

# McGilchrist The Master And His Emissary

David Orrell

*The Master and His Emissary* Iain McGilchrist, 2019-03-26 A new edition of the bestselling classic – published with a special introduction to mark its 10th anniversary This pioneering account sets out to understand the structure of the human brain – the place where mind meets matter. Until recently, the left hemisphere of our brain has been seen as the ‘rational’ side, the superior partner to the right. But is this distinction true? Drawing on a vast body of experimental research, Iain McGilchrist argues while our left brain makes for a wonderful servant, it is a very poor master. As he shows, it is the right side which is the more reliable and insightful. Without it, our world would be mechanistic – stripped of depth, colour and value.

**Teaching in a World of Violent Extremism** Eleazar S. Fernandez, 2021-05-21 Violent extremism is not new, but we have witnessed its rise to the point that it has become a defining issue of our time. We cannot brush it aside any longer: it characterizes who we are as a people and as a global society. Why is violent extremism rising? What are its drivers and triggers? These questions must be asked and answered first, and *Teaching in a World of Violent Extremism* takes up the questions and the answers. In an effort to end violent extremism, the next questions that must be pursued are these: How shall we prevent and undo extremism, especially the militant and violent kind? In this world of violent extremism, what curriculum designs, educational programs, and pedagogies shall we employ to develop competent citizens, civic leaders, and pastors, as well as resilient communities?

**The Aesthetics of Discipleship** Adrian Coates, 2021-09-30 Discipleship is embodied. Formation in the Christian life is not an otherworldly exercise but one that plays out in this world, interwoven with everyday sensory experience in ordinary life. *The Aesthetics of Discipleship* explores this dynamic through Kierkegaard's framing of aesthetic existence--the sensory experience of being in the moment--further developed by Bonhoeffer, as operating within a realm of freedom, encompassing not only art but play, friendship, and cultural formation. In addition to Kierkegaard and Bonhoeffer, the work of Iain McGilchrist, Graham Ward, and Nicholas Wolterstorff is employed to offer a fresh perspective on discipleship, from below: Everyday sensory experiences are integral not only to being human but to the practice of discipleship, such that discipleship integrates aesthetic, ethical, and religious existence. Aesthetic existence unhinged from a life of faith or fueled by distorted Christendom creates and sustains aestheticized pseudorealities centered on the self. Mature aesthetic existence, however,

anchored in love for God, plays a fundamental role in the Christian life, both as the incarnational celebration of being fully human, and also through the preconscious formation of imaginaries by which we live.

**Gaslit Brain** Jennifer Fraser, 2025-11-04 Reveals the psychological functions of the manipulator's brain and the impact of gaslighting on our minds, shining a spotlight on how manipulative brains seduce us into belief and disrupt our ability to think effectively This psychological study analyzes the onslaught of gaslighting that has recently dominated the world stage, making many turn to the dictionary just to figure out how it works, who's at risk, and why it's becoming normalized. When power, credibility, and social status are harnessed to manipulate—not just individuals—but whole populaces may suffer violence against facts and truth. Our recent concern with gaslighting's destructive force has made psychological safety a priority in relationships at home and at work. In PART ONE, we look at the impact gaslighting has on targets' brains and minds. Many do not realize that gaslighting has an extremely harmful neurological impact. If manipulation leads to insanity, it's because the brain and mind have been distorted and compromised. With the advent of non-invasive technology, scientists use brain imagery to examine what happens to brains that are lied to, manipulated, and betrayed. The damage is physical and visible and provides insights into why the mind's functions are compromised. PART TWO lasers in on the brains of those who bully and gaslight. Many do not realize that those who lie and manipulate have deficits in their brains. If manipulation leads to insanity, it's because the brain and mind have been distorted. With the advent of non-invasive technology, scientists use brain imagery to examine what's going on in the brains of bullies and gaslighters and why they're so effective. The damage is physical and visible, and it provides insights into why the mind's functions are compromised, destructive, and dangerous. PART THREE is practical and applicable. It teaches how to harness psychology and neuroscience to stay safe and sane. It provides proven exercises to keep us sharp and skeptical when faced with every manipulation from smear campaigns to spin doctors. It provides the tools needed to maintain clarity when exposed to those who are sowing the seeds of confusion and destabilization in an attempt to shatter our brains and lives. We can strengthen our brains and minds' capacity to recognize and resist falsehoods, level by level, mechanism by mechanism, function by function. PART THREE of The Gaslit Brain turns the psychological and brain research into practical, applicable strategies that anyone can apply to identify and resist the manipulation of gaslighting.

**Wisdom Is a Woman** Lance Rundus, 2019-12-05 In Proverbs 1-9, we are introduced to stunning, scandalous, and mysterious Lady Wisdom. For millennia interpreters have endeavored to explain, simplify, or domesticate the vaunted and varied personification of this woman. In Wisdom Is a Woman, Lance Rundus illustrates that our difficulties with Lady Wisdom run much deeper than uncertainty about her origins and depiction, but are rooted in inherited assumptions about and definitions of metaphor, as well as a distorted disposition toward right hemisphere modes of knowledge that undercut the very attempt at discovering Wisdom at all. Wisdom Is a Woman invites the reader into the mode of aesthetic perception that

opens the way to the beautiful, transcendent intimacy of relational knowledge born from constellations of canonical metaphor in Proverbs 1-9. In obtaining scale with Wisdom we discover that this paradoxical wonder is but a faint echo of the wonder and beauty of the Triune God in the person, life, death, and resurrection of Jesus.

