**Exploring Physical Anthropology: Lab Manual and Workbook, 4e** Suzanne E Walker Pacheco, 2022-01-14 Exploring Physical Anthropology is a comprehensive, full-color lab manual intended for an introductory laboratory course in physical anthropology. It can also serve as a supplementary workbook for a lecture class, particularly in the absence of a laboratory offering. This laboratory manual enables a hands-on approach to learning about the evolutionary processes that resulted in humans through the use of numerous examples and exercises. It offers a solid grounding in the main areas of an introductory physical anthropology lab course: genetics, evolutionary forces, human osteology, forensic anthropology, comparative/functional skeletal anatomy, primate behavior, paleoanthropology, and modern human biological variation.

**Isotope Production and Applications in the 21st Century** Nigel R. Stevenson, TRIUMF., 2000 The Third International Conference on Isotopes focused on the theme of 'Isotope Production and Applications in the 21st Century' and included presentations by several eminent experts in this field. The three central subjects 'Isotopes in Medicine, Industry and the Environment' were supplemented by presentations on the latest developments in isotope production and synthesis, research into radiopharmaceuticals, applications in agriculture, analytical applications, radiocarbon dating, AMS and PET. Various views on the future directions for producers and users of isotopes were considered at this multi-disciplinary meeting.

Our Blue Planet: An Introduction to Maritime and Underwater Archaeology Ben Ford, Jessi J. Halligan, Alexis Catsambis, 2020-04-07 Our Blue Planet provides a comprehensive introduction to the field of maritime and underwater archaeology. Situating the field within the broader study of history and archaeology, this book advocates that an understanding of how our ancestors interacted with rivers, lakes, and oceans is integral to comprehending the human past. Our Blue Planet covers the full breadth of maritime and underwater archaeology, including formerly terrestrial sites drowned by rising sea levels, coastal sites, and a wide variety of wreck sites ranging across the globe and spanning from antiquity to World War II. Beginning with a definition of the field and several chapters dedicated to the methods of finding, recording, and interpreting submerged sites, Our Blue Planet provides an entry point for all readers, whether or not they are familiar with maritime and underwater archaeology or archaeology in general. The book then shifts to a thematic approach with chapters exploring human interactions with the watery world, both along the coasts and by ship. These chapters discuss the relationships between culture, technology, and environment that allowed humans through time to spread across the globe. Because ships were the primary means for humans to interact with large bodies of water, they are the focus of several chapters on the development of shipbuilding technology, the lives of sailors, and the uses of ships in exploration, expansion, and warfare. The book ends with chapters on how and why the non-renewable submerged archaeological record should be managed, so that both current and future generations can learn from the achievements and failures of past societies, as well as on how anyone can become involved in maritime and underwater archaeology. Throughout, the reader benefits from the personal reflections of a number of leading figures in the field.

*Engaging Archaeology* Stephen W. Silliman, 2018-01-26 Bringing together 25 case studies from archaeological projects worldwide, Engaging Archaeology candidly explores personal experiences, successes, challenges, and even frustrations from established and senior archaeologists who share invaluable practical advice for students and early-career professionals engaged in planning and carrying out their own archaeological research. With engaging chapters, such as 'How Not to Write a PhD Thesis on Neolithic Italy' and 'Accidentally Digging Central America's Earliest Village', readers are transported to the desks, digs, and data-labs of the authors, learning the skills, tricks of the trade, and potential pit-falls of archaeological fieldwork and collections research. Case studies collectively span many regions, time periods, issues, methods, and materials. From the pre-Columbian Andes to Viking Age Iceland, North America to the Middle East, Medieval Ireland to remote north Australia, and Europe to Africa and India, Engaging Archaeology is packed with rich, first-hand source material. Unique and thoughtful, Stephen W. Silliman's guide is an essential course book for early-stage researchers, advanced undergraduates, and new graduate students, as well as those teaching and mentoring. It will also be insightful and enjoyable reading for veteran archaeologists.

