IHS Janes All the Worlds Aircraft: In Service provides detailed insights into civil and military air platforms currently in service and out of full production around the world, enabling A&D businesses to identify revenue opportunities through maintenance, retrofit and upgrade programs, and supporting military and security organizations by delivering reliable open-source intelligence on existing global offensive and defensive airborne capabilities.

**Iran's Military Forces and Warfighting Capabilities** Anthony H. Cordesman,Martin Kleiber,2007-09-30 Nations around the world are uncertain and anxious about Iran's intentions in the Middle East and the wider global arena. Its current president, Mahmoud Ahmadinejad, has made no secret of his opposition to Western society, particularly Israel, and his desire to acquire nuclear weapons. However, as Anthony H. Cordesman and Martin Kleiber point out, Ahmadinejad does not necessarily speak for the Iranian clerical regime, who operate in a cloud of secrecy and also directly control Iran's military. Given the ambiguous nature of Iran's global objectives, this new study focuses on the tangible aspects of Iran's military forces and takes an objective look at the realistic threats that Iran poses to the region and the world. The authors systematically assess each aspect of Iranian military forces from their conventional armies to their asymmetric threat via

proxy wars in the region. Much attention in national security debates is paid to Iran's intentions without first understanding its capabilities. Lacking such a fundamental understanding, much of this speculation tends to be wasted and irrelevant to what could actually happen in the event of a conflict. Cordesman and Kleiber's study provides, in meticulous detail, a basis for understanding the realistic threat that Iran poses to the Northern Gulf.

A New Direction for China's Defense Industry Evan S. Medeiros, Roger Cliff, Keith Crane, James C. Mulvenon, 2005-12-19  
Since the early 1980s, a prominent and consistent conclusion drawn from research on China's defense-industrial complex has been that China's defense-production capabilities are rife with weaknesses and limitations. This study argues for an alternative approach: From the vantage point of 2005, it is time to shift the focus of current research to the gradual improvements in and the future potential of China's defense-industrial complex. The study found that China's defense sectors are designing and producing a wide range of increasingly advanced weapons that, in the short term, are relevant to a possible conflict over Taiwan but also to China's long-term military presence in Asia. Part of a larger RAND Project AIR FORCE study on Chinese military modernization, this study examines the current and future capabilities of China's defense industry. The goals of this study are to 1.
