Islam in Everyday Arabic Speech M. Piamenta, 2023-11-27

A Dictionary of Iraqi Arabic Beverly E. Clarity, 2003 Annotation Originally offered in two separate volumes, this staple of Georgetown University Press's world-renowned Arabic language program now handily provides both the English to Arabic and Arabic to English texts in one volume.

Russian-Arab Worlds Eileen M. Kane, Masha Kirasirova, Margaret Litvin, 2023 When the Cold War ended, the long history of Russian and then Soviet engagement with Arab countries was largely forgotten, so the dominant role of Vladimir Putin's Russia in the region appeared to come out of nowhere. The thirty-four expertly introduced primary sources in this book recover a complex history of Russian-Arab ties and illuminate some of its most fascinating aspects: Russian Orthodox missionaries in Palestine, Arab communists traveling to the USSR, and, more surprising, Arabic legal documents written by Russian Muslims, Russian Jewish migrants to Palestine decades before Zionism, and 1940s Armenians repatriated from Arab countries to the USSR.

Omar Khayyam's Secret: Hermeneutics of the Robaiyat in Quantum Sociological Imagination Book 6: Khayyami Science Mohammad H. Tamdgidi, 2023-06-10 Omar Khayyam's Secret: Hermeneutics of the Robaiyat in Quantum Sociological Imagination, by Mohammad H. Tamdgidi, is a twelve-book series of which this book is the sixth volume, subtitled Khayyami Science: The Methodological Structures of the Robaiyat in All the Scientific Works of Omar Khayyam. Each book, independently readable, can be best understood as a part of the whole series. In Book 6, Tamdgidi shares the Arabic texts, his new English translations (based on others' or his new Persian translations, also included in the volume), and hermeneutic analyses of five extant scientific writings of Khayyam: a treatise in music on tetrachords; a treatise on balance to measure the weights of precious metals in a body composed of them; a treatise on dividing a circle quadrant to achieve a certain proportionality; a treatise on classifying and solving all cubic (and lower degree) algebraic equations using geometric methods; and a treatise on explaining three postulation problems in Euclid's book Elements. Khayyam wrote three other non-extant scientific treatises on nature, geography, and music, while a treatise in arithmetic is differently extant since it influenced the work of later Islamic and Western scientists. His work in astronomy on solar calendar reform is also differently extant in the calendar used in Iran today. A short tract on astrology attributed to him has been neglected. Tamdgidi studies

the scientific works in relation to Khayyam's own theological, philosophical, and astronomical views. The study reveals that Khayyam's science was informed by a unifying methodological attention to ratios and proportionality. So, likewise, any quatrain he wrote cannot be adequately understood without considering its place in the relational whole of its parent collection. Khayyam's Robaiyat is found to be, as a critique of fatalistic astrology, his most important scientific work in astronomy rendered in poetic form. Studying Khayyam's scientific works in relation to those of other scientists out of the context of his own philosophical, theological, and astronomical views, would be like comparing the roundness of two fruits while ignoring that they are apples and oranges. Khayyam was a relational, holistic, and self-including objective thinker, being systems and causal-chains discerning, creative, transdisciplinary, transcultural, and applied in method. He applied a poetic geometric imagination to solving algebraic problems and his logically methodical thinking did not spare even Euclid of criticism. His treatise on Euclid unified numerical and magnitudinal notions of ratio and proportionality by way of broadening the notion of number to include both rational and irrational numbers, transcending its Greek atomistic tradition. Khayyam's classification of algebraic equations, being capped at cubic types, tells of his applied scientific intentions that can be interpreted, in the context of his own Islamic philosophy and theology, as an effort in building an algebraic and numerical theory of everything that is not only symbolic of body's three dimensions, but also of the three-foldness of intellect, soul, and body as essential types of a unitary substance created by God to evolve relatively on its own in a two-fold succession order of coming from and going to its Source. Although the succession order poses limits, as captured in the astrological imagination, existence is not fatalistic. Khayyam's conceptualist view of the human subject as an objective creative force in a participatory universe allows for the possibility of human self-determination and freedom depending on his or her self-awakening, a cause for which the Robaiyat was intended. Its collection would be a balanced unity of wisdom gems ascending from multiplicity toward unity using Wine and various astrological, geometrical, numerical, calendrical, and musical tropes in relationally classified quatrains that follow a logical succession order.

A Grammar of the Arabic Language Carl Paul Caspari, 1875

Arabic Printing for the Christians in Ottoman Lands Ioana Feodorov, 2023-10-04 Arabic printing began in Eastern Europe and the Ottoman Levant through the association of the scholar and printer Antim the Iberian, later a metropolitan of Wallachia, and Athanasios III Dabbās, twice patriarch of Antioch, when the latter, as metropolitan of Aleppo, was sojourning in Bucharest. This partnership resulted in the first Greek and Arabic editions of the Book of the Divine Liturgies (Snagov, 1701) and the Horologion (Bucharest, 1702). With the tools and expertise that he acquired in Wallachia, Dabbās established in Aleppo in 1705 the first Arabic-type press in the Ottoman Empire. After the Church of Antioch divided into separate Greek Orthodox and Greek Catholic Patriarchates in 1724, a new press was opened for Arabic-speaking Greek Catholics by ‘Abdallāh Zāḥir in Ḥinšāra (Ḍūr al-Šuwayr), Lebanon. Likewise, in 1752-1753, a press active at the Church of Saint George in Beirut printed Orthodox books that preserved elements of the Aleppo editions and were reprinted for decades. This book tells the story of the first Arabic-type presses in the Ottoman Empire which provided church books to the Arabic-speaking Christians, irrespective of their confession, through the efforts of ecclesiastical leaders such as the patriarchs Silvester of Antioch and Sofronios II of Constantinople and financial support from East European rulers like prince Constantin Brâncoveanu and hetman Ivan Mazepa.
