Born Liberal, Raised Right Reb Bradley, 2008 America has a problem. Conservatives aren't helping their kids mature past that arrested development phase also known as liberalism! In this groundbreaking book, noted speaker Reb Bradley proves that societal pressures and foolish child-raising theories that have gone mainstream are preventing parents from developing in their kids the key ingredients of maturity, including self-control. Too many children are becoming adults who are ruled purely by magical thinking, passions, emotions and desires -- the hallmarks of the liberal mindset. It's up to parents to turn their baby Bolsheviks into good citizens by helping their kids mature past their infantile liberal stage. Reb Bradley shows how.

Wildland Fire in Ecosystems ,2008 This state-of-knowledge review of information on relationships between wildland fire and nonnative invasive plants can assist fire managers and other land managers concerned with prevention, detection, and eradication or control of nonnative invasive plants. The 16 chapters in this volume synthesize ecological and botanical principles regarding relationships between wildland fire and nonnative invasive plants, identify the nonnative invasive species currently of greatest concern in major bioregions of the United States, and describe emerging fire-invasive issues in each bioregion and throughout the nation. This volume can help increase understanding of plant invasions and fire and can be used in fire management and ecosystem-based management planning. The volume's first part summarizes fundamental

concepts regarding fire effects on invasions by nonnative plants, effects of plant invasions on fuels and fire regimes, and use of fire to control plant invasions. The second part identifies the nonnative invasive species of greatest concern and synthesizes information on the three topics covered in part one for nonnative invasives in seven major bioregions of the United States: Northeast, Southeast, Central, Interior West, Southwest Coastal, Northwest Coastal (including Alaska), and Hawaiian Islands. The third part analyzes knowledge gaps regarding fire and nonnative invasive plants, synthesizes information on management questions (nonfire fuel treatments, postfire rehabilitation, and postfire monitoring), summarizes key concepts described throughout the volume, and discusses urgent management issues and research questions.
