    Tantra Learning Framework Chaitanya Prabhu Hakkaladaddi,2024-03-07 Strange as it may seem, even the most obvious things aren't always so clear. Take oranges, for example - as a kid, I had no idea why we called that bright fruit orange when they always looked more yellow. The same goes for Turkey, the country, versus Turkey, the bird. You'd think it would be simple, but it took me a while. Similarly, although I've been practicing Tantra for over 30 years and designing learning for about 20, I haven't connected the dots between the Tantric Tattvas' psychological system and popular instructional design theories until recently. It was like a lightbulb went off in my head! That's why I'm so excited to tell you about my new Tantra Learning Framework. This instructional design method is based on the 36 Tattvas from Kashmir Shaivism. I mapped how the tattvas and five tantric systems of reality relate to classic ID models, theories, and frameworks. The goal is for this framework to be a real game-changer in creating engaging learning experiences and shortening the time it takes to develop e-learning projects. I can't wait to see how you all put it to use!

    Digital Learning, Teaching and Assessment for HE and FE Practitioners Daniel Scott,2025-02-28 An accessible, practical and up-to-date book on digital learning and teaching, relevant for all those involved in teaching and assessment in higher and further education (HE and FE), whatever your academic or vocational specialism. Fully supports learners in developing skills for the new Diploma in Teaching (Further Education and Skills) qualification . Transferring Gaming and Simulation Experience to the Real World Toshiko Kikkawa,Willy Christian Kriz,Junkichi Sugiura,Marieke de Wijse-Van Heeswijk,2025-02-24 This book focuses on how to connect the gaming experience to the real world. Looking back at the history of the Simulation and Gaming field, it has offered the solution to social problems such as policy making, decision making for business strategies, education and training, environmental issues, urban planning, or disaster awareness. In other words, Gaming Simulation always has had a close connection to the reality. The interconnected modern societies nowadays have become even more complex and ambiguous, as the UN SDGs goals show. Gaming is one of the suitable tools to suggest ways to achieve our goals in a world of uncertainty. Learning starts by experiencing games and their effects in a safe environment. An important part of the gaming simulation process are methods for a transfer of the game-based learning to and an application within reality. However, connecting the experience to reality is not always facile for all the participants, no matter how comprehensive the debriefing is. In addition to debriefing, further transfer methods and conditions have to be implemented in order to create a real change of behavior and systems. The book's authors tackle the challenge by introducing concrete practices and offering various hints for readers struggling to solve a similar issue. In addition, when applying the experience of gaming, we have to carefully consider several ethical issues, which are also covered in this book.

Pedagogy in a New Tonality Peter Gouzouasis,2011 This is a book for teachers, by teachers, from elementary school to university level classrooms. It is about the use of creative instructional strategies in K-12 class room settings, and the transformations the teachers made in their journeys from being traditional practitioners to becoming pedagogical in their approaches to teaching and learning across the curriculum. Over twenty teachers conducted research in their classrooms on the implementation of creative strategies, tactics, graphics organizers, and visual journals in teaching and learning. They have written their inquiries in a narrative style, informed by various forms of arts based educational research. Their research is approachable and usable by other teachers who are interested in becoming reflective-reflexive practitioners. Many of the strategies, tactics, and graphics organizers are described by Barrie Bennett in his widely used textbook, Beyond Monet: The Artful Science of Instructional Intelligence. However, through their journeys of becoming teacher-learner-researchers, many discovered numerous, creative variations of Bennett's work as it was implemented in their classrooms. While there are many professional books that provide ideas on collaborative learning and creative teaching approaches, there is very little published research on the efficacy of these concepts in the K-12 classroom. These inquiries provide practical insights into how inspired teachers can conduct research on improving their own practice as well as on greatly improving their students' learning.
