**Discourse and Transformation in Central and Eastern Europe** A. Galasinska,M. Krzyzanowski,Micha? Krzy?anowski,2008-12-19 This volume explores the discursive nature of post-1989 social change in Central and Eastern Europe. The Future of Newspapers Bob Franklin,2013-09-13 The future of newspapers is hotly contested. Pessimistic pundits predict their imminent demise while others envisage a new era of participatory journalism online, with yet others advocating increased investment in quality journalism rather than free gifts and DVDs, as the necessary cure for the current parlous state of newspapers. Globally, newspapers confront highly variable prospects reflecting their location in different market sectors, countries and journalism cultures. But despite this diversity, they face similar challenges in responding to the increased competition from expansive radio and 24 hour television news channels; the emergence of free Metro papers; the delivery of news services on billboards, pod casts and mobile telephony; the development of online editions, as well as the burgeoning of blogs, citizen journalists and User Generated Content. Newspapers' revenue streams are also under attack as advertising increasingly migrates online. This authoritative collection of research based essays by distinguished scholars and journalists from around the globe, brings together a judicious mix of academic expertise and professional journalistic experience to analyse and report on the future of newspapers. This book was published as special issues of Journalism Practice and Journalism Studies.

**Rhetoric and Reality** Indrajit Banerjee,2003 Everywhere in the world, the advent of the Internet has been seen as a new catalyst for political freedom and democracy. Scholars and pundits have acclaimed the birth of the Internet as a new dawn of global democracy and have hailed the Internet as an insurmountable threat to authoritarian regimes. This book constitutes a serious effort to assess the veracity of these claims in the Asian context. It analyses the political impact of the Internet in its political environment on two levels: the expansion of the public sphere for a more vibrant political environment; facilitating political viewpoints and public debate on political issues. The book assesses the implications of socio-political structures on political discourses, specifically initiatives of NGOs and state governments in utilising the Internet to facilitate or hinder political participation.

**News Dissector** Danny Schechter,2001 Schechter's writing on politics, human rights and the media spanning four decades of activism and reporting: from Vietnam and South Africa to the American Civil rights movement and the hazards of the global corporate media. An important book by one of the few working journalists to emerge from the alternative media of the 60s and 70s with his politics and principals intact.

The Radio Station Michael C. Keith,2004 Updating and expanding a classic text, 'The Radio Station' includes new sections on radio and the Internet, AM stereo, cable and satellite radio, niche formats, mergers and consolidations and provides insight into an ever-changing field.
