United States Code ,2013 Preface 2012 edition: The United States Code is the official codification of the general and permanent laws of the United States. The Code was first published in 1926, and a new edition of the code has been published every six years since 1934. The 2012 edition of the Code incorporates laws enacted through the One Hundred Twelfth Congress, Second session, the last of which was signed by the President on January 15, 2013. It does not include laws of the One Hundred Thirteenth Congress, First session, enacted between January 3, 2013, the date it convened, and January 15, 2013. By statutory authority this edition may be cited U.S.C. 2012 ed. As adopted in 1926, the Code established prima facie the general and permanent laws of the United States. The underlying statutes reprinted in the Code remained in effect and controlled over the Code in case of any discrepancy. In 1947, Congress began enacting individual titles of the Code into positive law. When a title is enacted into positive law, the underlying statutes are repealed and the title then becomes legal evidence of the law. Currently, 26 of the 51 titles in the Code have been so enacted. These are identified in the table of titles near the beginning of each volume. The Law Revision Counsel of the House of Representatives continues to prepare legislation pursuant to 2 USC 285b to enact the remainder of the Code, on a title-by-title basis, into positive law. The 2012

edition of the Code was prepared and published under the supervision of Ralph V. Seep, Law Revision Counsel. Grateful acknowledgment is made of the contributions by all who helped in this work, particularly the staffs of the Office of the Law Revision Counsel and the Government Printing Office. -- John. A. Boehner, Speaker of the House of Representatives, Washington, D.C., January 15, 2013--Page VII.

Security in the Persian Gulf Region Fatemeh Shayan,2017-01-09 This book examines changes in the Persian Gulf security complex following the United States (US) invasion of Iraq in 2003, focusing on threats to the collective identities of two religious sects - Shia and Sunni. Although there is a growing body of literature examining security in the Persian Gulf, little focus has been given to the theoretical and methodological aspects of the problem. In this volume, Shayan analyses the causes behind the security changes which occurred in the region since 2003 and demonstrates how regional security dynamics are interlinked to perceived sectarian threats on the Shia and Sunni religious identities. This text is essential reading for political scientists, policy makers and scholars of international relations.
