Of Human Nature and Good Habits Prabhakar Karan, 2019-03-09 In the human body, there's always exists—a human inside! The book, *Of Human Nature and Good Habits*, reveals that human inside and promotes good personal habits and social skills. This book along with its four companion books—*Nature Is My Teacher*; *Life, Living and Lifestyle*; *How to Win Nature and Enjoy Good Life and Health and Medical Care*—constitutes a series that tells the nature-human connection and its implication in our daily life, in the related set of separate episodes. *Of Human Nature and Good Habits* primarily deals with our everyday experiences of good life and living. The book contains chapters: Human Nature (By nature, all humans are alike, but practice sets them apart.); Nature vs. Nurture (One-third born (nature) and two-thirds made (nurture)! It is a huge statement.); Personality (Don't let others evaluate you. Do not imitate others; do not impersonate others.); Patience and Confidence (Our ability grows or shrinks in proportion with our courage.); Discipline and Good Habits (Children are raw and wild by nature. They need to be disciplined.); Courage, Attitude, and Ambition (Do what you think is best; otherwise, you will do what others think is best.); Aim in Life (Everyone plans to succeed; no one plans to fail. But failure happens. Failure is one essential part of success; but the fear of failure is the killer of success.); Mind and Mental Habits (Genius and genuinely creative people have two things in abundance: curiosity and drive.); Mind and Body (Human brain—weighing about 3 pounds, accounting 2% of the body's weight—is a biological machine that consumes 20% of the body's energy production.); Mind and Memory (Speaking multiple languages may help protect cognitive health over the long term, and may delay Alzheimer's disease.); Power of Meditation (It is not figuring out what is wrong with you and trying to fix it; rather, it is identifying what is right with you and doing more of it.); Greed, Envy, and Jealousy (During the evolutionary process, individuals with strong innate yearnings for food, sex, and material gain, have a better chance of surviving and reproducing than other individuals with less yearning.); Humor and Laughter (Laughter is one universal emotion!); Talk and Sing (Talk is the publication of thoughts! It is the momentum of our mind! Music is a special announcement how one's feel of feelings is expressed in the form of sound.); Nature and Natural Habits (Man invents a mousetrap, but nature plays a better mouse.); Be Wise (Be aware of data aggression. Overloaded memory can extinguish our natural spirit. Don't ingest anything that you can't digest.); Be Happy (Count carefully what makes you worthwhile and happy, and discount wisely what makes you worthless and unhappy.); Be Honest, Simple, and Natural (Honesty is the state of mind; dishonesty is not. Therefore, it's wise to encourage

honesty rather than discourage dishonesty.)

The Gift of the Gab David Crystal, 2016-05-17 We all know eloquence when we hear it. But what exactly is it? And how

might we gain more of it for ourselves? This entertaining and, yes, eloquent book illuminates the power of language from a linguistic point of view and provides fascinating insights into the way we use words. David Crystal, a world-renowned expert on the history and usage of the English language, probes the intricate workings of eloquence. His lively analysis encompasses everyday situations (wedding speeches, business presentations, storytelling) as well as the oratory of great public gatherings. Crystal focuses on the here and now of eloquent speaking—from pitch, pace, and prosody to jokes, appropriateness, and how to wield a microphone. He explains what is going on moment by moment and examines each facet of eloquence. He also investigates topics such as the way current technologies help or hinder our verbal powers, the psychological effects of verbal excellence, and why certain places or peoples are thought to be more eloquent than others. In the core analysis of the book, Crystal offers an extended and close dissection of Barack Obama's electrifying "Yes we can" speech of 2008, in which the president demonstrated full mastery of virtually every element of eloquence—from the simple use of parallelism and an awareness of what not to say, to his brilliant conclusion constructed around two powerful words: dreams and answers.
