Advanced Studies in Efficient Environmental Design and City Planning Ferdinando Trapani, Nabil Mohareb, Federica Rosso, Denia Kolokotsa, Sreetheran Maruthaveeran, Mahmoud Ghoneem, 2021-09-24 This book explains how learning from past mistakes in urban design can help to enhance sustainable cities and how the principles of Green Urbanism can yield more resilient urban settlements. Environmental design is a fundamental principle in shaping cities. However, environmental challenges like increased resource consumption, water degradation and waste-related issues are among the greatest problems now facing humanity – which is why these issues need to be considered with regard to “smart cities,” either for the development of new urban centers or for the transformation of existing cities. The book not only discusses the importance of integrating sustainability principles in the urban design process, but also demonstrates their application to the development of sustainable cities. As such, the book offers essential information and a source of inspiration for all those who want to build more sustainable cities.

*Low Energy Architecture and Low Carbon Cities* Francesco Pomponi, Bernardino D’Amico, 2020-12-04 The built environment is at a turning point. With projected trends in population growth and urbanization, global demand for new floor area is expected to rise sharply. This will put unprecedented pressure on the availability of natural resources and incur greenhouse gas emissions and energy demand. Such environmental stressors risk driving the world away from the UN Sustainable Development Goals, but equally represent an opportunity for just sustainability transitions. The contents of this book aim to address some of these grand challenges from a multi-disciplinary perspective. Low-energy architecture, low-carbon cities and the often-forgotten sustainability of refugee settlements are some of the themes dealt with by the authors.

**Building Equity Through Smarter, More Resilient Cities of the Future. Celebrating International Women’s Day** Inés Sánchez De Madariaga, Inés Novella Abril, 2025-11-28 The International Women's Day takes place on the 8th March, celebrating the achievements of women throughout history. Equally as important, this is a date to raise awareness for

the inequalities that women across the globe still face on a daily basis. The UN theme for IWD in 2023 is #EmbraceEquity. It is in this spirit that Frontiers in Sustainable Cities is launching a new article collection to coincide with this UN day. This occasion offers an opportunity to acknowledge that historically, cities have not been designed with women in mind, creating not only unsafe areas, but also making it harder for female bodies to physically pass through a cities that was built for able bodied, full grown men. This then opens up the floor to discuss and consider the importance of using female perspectives and experiences to build smarter, resilient cities of the future.

Código técnico de la edificación España,España. Ministerio de la Vivienda,2013 El Código Técnico de la Edificación (CTE), que regula la construcción de todos los edificios nuevos y la rehabilitación de los existentes, tanto los destinados a viviendas como los de uso comercial, docente, sanitario, deportivo, industrial o sociocultural, introduce elementos novedosos sobre materiales y técnicas de construcción para lograr edificios más seguros y eficientes desde el punto de vista energético, y establece los requisitos para ello. Posteriormente se promulgó el Real Decreto 1.371/2007, de 19 de octubre, por el que se aprueba el documento básico DB-HR Protección frente al ruido y se modifica el CTE. Se incluye, dentro de éste, dicho documento básico DB-HR y se incorporan, a lo largo de las páginas, los 300 cambios introducidos por el mencionado Real Decreto. Poco después, en enero de 2008, el Boletín Oficial del Estado publicó una extensísima corrección de errores del propio CTE. A continuación, la Orden VIV/984/2009, de 15 de abril, introdujo centenares de cambios en el CTE, que asimismo figuran incluidos en el texto de éste. El Real Decreto 173/2010, de 19 de febrero, modificó nuevamente el CTE en materia de accesibilidad y no discriminación de las personas con discapacidad, sustituyendo el documento básico DB-SU Seguridad por el DB-SUA Seguridad y accesibilidad. Finalmente, se ha tenido en cuenta la Sentencia del Tribunal Supremo de 4 de mayo de 2010, que ha declarado la nulidad de algunos textos del CTE. Además de mucha otra normativa, se incluyen también el Procedimiento básico para la certificación de eficiencia energética de edificios de nueva construcción, y el Reglamento de Instalaciones Térmicas en los Edificios. Los índices sumario y sistemático, así como los dos extensos índices analíticos de materias referidos a los textos legales y al CTE facilitan la consulta del contenido de esta nueva edición.
