Translation and Language Education Sara Laviosa, 2014-08-01 The revival of translation as a means of learning and teaching a foreign language and as a skill in its own right is occurring at both undergraduate and postgraduate levels in universities. In this book, Sara Laviosa proposes a translation-based pedagogy that is grounded in theory and has been applied in real educational contexts. This volume draws on the convergence between the view of language and translation embraced by ecologically-oriented educationalists and the theoretical underpinnings of the holistic approach to translating culture. It puts forward a holistic pedagogy that harmonizes the teaching of language and translation in the same learning environment. The author examines the changing nature of the role of pedagogic translation starting with the Grammar Translation Method and concluding with the more recent ecological approaches to Foreign Language Education. Translation and Language Education analyses current research into the revival of translation in language teaching and is vital reading for translators, language teachers and postgraduate students working in the areas of Translation Studies and Applied Linguistics.
