Impacts of Generative AI on the Future of Research and Education Mutawa, Abdullah, 2024-10-09 Artificial Intelligence (AI), particularly Generative Pretrained Transformer (GPT) models, has become one of the most influential and transformative technologies of the 21st century. They have shown immense potential to revolutionize research and education by enabling more efficient data analysis, generating high-quality content, and facilitating personalized learning experiences. As AI continues to evolve, its integration into these fields promises to enhance productivity, foster innovation, and democratize access to knowledge on a global scale. *Impacts of Generative AI on the Future of Research and Education* provides an in-depth understanding of the implication of AI and GPT in the context of research and education. It comprehensively analyzes the potential, challenges, and ethical considerations of AI integration in these sectors. Covering topics such as academic integrity, ethics, and special education, this book is an excellent resource for educators, researchers, academicians, policymakers, administrators, and more.

Artificial intelligence: A new Vista of Marketing DR. PRIYA SACHDEVA, 2022-08-06 Artificial Intelligence has emerged as a miracle which has transformed lives and communication from the core. AI technologies have enabled the brands to make automated decisions based on data collection, data analysis and trends which has significantly impacted brand marketing. The AI techniques is a new dimension which has paved an unprecedented path to shape businesses to deepen brand-consumer relationship. This book has showcased that how AI has seeped in and transformed brand performance, can scale customer personalization and precision in ways, fuels the consumer need of interactivity and impacted content creation, strategizing brand and its assessment. AI is a new tomorrow as it is touching consumer behaviour in infinite ways. This book has highlighted through case studies that how AI has converged a virtual reality platform providing immersive brand experiences to its users, can create simulation models and personalized purchasing processes through recommendations based on machine learning technologies and interaction with virtual assistants which has made many brands adopting AI to stay ahead and sustain in future. This book is strongly recommended for brand managers, researchers, brand professionals, academicians, students and organizations as it unknots the role of AI in augmenting branding and affecting human life in a substantial way.

AI Goes to Church Todd Korpi, 2025-09-30 ...his practical approach neither demonizes nor deifies technology, and is

buttressed by robust yet accessible theological explorations of existential questions about what it means to be human. This will provide tech-curious Christians plenty of food for thought. – Publishers Weekly Review, June 2025

Thinking Theologically About Artificial Intelligence AI Goes to Church unpacks one of the most significant technological advancements of our time—artificial intelligence—and what it means for the ministry. More than just another tech fad, AI presents both profound challenges and extraordinary opportunities for the church. This book equips pastors, ministry leaders, and thoughtful laypeople to engage with AI through a biblical and theological lens, fostering human flourishing while remaining grounded in Christ's teachings. Writing in an accessible, nontechnical style, pastor and missiologist Todd Korpi seamlessly integrates theological reflection with practical application. Whether you're grappling with ethical concerns, curious about leveraging AI for mission, or simply seeking clarity in this rapidly changing landscape, this book provides the guidance you need to steward AI wisely in service of God's kingdom. With its emphasis on thoughtful, lasting principles over fleeting technical hacks, AI Goes to Church serves as your road map to faithfully navigating the complexities of faith, technology, and human flourishing. In *AI Goes to Church*, you'll find:

- A Theological Foundation:** Gain a deep understanding of how AI intersects with Christian theology, exploring implications for human identity, the image of God, and the church's mission.
- Ethical Discernment:** Learn to critically evaluate AI's potential to enhance human flourishing while remaining vigilant to its risks, such as harm to vulnerable populations.
- Practical Integration:** Explore actionable insights for leveraging AI in areas like discipleship and mission, while staying true to the gospel.
- A Missional Vision:** Understand how to see digital spaces as mission fields and use AI creatively to engage those who might not be reached otherwise.
- Hopeful Engagement:** Approach the technological age with confidence, holding on to biblical principles while discerning how to innovate with integrity.

AI represents a profound challenge—but also extraordinary opportunities—for today's church. Whether you're a pastor, ministry leader, or thoughtful believer—discover how faith and technology can intersect in meaningful ways. Get your copy of *AI Goes to Church* today and navigate this new era with a gospel-centered vision.

Leveraging Behavioural Science Language and Artificial Intelligence in Tourism Marketing Ray Tinston, 2023-07-17 Doctoral Thesis / Dissertation from the year 2023 in the subject Computer Sciences - Artificial Intelligence, , language: English, abstract: This thesis examines the integration of behavioural science terminology and artificial intelligence (AI) in tourism marketing. The primary objective of this study is to identify and analyse the potential synergies between these interdisciplinary disciplines and investigate novel strategies for enhancing marketing campaigns and promoting sustainable tourism. The study employs a multi-method approach, including a comprehensive literature review, in-depth interviews with industry experts, and case studies of effective marketing campaigns that engage AI and behavioural science principles. Tourism is a critical contributor to the global economy, accounting for an estimated 1-in-10 jobs worldwide. In the post-Covid era, the sector has experienced significant growth, leading to intense competition among tourism organizations and marketers seeking innovative and sophisticated marketing strategies to attract and retain customers. A promising approach

to enhance customer experiences and maximize marketing efforts is integrating behavioural science and artificial intelligence (AI) in tourism marketing, optimizing marketing activities' effectiveness. Behavioural science involves systematically studying and researching decision-making processes, cognitive biases, and social influences to understand consumer behaviour better, promote environmentally friendly options, and influence purchasing decision. Similarly, AI technologies, such as machine learning and natural language processing, hold the potential to revolutionize business operations and customer engagement. When applied to tourism marketing, combining behavioural science and AI can improve personalization, targeting, and customer interactions, resulting in higher satisfaction and loyalty.
