Los estudiantes de grado Gloria Vadori, Hugo Echevarría, 2010 Este libro sintetiza los principales resultados, logrados en dos proyectos de tipo exploratorios relacionados a la investigación de los alumnos universitarios. El primero se realizó desde el punto de vista psicogenético, indagando las etapas que atravesaban los alumnos cuando aprendían a investigar. Los resultados pueden sintetizarse en dos puntos centrales: los estudiantes presentaron dificultades para argumentar y para entender la diferencia entre investigar e intervenir en la realidad. El segundo proyecto presentado en este libro trata sobre los procesos de investigación de los alumnos universitarios, aunque referido al TFG (Trabajo Final de Grado), desde un punto de vista más general puesto que no sólo se refiere a lo cognitivo. Se indagó la forma de los alumnos de hallar un director, la relación con el director, las motivaciones de los estudiantes para realizar el TFG, los obstáculos para hallar y entender la bibliografía, las estrategias de estudio, la comprensión lectora y el conocimiento metacognitivo, las competencias en escritura, computación e idioma, la organización del tiempo y la comprensión de la metodología de la investigación y las teorías implícitas sobre la ciencia.

Estrategia estatal para la investigación e innovación educativa de las escuelas normales públicas del Estado de México, 2025-10-30 La investigación e innovación educativa (IIE) en las Escuelas Normales Públicas del Estado de México (ENPEM) son vistas como parte de las funciones que permiten el fortalecimiento y transformación institucional. Por ello, y en apego al ámbito de competencia de la Dirección General de Educación Normal y la Subdirección de Escuelas Normales, se publica la Estrategia Estatal de Investigación e Innovación Educativa (EEIIE) de las ENPEM, que se caracteriza por ser un documento normativo de carácter Estatal. Para integrar la Estrategia, en un primer momento se realizó un análisis de los antecedentes y la situación actual de la investigación en las ENPEM, lo que permitió contextualizar y definir las necesidades por atender. En sus apartados se describe el tipo de investigación y la orientación metodológica de las investigaciones educativas, el proceso para registrar, presentar y valorar los avances, y se define la forma en la que los departamentos de investigación e

innovación educativa, así como los órganos colegiados, coadyuvan en el fortalecimiento de la IIE. El presente documento precisa un proceso sistemático que implica la revisión, análisis y reflexión constante en condiciones de participación académica colegiada con el propósito de: Promover y garantizar el desarrollo científico de la investigación e innovación educativa a partir de la sistematización y organización de sus prácticas, sus objetos, herramientas, así como en el desarrollo de proyectos de investigación y en atención a necesidades, vicisitudes y ambientes; cuyo impacto incida en la mejora continua de la Educación Normal y obligatoria.
