Management Michael H. Mescon, Michael Albert, Franklin Khedouri, 1985 Abstract: A textbook for introductory management courses presents a fundamental understanding of formal organizations and their effective, objective-oriented management, independent of organization type. The 21 text chapters are organized among 5 principal themes, including (1) elements of organizations and management (perspectives for successful management and the effects of the informal and external environment); (2) the interactive processes of communication and decision making; (3) key management functions; (4) research and applications of group dynamics and leadership characteristics (including aspects of effective leadership style and its applications in managing conflict and change); and (5) models and effective working strategies for productivity enhancement. Case studies, summaries, review questions, and numerous block diagrams are given throughout the text. A companion text, *In Search of Excellence*, detailing lessons and success stories learned from America's most successful companies, accompanies this text for student use. (wz).