*Climate Change* Kristen St. John, Lawrence Krissek, 2025-08-22 This open access book on climate change assesses past

climatic change from a geoscience perspective and directly and effectively addresses common misconceptions on climate and climate change. A geoscience perspective on the multiple causes, rates, and consequences of climate change is essential context to assess modern climate change and our role in it, as well as forecasting future climate conditions. Yet, most textbooks on climate change focus only on the very recent past (e.g., last century), are not sufficiently engaging for non-scientists, or explore paleoclimate science at a level too challenging for introductory students. In addition, a wide range of misconceptions and confusion exists in the general public about climate change. Correcting misconceptions is an essential aspect of education, but educational research has shown that it is challenging to achieve. This textbook includes introductions to each thematic Part, that directly identify relevant misconceptions and refute them with clear, concise messages (i.e., learning goals) that are grounded in science and expanded on in the supporting chapters. Such refutation-style approaches have been shown to be effective at addressing misconceptions. The book offers a clear trajectory of fundamental climate science concepts, which are most beneficially combined to provide a valuable geoscience perspective on the causes, rates, and consequences of climate change. It frames the collection of climate science chapters with impactful, relevant social science context: starting the book with a chapter that explores the reasons behind the disconnect between the scientific and public understanding of climate change, and ending the book with a discussion of the intersection of ethics and climate change. Short topical expansions or excursions are included as “boxes” within selected chapters. This book will serve as a basic resource for learning about the lessons that the paleoclimate record offers to evaluate the seriousness of modern and future climate change.

**Encyclopedia of Coastal Science** M. Schwartz, 2006-11-08 Honorable Mention, Award for Excellence in Scholarly and Professional Publishing Maurice Schwartz, Editor of the much acclaimed Encyclopedia of Beaches and Coastal Environments (Hutchinson Ross, 1982) has now brought forth a new volume with a fresh interdisciplinary approach that includes geomorphology, ecology, engineering, technology, oceanography, and human activities as they relate to coasts. Within its covers the Encyclopedia of Coastal Science includes many aspects of the coastal sciences that are only to be found scattered among scientific literature. Being broadly interdisciplinary in its treatment of coasts, the Encyclopedia of Coastal Science features contributions by 245 well known international specialists in their respective fields and is abundantly illustrated with line-drawings and photographs. Not only does this volume offer an extensive number of entries, it also includes various appendices, an illustrated glossary of coastal geomorphology and extensive bibliographic listings. This Encyclopedia thus provides a comprehensive reference work for students, professionals as well as informed lay readers.

*Anthropology* Conrad Phillip Kottak,2004 The new tenth edition of Kottak's best selling text for general anthropology continues to offer a holistic introduction to anthropology that approaches the course from a four-field perspective and a book that is good for students and professors. The new, tenth edition is a major revision offering many new and exciting features that build on the strengths of this approach. The text has two new themes --Bringing It All Together and Understanding Ourselves. The Bringing it All Together theme, emphasizing anthropology's integrated, comparative and four-field nature, can be found in new Bringing it All Together essays that show how anthropology's subfields and dimensions combine to interpret and explain a common topic. The Understanding Ourselves theme, helping to explain the relevance of facts and theories to students, can be found in new Understanding Ourselves paragraphs that answer the question So What? A Brand new and unique atlas and visual guide will be shrink wrapped with every copy of the text for free offering students even more visual material on top of an already outstanding visual arts program in the text. Two new features called Interpreting the World and Atlas and Visual Guide Questions will tie key content in the atlas and visual guide to the text. Two new chapters drawn from an original chapter on cultural and archaeology methods now focus on methods and ethics in all four subfields. This edition will continue to offer revised and updated popular features of previous editions including chapter-opening In the News vignettes (many now from 2002), Interesting Issues boxes, Beyond the Classroom boxes, as well as a wealth of learning tools and support.

*Anthropology* Raymond Scupin,Christopher R. DeCorse,2004 This popular introduction to anthropology integrates a historical, biological, archeological, and global approach with ethnographic data available from around the world. Drawing on both classic and recent research in the field, it reflects the current state-of-the-art understanding of social and cultural changes based on the relationships among different types of societies. It demonstrates the diversity of different societies and

cultural patterns, but also shows how humans everywhere are fundamentally similar. KEY TOPICS An eight-part format covers basic concepts, physical anthropology, archeology, culture and society, prestate societies, state societies, consequences of globalization, and the global future. For individuals interested in social culture and change.
