**Coral Reefs and Associated Marine Fauna around the Arabian Peninsula** Najeeb M.A. Rasul,Ian C.F.

Stewart,2024-07-15 Coral Reefs and Associated Marine Fauna around the Arabian Peninsula is a unique text that contains studies on a diverse range of topics related to the biology of the Red Sea and Arabian (Persian) Gulf region. Containing invited and peer-reviewed chapters, this book is a compilation of the works of various experts in their respective fields. The authors delve into the marine fauna around the Arabian Peninsula, including marine reptiles and mammals, coral reefs, fish, invertebrates, algae and phytoplankton. They also explore the changes resulting from anthropogenic and climate effects. This book will be a helpful resource for researchers in Biology and will also be a valuable reference for anyone interested in the biology of these two warm semi-isolated seas with their unique environments.

**Coral Health and Disease in the Red Sea, Egypt** Amin R. Mohamed,Hany A. Abdel-Salam,2012 The Red Sea is one of the most important repositories of marine biodiversity in the world.It is the world's northernmost tropical sea. Coral reefs are among the most biologically diverse and economically important ecosystems on the planet. They provide vital services to human societies and industries. Coral reef ecosystems in the Red Sea are legendary with more than 250 species of hard corals representing the highest diversity in the Indian Ocean. Coral diseases are challenging the resilience of coral reef communities. Unfortunately, very little is currently known about the distribution and prevalence of coral diseases in the Red Sea reefs. This book aims to provide baseline knowledge of coral disease/syndrome, predation and other signs of compromised health affecting hard corals in the northern Egyptian Red Sea, and to identify coral species that were the most susceptible to each specific coral disease. This project is part of the work of Egypt's coral reefs research group: Dr Hany A Abd-elsalam, Dr Abdel-Hamid A M Ali and Mr Amin R Mohamed.

**The Rough Guide to Egypt** Rough Guides,2013-02-01 The new full-colour Rough Guide to Egypt is the definitive guide to this amazing country, whose ancient civilization still fascinates today. But there's more to Egypt than just pyramids and temples. The Red Sea offers some of the world's finest diving, a few hours by air from Europe. There are awesome dunes and lush oases to explore in its deserts, and fantastic bazaars and mosques in the capital, Cairo. Detailed accounts of every

attraction, along with crystal-clear maps and plans, make it easy to access anything from remote oases to nightlife that only locals know. You'll find lavish photography and colour maps throughout, along with insider tips on how to get the best out of Luxor's temples or Sinai's beach resorts. At every point, the Rough Guide steers you to the best hotels, cafés, restaurants and shops across every price range, giving you balanced reviews and honest, first-hand opinions. Make the most of your time with The Rough Guide to Egypt. Now available in PDF format.

*Focus on Egypt* Jen Green, 2007-01-12 Presents an overview of modern-day Egypt, covering its landscape and climate, government, economy, education, health, and transportation systems, tourism industry, and religious institutions.

**Red Sea Reef Guide** Helmut Debelius, 2007 The Red Sea is home of a unique fauna due to its almost isolated position near the Indian Ocean and therefore is one of the most fascinating diving areas of the world. Over ten per cent of its fish species are endemics found exclusively between the Suez Canal in the north and the Gate of Lamentations (Bab-el-Mandeb) in the south. As part of the Indian Ocean the Arabian Sea surrounds the rest of the Arabian Peninsula. A combined presentation of the faunas of both these tropical seas around Egypt, Israel, Jordan, Sudan, Saudi Arabia, Yemen, and Arabian Peninsula, this book is perfectly illustrated with over 1100 photos from the natural environment of the animals on 322 pages. It is a treasure of information for divers, aquarium hobbyists and fish import/exporters.

**Quantification and Future Needs of Red Sea Coral Reefs, Egypt** Mohammed Ammar, 2012 This book aims to be the first to quantify a broad area of the Red Sea coral reefs providing a detailed description of species composition of corals on the species level and giving insight to the human impacts and interaction with other associated fauna and flora in the study area. The most important of these human impacts are oil pollution, phosphate, diving damage, temperature and sedimentation. Numerous indicators were used to reflect the effect of these impacts. Of these indicators are percent cover,

abundance, diversity, bleaching patterns, fertility, damage assessment, coral growth and skeletal density. The study is an approach towards effective management based on appropriate information, knowledge and awareness.
