Columbia Accident Investigation Board Report United States. Columbia Accident Investigation Board,2003 Vols. 2-6 of the CAIB's Final Report contain appendices that provide the supporting documentation for the main text of the Final Report contained in Vol. 1, which was released on Aug. 26, 2003. These appendix materials were working documents. They contain a number of conclusions and proposed recommendations, several of which were adopted by the CAIB in Vol. 1. The other conclusions and proposed recommendations drawn in Vols. 2-6 do not necessarily reflect the views of the CAIB but are included for the record. When there is conflict, Vol. 1 takes precedence. It alone is the CAIB's official statement.

The Judaism of Jesus J. Christopher Garrison, 2014-04-17 We had hoped it was he [the Messiah] who would redeem Israel (Luke 24:21) In this book, you will learn that the religion Jesus founded was not Gentile or called Christianity. The name Christianity is not found in the New Testament work authored by Jews who followed Jesus; that the religion of Jesus was a form of Judaism that revolved around the Hebrew concept of Brit Hadashah, meaning New Covenant. This concept first appeared in the writings of Jeremiah, one of the great prophets of Judaism; that to achieve the full task Jews have expected of their Messiah of redeeming Israel and completing Gentile world salvation there have been three separate stages in the work of Jesus the Messiah: (1) the Atonement & Resurrection stage; (2) the Gentile stage (represented by two thousand years of Gentile Christianity); and (3) the Jewish (or Jewish redemption) stage; that with regard to the Messiahs prophecy on Jerusalem and on the completion (or fulfillment) of his Gentile stages see Luke 21:24: Jerusalem will be trampled on by the Gentiles until the times of the Gentiles are fulfilled on June 7, 1967 (the day Jerusalem fell to Jews), the Messiahs prophecy was fulfilled. Hence, with June 7, 1967 formally marking the end of the Messiahs Gentile (or Christian) stage, the Messiahs final (or Jewish) stage has already begun; that with the times of the Gentiles (or Christianity) over, why Christians must adjust and reorient themselves to the new Jewish era and reality that is rising; many other topics of vital relevance to our present transitional era from Gentile-Christian to Jewish-centered times where world history is quickly reaching a tumultuous climax...centered on the Jews, Jesus the Messiah and the Messiahs New Covenant Judaism as the winning side of end-time history.

The First Stones William Britnell, Alasdair Whittle, 2022-12-01 The First Stones brings together the results of recent research on the Neolithic long cairns lying in the shadow of the Black Mountains in south-east Wales, focusing upon Penywyrld and Gwernvale, the two best known tombs within the group, previously excavated in the 1970s. Important results lie in both new site detail and reassessment of the wider context. Small-scale excavation, geophysical survey and geological assessment at Penywyrld - the largest of the Welsh long cairns - gave further information about the distinctive external and internal architecture of the monument. In turn, this opened the opportunity to reassess the pre-monument sequence at Gwernvale, with re-examination of both Mesolithic and Neolithic occupations, including a timber structure and midden, lithic and pottery assemblages, and cereal remains. The frame for wider reassessment is given by fresh chronological modeling

both of the monuments themselves, suggesting a sequence from Penywyrld and Pipton to Ty Isaf and Gwernvale, probably spanning the 38th to the 36th or 35th centuries cal BC, and of early Neolithic activity in south Wales and the Marches, probably beginning in the 39th century cal BC. A detailed study of the major assemblages of human remains from the Black Mountains tombs includes evidence for diet, trauma and lifestyles of the populations represented. Recent isotope analysis of human remains from the tombs is also reviewed, implying social mobility and migration within local populations during the early Neolithic. The First Stones makes a significant contribution to the study of tomb building, treatment of the dead, place making, the relationship of monuments to landscape, local and regional identities, connections and affiliations across southern Britain and the adjacent continent, and Neolithization in western Britain. Viewed within the context of tombs within the Cotswold-Severn tradition as a whole, it leads to an appreciation of the local and regional distinctiveness of architecture and mortuary practice exhibited by the tombs in this area of south-east Wales, emerging as part of the intake of a significant inland area in the early centuries of the Neolithic.

Left-of-Centre Parties and Trade Unions in the Twenty-First Century Elin Haugsgjerd Allern, Tim Bale, 2017-02-15 Both parties and interest groups matter to democracy. Historically, examples of close relationships between the two abound. But perhaps the best known because it was supposedly the most intimate and politically important is the relationship between left-of-centre parties and trade unions. Whether rooted in a shared history, culture and ideology or more a 'marriage of convenience', it is widely believed that their relationship helped socialist, social democratic, and labour parties win power and ensured the working class achieved huge gains in terms of full employment, the welfare state and labour market regulation in the post war period. In recent decades, however, it has been widely argued that the links between left-of-centre parties and trade unions have declined as their collaboration has become less mutually beneficial, not least as a consequence of structural changes in the economy and labour market. This volume interrogates, qualifies, and even challenges that widespread assumption. Based on a brand new dataset, including organizational data gathered by a cross-national team of experts, it uncovers and explores what turns out to be considerable variation in the strength of contemporary organizational links between left-of-centre parties and unions in twelve different countries that have been democracies since at least the mid -to late-1940's. Testing a series of hypotheses on the importance and the impact of particular political systems and socio-economic factors, and on the costs and benefits for both parties and unions, detailed qualitative and quantitative analysis suggests that left-of-centre party-trade union links are stronger where trade unions are larger, denser, and more unified and where parties are less able to rely on the state to finance their organizational activities and electoral campaigns. Traditional partners that still have fairly strong links with each other seem to have greater incentives than others to maintain those links. Moreover, it remains the case that the links between parties and unions matter in policy terms.
