Bach Against Modernity Michael Marissen, 2023 In *Bach against Modernity*, author Michael Marissen contests the common perception that J.S. Bach is a modern figure and instead suggests that, by eighteenth-century standards, Bach and his music in fact reflected and forcefully promoted a premodern world and life view. He provides overlooked or misunderstood evidence of Bach's private engagement with religious and social issues that the composer also addressed in his public vocal compositions, and exposes intellectual and ethical problems with prevalent anachronistic views of Bach.

[A Delicate Choreography](#) David Sabeau, 2023-10-24 The origins of the incest taboo have puzzled many of the most influential minds of the West, from Plutarch to St. Augustine, St. Thomas Aquinas, Martin Luther, David Hume, Lewis Henry Morgan, Sigmund Freud, Emile Durkheim, Edward Westermarck, and Claude Lévi-Strauss. This book puts the discussion of incest on a new foundation. It is the first attempt to thoroughly examine the rich literature, from philosophical, theological, and legal treatises to psychological and biological-genetic studies, to a wide variety of popular cultural media over a long period of time. The book offers a detailed examination of discursive and figurative representations of incest during five selected periods, from 1600 to the present. The incest discussion for each period is complemented with a presentation of dominant kinship structures and changes, without arguing for causal relations. Part I deals with the legacy of ecclesiastical marriage prohibitions of the Middle Ages: Historians dealing with the Reformation have wondered about the political and social implications of theological debates about the incest rules, the Enlightenment opted for sociological considerations of the household and a new anthropology based on the passions, Baroque discourse focused upon sexual relations among kin by marriage, while Enlightenment and Romantic discussions worried the intimacy of siblings. The first section of Part II deals with the six decades around 1900, during which European and American cultures obsessed about the sexuality of women. Almost everyone concurred in the idea that mother made the family what it was; that she configured the household, kept the lines of kinship vibrant, and stood at the threshold as stern gatekeeper, and many thought that she managed these tasks through her sexuality and an eroticized relationship with sons. Another story line, taken up in the section *Intermezzo*, this one about the physical and mental consequences of inbreeding, appeared after 1850. To what extent do close-kin marriages pose risks for progeny? At its center, lay the incest problematic, now restated: Is avoidance of kin genetically programmed?

Do all cultures know about risks of consanguinity? As for the twenty-first century, evolutionary and genetic assumptions are challenged by a living world population containing roughly one billion offspring of cousin marriages. Part III deals with one of the perhaps most remarkable reconfigurations of Western kinship in the aftermath of World War I: The shift from an endogamous to an exogamous alliance system centered on the nuclear family. An historical anomaly, this family form began to dissolve almost as soon as it came together and, in the process, shifted the focus of incest concerns to a new pairing: father and daughter. By the 1970s, when the father/daughter problematic swept all other considerations of incest aside, that relationship had come to be modeled, for the most part, around power and its abusive potential. As for incest, its representations in the last three decades of the twentieth century no longer focused on biologically damaged progeny but rather on power abuses in the nuclear family: sexual abuse. By the mid-1990s, Western culture at least partly redirected its gaze away from father and daughter towards siblings, especially towards brothers and sisters and the sexual boundaries and erotics of their relationships. Correspondingly, siblings became a model organism for psychotherapy, evolutionary biology, and the science of genetics.

Moses among the Moderns, 2024-04-30 A historic lawgiver and founder of an ancient nation, Moses was powerful and pivotal in the imagination of modern Germany. The late eighteenth to early twentieth century was an intense period of religious controversy, especially on 'the Jewish question', with new models for understanding faith, science, and the past. This volume focuses on the identification of Jewish law, both Pentateuch and Talmud, with the figure of Moses to trace the fascinations and anxieties of the Bible in modern culture. Through diverse perspectives, it examines the representations and appropriations of Moses as a father of Judaism and framer of European civilization.

Law Beyond Israel Holger M. Zellentin, 2022 The Hebrew Bible formulates two sets of law: one for Israelites and one for gentiles living in the Holy Land. Law Beyond Israel argues that the laws for non-Israelites form the historical basis of qur'anic law, pointing to legal continuity from the Hebrew Bible to the New Testament and from late antique Christianity to nascent Islam.

John Selden on Jewish Marriage Law Ziskind, 2023-11-27 This book contains a lengthy introduction, translation and commentary on John Selden's *Uxor Hebraica*. Selden was a seventeenth century Christian talmudist, classicist, legal historian and member of the British parliament who wrote extensively on a wide variety of subjects including seven books, all in Latin, of various aspects of Jewish Law. *Uxor Hebraica* is an exhaustive treatment of Jewish marriage law. Among the subjects treated are incest (including a unique discussion of the Karaite rules), levirate, the marriage contract and ceremonies and divorce. Selden extensively used the Hebrew Bible, its ancient and later translations, the Talmud, and especially Maimonides' *Mishneh Torah*. He widened his discussion by including comparative material from the New Testament, church fathers,

Greece and Rome, Islam, plus usages from Ethiopia, Russia, Byzantium and medieval Europe. Although written without polemic, the work is clearly related to the religious controversies of the day.

Unlocking the Medinan Qur'an Nicolai Sinai, 2022-02-28 The Qur'anic surahs and passages that are customarily taken to postdate Muhammad's emigration to Medina occupy a key position in the formative period of Islam: they fundamentally shaped later convictions about Muhammad's paradigmatic authority and universal missionary remit; they constitute an important basis for Islam's development into a religion with a strong legal focus; and they demarcate the Qur'anic community from Judaism and Christianity. The volume exemplifies a rich array of approaches to the challenges posed by this part of the Qur'an, including its distinctive literary and doctrinal features, its relationship to other late antique traditions, and the question of oral composition. Contributors are Karen Bauer, Saqib Hussain, Marianna Klar, Joseph E. Lowry, Angelika Neuwirth, Andrew J. O'Connor, Cecilia Palombo, Nora K. Schmid, Nicolai Sinai, Devin J. Stewart, Gabriel S. Reynolds, Neal Robinson and Holger Zellentin.

Reformed Ethics : Volume 3 (Reformed Ethics) Herman Bavinck, 2025-04-29 Herman Bavinck's four-volume *Reformed Dogmatics* is one of the most important theological works of the twentieth century. The English translation was edited by world-class Bavinck scholar John Bolt, who now brings forth a manuscript from Bavinck that is being published for the first time. Serving as a companion to *Reformed Dogmatics*, *Reformed Ethics* offers readers Bavinck's mature reflections on ethical issues. Volumes 1 and 2 have already been published. Volume 1 mines the moral teachings of the early church and medieval and Puritan spirituality while addressing a variety of topics. Volume 2 covers the duties of the Christian life and includes Bavinck's exposition of the Ten Commandments. This third volume addresses family, marriage, and divorce.
