

Role Of An Educational Leader

Paula G. Cordeiro, William G. Cunningham

Introduction to Educational Leadership Harold W. Boles, 1983-09-22 Originally published by Harper and Row in 1975, this volume is based on the premise that leadership is a process that occurs in a social system and that a person can learn how to engage effectively in that process. It explores four major content areas, 1) the social milieu in which educational leadership occurs, 2) the role that an educational leader is expected to play, 3) the nature of the person who is an effective leader, and 4) the occupation of educational leadership.

Marketing Your Educational Leadership Skills John C. Daresh, Don Schulte, 2011-09-22 In recent years, research that has identified instructional leadership as a key ingredient in effective schools has meant that attention has been directed increasingly at the ways in which future school administrators are being prepared. As a consequence, many universities have worked to develop administrator preparation programs that will enable individuals to face the challenges that await them when they step into the world of the principalship or some other administrative role. Despite these efforts, however, a final ingredient has been missing from the majority of preservice programs. *Marketing Your Educational Leadership Skills* focuses on how to help people find the job for which they have been prepared. This book provides practical suggestions for finding a first job as a school administrator or for advancing current administrative careers by seeking a new position and introduces a model for administrators to market their potential, skills, and abilities as an educational leader.

Navigating the Ubiquitous, Misunderstood, and Evolving Role of the Educational Leadership Program Coordinator in Higher Education Noelle A. Paufler, Ellen H. Reames, 2023-11-01 *Navigating the Ubiquitous, Misunderstood, and Evolving Role of the Educational Leadership Program Coordinator in Higher Education* is an edited volume of chapters focused on the role of the program coordinator (PC) in educational leadership. The book is a recent addition to the book series: *Dimensions of Leadership and Institutional Success: Exploring Connections and Partnerships*, edited by Ellen H. Reames. Noelle A. Paufler and Ellen H. Reames (editors) created this book to examine various aspects of the PC role because it has been largely ignored in the educational leadership preparation literature. The book examines various aspects of the PC role to include responsibilities, navigating the politics and policies of higher education and educational agencies, internal and external problems and barriers related to the role, and recommendations and possibilities for enhancing the PC role. The book is divided into 3 sections: Section 1 centers on the roles of the PC and also includes a

model that can be used to structure PC responsibilities within programs. Section 2 focuses the readers' attention to present misunderstanding of the PC as a quasiadministrative role which appears to be gaining in clarity through present research. Section 3 gives a glimpse to future trends which includes the growing use of clinical faculty as PCs. The primary audience is higher education faculty and administrators. The term program coordinator spans across all disciplines and is used in most higher education institutions across the United States. Higher education institutions are also interested in sustaining partnerships within the university and the communities beyond. This book can assist with nuances of partnership development for any higher education field of study. The audience also includes faculty in higher educational leadership program development and school/university partnership development and enhancement across public and private enterprises who are educating future leaders. Other interested groups are university and school-based professionals who are seeking to improve relationships, partnerships, and collaborations between educational leadership preparation programs and K-12 districts and related agencies. The book would also be of value to those who conduct research in the areas of partnership creation and implementation and to those who conduct research which improves educational leadership preparation and development. The role of the PC in educational leadership is critical to the success of higher education leadership preparation programs and is often very different than PCs in other higher education disciplines.

Such a long term view offers a new and needed long term perspective on school leadership and enables the authors to show how trends in leaders' careers, thinking and practice have emerged and unfolded. Researchers and practitioners alike will find something of value in this book' - Professor Geoff Southworth, Director of Research, National College for School Leadership '[A]n excellent, well-written, extensively referenced, empirically based contribution to school leadership thinking... Ethics in Educational Leadership Programs Lynn G. Beck, Joseph Murphy, 1994-12-12 In *Ethics in Educational Leadership Programs*, Lynn Beck and Joseph Murphy examine the educational administration programs of 42 universities regarding their policies on ethical concerns for administrators. The authors open with a discussion of the different philosophies of moral leadership, followed by a historical overview of research and of the ebb and flow of past interest in ethics in administration. Beck and Murphy then select 13 of the 42 universities and present an in-depth evaluation of their survey findings, describing and comparing the goals and objectives, themes, activities, and philosophies of the courses taught. *Ethics in Educational Leadership Programs* is a unique book that argues resolutely for inquiry and for the acceptance of scientific approaches to the study of ethical issues in educational administration.

The Role of Leaders in Educational Decision-Making Nancy H. Matthews, 2023-07-21 This book presents insights into the experiences and perspectives of educators in formal positions of leadership involved in decision-making processes in an education system. Drawing on qualitative research conducted in the New Brunswick education system, the author identifies factors in the decision-making process which influence whether or not a decision is implemented. Probing what is required for effective decision-making, defined as decision-making that results in implementation, the book examines not only the role of formal educational leaders of schools (administrators) but also the roles played by district and department of education formal leaders. It uses five central themes that surfaced from research to develop a novel leadership model for ensuring

implantation of decisions. These include knowledge and skill; collaboration and communication; balance of autonomy, accountability, and direction; political and bureaucratic considerations; and strong moral imperative. The newfound model is presented in the form of antecedent steps to the decision-making process. Extending the literature by offering new, empirically grounded insights for influencing the likelihood of implementation following a decision-making process, it will appeal to leaders, scholars, and students of educational leadership and reform.

The Power of Teacher Leaders Nathan Bond, 2022-03-07 Now in its second edition, *The Power of Teacher Leaders*, copublished by Routledge and Kappa Delta Pi, serves as a resource for understanding the varied ways that teacher leaders foster positive change in their schools, profession, and communities. By definition, teacher leaders are teachers who stay in the classroom, maintaining their commitment to teaching students while assuming informal and formal leadership positions beyond the classroom. It is that commitment to teaching and their desire to improve student learning that motivate them to become teacher leaders. Written by researchers and teacher leaders, each chapter describes a particular way that teachers are leading, connects to the relevant scholarly literature, and assesses the impact of the teacher leaders on students and communities. The second edition features new chapters on less common and unresearched teacher leadership roles, informal teacher leadership, and teacher leaders as social justice advocates. This edited collection shows how teacher leaders play an important role in the improvement of student learning, teacher professional development, and school and community climate.
