Frequency Penney Peirce,2009-02-03 Because science has long taught us to rely on what we can see and touch, we often don't notice that our spirit, thoughts, emotions, and body are all made of energy. Everything is vibrating. In fact, each of us has a personal vibration that communicates who we are to the world and helps shape our reality. In *Frequency*, Penney Peirce shows you how to feel your personal vibration and work intentionally with energy to transform your life. By learning to find your home frequency -- the highest, most natural personal vibration you can attain -- you can maximize clarity, minimize struggle, and discover new talents and capacities. Awakening to the new reality that a higher frequency reveals can help you dramatically improve relationships, find upscale solutions to problems, and materialize a life that contains everything you need. *Frequency* shows you how to manage your energy state so you can stay on track with your destiny -- and reap the benefits of the life you're truly built for.

Aeromedical Aspects of Vibration and Noise J. C. Guignard,P. F. King,North Atlantic Treaty Organization. Advisory Group for Aerospace Research and Development. Aerospace Medical Panel,1972 Vibration and noise are treated separately in Parts One and Two of this volume; while Part Three deals with the special aeromedical problem of auditory perception in aircrew and ground support personnel and its conservation. Part Four is a glossary of relevant terms. This division of the subject matter recognises that in practice vibration and noise are conveniently studied, measured and controlled as separate entities. It should, however, be borne in mind that these conditions rarely affect man singly. They are commonly present at the same time; and vibration and noise may often be associated with different kinds of environmental agent, such as heat, to make up a combined environmental stress. The human response to such combinations of stressful agents is still a largely neglected field of research.

The Human Energy Field — Chakras Cathy Chapman, Chakras spin, take in energy, and release energy. They react to what happens in your life. They react to your thoughts and emotions. They react to the actions you take. You might have a thought that goes through your mind, such as, “Oh, how terrible that I forgot ‘this.’” Your third chakra reacts to that. You might have a thought that says, “I wish I had said ‘this’ or done ‘that.’” Your second chakra reacts to that. Focused intention occurs when you are in your heart source. You might think you only focus intention with your mind, but when you are in your heart source, your chakras align. From your heart source, you connect with the heart chakra and the third eye through that beam of energy, because that beam of energy goes all the way up and all the way down — all your chakras connect. Your chakras work to keep you in balance as you perform your intention. The beam of energy activates all the chakras so that they come into alignment and balance with each other. If you have a thought while you’re in your heart source — let’s say you think about what happened yesterday and how you’re going to handle things in the future — that energy moves throughout your chakras, up and down your pranic tube. They come into balance. The heart source keeps all your chakras in balance. Take what you need from this book and use it to facilitate healing for yourself and for others. However you use this information, do it from your heart.
