajo, satisfacción por el trabajo, bienestar logrado a través del trabajo, desarrollo personal del trabajador y administración del tiempo libre. Se realizó un estudio no experimental, de tipo transversal, correlacional y descriptivo. La muestra estuvo conformada por 50 trabajadores de una empresa de servicios mecanizados del sector industrial. El objetivo del estudio fue evaluar la calidad de vida laboral, y su relación que presenta ésta con los accidentes y enfermedades laborales, y con variables sociodemográficas como edad, antigüedad en el trabajo y estado civil. Los resultados determinaron que a nivel general los trabajadores presentaron una calidad de vida laboral global media, y en el análisis estadístico se determinó que no existe relación entre calidad de vida laboral y accidentes y enfermedades profesionales. Respecto a la influencia de las variables sociodemográficas en la calidad de vida laboral se determinó que no existía ninguna correlación de las variables, sin embargo se encontró una relación significativa en una de las dimensiones de calidad de vida laboral; soporte institucional para el trabajador con la edad.

Estudio Experimental De La Calidad De Vida Laboral En Mipymes Turísticas (Experimental Study of the Quality of Working Life in Mipymes Tourist). Luis Alfredo Argüelles Ma, Román Alberto Quijano García, Mario Javier Fajardo, José Alonzo

Sahuí Maldonado, Deneb Elí Magaña Medina, 2014 English Abstract: This paper develops a predictive model of quality of working life as the first phase of the research project (Argüelles et al., 2013). We design strategies at the business level, experimenting with 50 workers of tourist mipymes. The experiment confirms the model is reliable for the perception of quality of life and to respond in a positive way observed size-dependent variables. These variables include institutional support, security and integration into the post, satisfaction, successful wellness, personal development, and free time management. Defining management strategies to be adopted on the basis this predictive model will enhance organizational competitiveness. The results of correlation tests between the independent variables and dependent are highly acceptable. The T Student test, found that strategies designed for the experiment had an impact on workers, increasing their perception of satisfaction.
