Descripción y Comunicación Zarzar Charur, Carlos, 2020-11-04 Descripción y comunicación constituye un curso-taller, el primero de una serie de seis orientados al dominio de la lengua materna de acuerdo con los programas de estudio 2015 de la Universidad de Guadalajara. Con contenidos y metodología nueva, Descripción y comunicación se propone que el estudiante: practique y valore la descripción como un proceso para descubrir las expresiones lingüísticas y el vocabulario exacto y adecuado en el texto literario; así como que identifique, discrimine y valore la información y los mensajes de los diversos medios de comunicación, los cuales influyen en su actuar como individuo y como sociedad. Este libro está estructurado en dos módulos que corresponden a sendas unidades de competencia: Módulo 1: Descripción y Módulo 2: Comunicación. Cada módulo tiene tres partes claramente diferenciadas. Después del título y del contenido del módulo, en la primera parte (Planteamiento didáctico), se presentan los siguientes elementos: las competencias; el producto final con los correspondientes criterios de calidad; así como la situación y la secuencia didáctica para que los alumnos demuestren la competencia planeada. En la segunda parte de cada módulo (Desarrollo temático) se incluye la explicación de los principales temas, así como la de los conceptos centrales. Asimismo, ofrece diversas lecturas de apoyo, actividades y ejercicios con el fin de reforzar el aprendizaje. En la tercera parte, (Evaluación del módulo), se describen algunos lineamientos para llevarla a cabo. Además se sugiere un examen de conocimientos, una rúbrica de autoevaluación, así como una guía para la coevaluación o evaluación coparticipativa, por medio del trabajo en equipos. Adicionalmente, cuenta con enlaces en YouTube así como a documentos de internet, que pueden ayudar a profundizar en los conocimientos.

Mantenimiento y Evolución de Sistemas de información Mario G. Piattini Velthuis,Macario Polo Usaola,Francisco Ruiz González,Ignacio Garcia Rodríguez de Guzman,2018-10-01 Desde hace décadas que el mantenimiento y la evolución de los sistemas de información son una de las principales fuentes de preocupación de los responsables y directivos de las organizaciones, que ven cómo el presupuesto dedicado a estas tareas puede superar el 80% del total de los recursos, mermando la posibilidad del desarrollo de nuevos sistemas e imposibilitando la prestación de nuevos servicios. Actualmente, la transformación digital ha enfatizado aún más la importancia de la gestión y evolución de los sistemas heredados (legacy), ya que resulta muchas veces casi imposible adaptar el software existente a nuevos requisitos o cambios tecnológicos En este libro se presentan de forma clara los conceptos fundamentales relacionados con el mantenimiento y la evolución de los sistemas de información, y se ofrece un tratamiento sistemático de los estándares internacionales relacionados con el proceso de mantenimiento y la mantenibilidad del software. Además, se proponen varias metodologías, contrastadas en decenas de proyectos realizados a lo largo de más de 20 años para abordar el mantenimiento de los sistemas de información, analizando algunas técnicas y herramientas que pueden facilitar la evolución del software. A lo largo de esta obra se ha combinado el rigor académico con la experiencia práctica, proporcionando a sus lectores una panorámica actual y completa sobre la problemática asociada al mantenimiento y la evolución de los sistemas de información.
