Teaching and Learning English in Japanese Classrooms Darren Elliott, 2023-05-19 This book shows how English language instructors in Japan explored the questions and issues which most closely affected them and their students in the language learning process. Each of the teacher-researchers had a puzzle. After reviewing existing literature, each writer found a way to adjust their practice, and in these chapters, they report on the results. Topics include educational technology, learner autonomy, feedback, and novel approaches to listening, reading and writing instruction. Although the contributors are working in Japan, classroom practitioners from the wider international language teaching community can benefit from the practical teaching approaches and accessible descriptions of practitioner research to be found in this book. A secondary audience of educational managers and teacher trainers will also find value in chapters which outline the ways in which an environment conducive to practitioner research can be facilitated.

Technology and Language Learning Eric Friginal, Wing Yee Jenifer Ho, 2025-12-22 Technology and Language Learning: Effective Podcasting and Video-Based Language Teaching Practices in the Age of Generative AI provides English language teachers with a practical guide to integrating podcasting, video-based materials, and Generative AI (GenAI) technologies into their classrooms. Focused on ESL/EFL and ELT, the book demonstrates how these tools enhance engagement, accessibility, and autonomy while fostering skills like listening comprehension, vocabulary development, and creative language use. Teachers will find strategies for using podcasts in flipped classrooms, designing authentic video activities, and guiding students in creating multimodal content. The book highlights GenAI tools like ElevenLabs, Canva, and Synthesia for generating adaptive, accessible materials tailored to diverse learners. Addressing challenges and opportunities, it emphasizes balancing AI-generated content with authentic language practice. Real-world examples and case studies illustrate practical applications in culturally sensitive and inclusive ways. Whether in traditional, hybrid, or online settings, it offers actionable guidance for leveraging digital tools as transformative components of modern pedagogy, preparing students to thrive in a GenAI-driven, globally connected world. By bridging research and practice, this textbook empowers teachers and practitioners to reimagine classrooms as dynamic spaces where technology supports creativity, collaboration, and critical thinking.

The Impact of the 4th Industrial Revolution on Engineering Education Michael E. Auer, Hanno Hortsch, Panarit Sethakul, 2020-03-17 This book gathers papers presented at the 22nd International Conference on Interactive Collaborative Learning (ICL2019), which was held in Bangkok, Thailand, from 25 to 27 September 2019. Covering various fields of interactive and collaborative learning, new learning models and applications, research in engineering pedagogy and project-based learning, the contributions focus on innovative ways in which higher education can respond to the real-world

challenges related to the current transformation in the development of education. Since it was established, in 1998, the ICL conference has been devoted to new approaches in learning with a focus on collaborative learning. Today, it is a forum for sharing trends and research findings as well as presenting practical experiences in learning and engineering pedagogy. The book appeals to policymakers, academics, educators, researchers in pedagogy and learning theory, school teachers, and other professionals in the learning industry, and further and continuing education.
