Microeconomics for Managers, 2nd Edition David M. Kreps, 2019-01-29 A thoroughly revised new edition of a leading textbook that equips MBA students with the powerful tools of economics This is a thoroughly revised and substantially streamlined new edition of a leading textbook that shows MBA students how understanding economics can help them make smarter and better-informed real-world management decisions. David Kreps, one of the world's most influential economists, has developed and refined Microeconomics for Managers over decades of teaching at Stanford's Graduate School of Business. Stressing game theory and strategic thinking and driven by in-depth, integrated case studies, the book shows future managers how economics can provide practical answers to critical business problems. Focuses on case studies and real companies, such as Amazon, Microsoft, General Motors, United Airlines, and Xerox Covers essential topics for future managers—including price discrimination, Porter's five forces, risk sharing and spreading, signaling and screening, credibility and reputation, and economics and organizational behavior Features an online supplement (available at micro4managers.stanford.edu) for students that provides solutions to the problems in the book, longer caselike exercises, review problems, a calculus review, and more

The Act of Musical Composition Dave Collins, 2016-04-01 The study of musical composition has been marked by a didactic, technique-based approach, focusing on the understanding of musical language and grammar -harmony,

counterpoint, orchestration and arrangement - or on generic and stylistic categories. In the field of the psychology of music, the study of musical composition, even in the twenty-first century, remains a poor cousin to the literature which relates to musical perception, music performance, musical preferences, musical memory and so on. Our understanding of the compositional process has, in the main, been informed by anecdotal after-the-event accounts or post hoc analyses of composition. The Act of Musical Composition: Studies in the Creative Process presents the first coherent exploration around this unique aspect of human creative activity. The central threads, or key themes - compositional process, creative thinking and problem-solving - are integrated by the combination of theoretical understandings of creativity with innovative empirical work.

Playing with Scripture Andrew Judd, 2024-01-22 This book puts a creative new reading of Hans-Georg Gadamer's philosophical hermeneutics and literary genre theory to work on the problem of Scripture. Reading texts as Scripture brings two hermeneutical assumptions into tension: that the text will continually say something new and relevant to the present situation, and that the text has stability and authority over readers. Given how contested the Bible's meaning is, how is it possible to 'read Scripture' as authoritative and relevant? Rather than anchor meaning in author, text or reader, Gadamer's phenomenological model of hermeneutical experience as Spiel ('play') offers a dynamic, intersubjective account of how understanding happens, avoiding the dead end of the subjective-objective dichotomy. Modern genre theory addresses some of the criticisms of Gadamer, accounting for the different roles played by readers in different genres using the new term Lesespiel ('reading game'). This is tested in three case studies of contested texts: the recontextualization of psalms in the book of Acts, the use of Hagar's story (Genesis 16) in nineteenth-century debates over slavery and the troubling reception history of the rape and murder in Gibeah (Judges 19). In each study, the application of ancient text to contemporary situation is neither arbitrary, nor slavishly bound to tradition, but playful.

States and Non-Participatory Memberships in the WTO Felicia A. Grey, 2019-02-25 This book examines non-participatory memberships or why states choose not to use the benefits of international institutions to which they belong. To investigate this question, the author explores why states choose not to litigate within the World Trade Organization's Dispute Settlement Body (DSB). The research contributes to the literature on global governance and institutions generally, and of the WTO specifically. Additionally, the project includes comparative case analysis of WTO agreements and international disputes: China and Jamaica; Guatemala and Mexico; the United States and Mexico. This volume will interest policy makers, trade professionals, academics, and everyone who is interested in development studies.

International Negotiation Ho-Won Jeong, 2016-04-07 Negotiation has always been an important alternative to the use of force in managing international disputes. This textbook provides students with the insight and knowledge needed to evaluate how negotiation can produce effective conflict settlement, political change and international policy making. Students are guided through the processes by which actors make decisions, communicate, develop bargaining strategies and explore compatibilities between different positions, while attempting to maximize their own interests. In examining the basic ingredients of negotiation, the book draws together major strands of negotiation theories and illustrates their relevance to particular negotiation contexts. Examples of well-known international conflicts and illustrations of everyday situations lead students to understand how theory is utilized to resolve real-world problems, and how negotiation is applied to diverse world events. The textbook is accompanied by a rich suite of online resources, including lecture notes, case studies, discussion questions and suggestions for further reading.
