Man-Machine-Environment System Engineering Shengzhao Long, Balbir S. Dhillon, 2022-08-20 Man-Machine-Environment System Engineering: Proceedings of the 22nd Conference on MMESE are an academic showcase of the best papers selected from more than 500 submissions, introducing readers to the top research topics and the latest developmental trends in the theory and application of MMESE. This proceedings are interdisciplinary studies on the concepts and methods of physiology, psychology, system engineering, computer science, environment science, management, education, and other related disciplines. Researchers and professionals who study an interdisciplinary subject crossing above disciplines or researchers on MMESE subject will be mainly benefited from this proceedings MMESE primarily focuses on the relationship between Man, Machine and Environment, studying the optimum combination of man-machine-environment systems. In this system, "Man" refers to working people as the subject in the workplace (e.g. operators, decision-makers); "Machine" is the general name for any object controlled by Man (including tools, machinery, computers, systems and technologies), and "Environment" describes the specific working conditions under which Man and Machine interact (e.g. temperature, noise, vibration, hazardous gases etc.). The three goals of optimization of the man-machine-environment systems are to ensure safety, efficiency and economy. The integrated and advanced science research topic Man-Machine-Environment System Engineering (MMESE) was first established in China by Professor Shengzhao Long in 1981, with direct support from one of the greatest modern Chinese scientists, Xuesen Qian. In a letter to Shengzhao Long from October 22nd, 1993, Xuesen Qian wrote: "You have created a very important modern science and technology in China!"

Gardens on Mars! - Teacher's Guide Tony Cianchetta,2019-07-22 This book is designed to be a guide for teachers and their students to use during a Science, Technology and Engineering course. It is designed to be followed page-by-page, and it will take you through a series of problem statements, case studies, discussions, exercises and eventually, a project solution. You will cover agriculture and agriculture science, math, science theories and hands-on experiments, various applied technologies, practical engineering and business communication, and businesslike behavior. Case studies and exercises are included throughout to drive home the lessons being outlined in the text. My hope is that schools with school gardens will use this as a vehicle to bring the garden into the school, and STEM out into the garden. I also hope it is a fun learning activity where students (and teachers) eagerly participate. Whichever way you use the material that follows, I hope you and your students enjoy the journey. You never know where it might take you.