*The Smoke of the Soul* R. Sugg, 2013-11-13 What was the soul? Christians agreed that it was the immortal core of each human being. Yet there was no agreement on where the soul was, what it was, or how it could be joined to the body. The Smoke of the Soul explores the anxieties and excitement generated by the mysterious zone where matter met spirit, and where human life met eternity.

**The Divided Brain and the Search for Meaning** Iain McGilchrist, 2012-07-15 In this 10,000-word essay, written to complement Iain McGilchrist's acclaimed *The Master and His Emissary*, the author asks why - despite the vast increase in material well-being - people are less happy today than they were half a century ago, and suggests that the division between the two hemispheres of the brain has a critical effect on how we see and understand the world around us. In particular, McGilchrist suggests, the left hemisphere's obsession with reducing everything it sees to the level of minute, mechanistic detail is robbing modern society of the ability to understand and appreciate deeper human values. Accessible to readers who haven't yet read *The Master and His Emissary* as well as those who have, this is a fascinating, immensely thought-provoking essay that delves to the very heart of what it means to be human.

**Ways of Attending** Iain McGilchrist, 2018-07-11 Attention is not just receptive, but actively creative of the world we inhabit. How we attend makes all the difference to the world we experience. And nowadays in the West we generally attend in a rather unusual way: governed by the narrowly focussed, target-driven left hemisphere of the brain. Forget everything you thought you knew about the difference between the hemispheres, because it will be largely wrong. It is not what each hemisphere does - they are both involved in everything - but how it does it, that matters. And the prime difference between the brain hemispheres is the manner in which they attend. For reasons of survival we need one hemisphere (in humans and many animals, the left) to pay narrow attention to detail, to grab hold of things we need, while the other, the right, keeps an eye out for everything else. The result is that one hemisphere is good at utilising the world, the other better at understanding it. Absent, present, detached, engaged, alienated, empathic, broad or narrow, sustained or piecemeal, attention has the power to alter whatever it meets. The play of attention can both create and destroy, but it never leaves its object unchanged. How you attend to something - or don't attend to it - matters a very great deal. This book helps you to see what it is you may have been trained by our very unusual culture not to see.

Myofascial Magic in Action Joanne Avison, 2024-12-19 *Myofascial Magic in Action* is the first of five books explaining how fascia relates fundamentally to human movement and changes all that we thought we knew. Joanne Avison's explanations are straightforward and accessible while exploring keys to balance, poise, ease of motion, longevity, resilience and the natural

magic of this incredible tissue network within EVERY human body. In this book, you will discover the magic of how myofascia (particularly) and fascia (universally) design individual shape and motion. You will uncover the 5 Rs of myofascial magic: - Rebound - how we use the ground as a free resource - Recoil - how the human blueprint relies on it for well-being - Release - how everyone has access to (metabolically) free elastic energy - Restore - how every age and stage of fitness and ability can be optimised - Refine - how to optimise whatever is best for the individual, however they are at the time Learning about the intricate and fascinating web of connective tissue, known as the fascia, will transform your practice and the way you perceive the human body and the beings you work with. As a practitioner, regardless of modality, this serves the keys to optimising programmes for different clients. This is a fantastic resource for yoga teachers, therapists, and movement professionals as well as manual therapists looking for small micro-movements to give their clients for homework. Distinguish where the magic happens, from the inside out.

*Economyths* David Orrell,2010 'Economyths' explains how the economy is the result of a complex and unpredictable process, how risk models go astray and why the economy is not rational or fair. It also details how new ideas in mathematics, psychology and environmentalism are helping to reinvent economics.

Thriving on Overload: The 5 Powers for Success in a World of Exponential Information Ross Dawson,2022-09-06 When managing massive amounts of information is part of your job and daily life, how do you transform a feeling of being overwhelmed into a sense of abundance and empowerment? This groundbreaking guide delivers the practical insights and strategies you need to build a positive relationship with information and excel at work and in all your ventures. Ross Dawson draws on his work as a leading futurist and 25 years of research into the practices that transform a surplus of information into compelling value. In *Thriving on Overload*, he shares simple actionable techniques for staying ahead in an accelerating world. It's all about choosing to thrive on overload—rather than being overwhelmed by it. Develop the five intertwined powers that enable extraordinary performance in a world of overload: Purpose: understanding why you engage with information enables a healthier relationship that generates success and balance in your life Framing: creating frameworks that connect information into meaningful patterns builds deep knowledge, insight, and world-class expertise Filtering: discerning which information best serves you helps surface valuable signals above the pervasive noise Attention: allocating your awareness with intent—including laser-like focus and serendipitous discovery—maximizes productivity and outcomes Synthesis: expanding your capacity to integrate a universe of ideas yields powerful insight, the ability to see opportunities

first, and improved decision-making Discover valuable lessons from some of the world's most extraordinary "information masters"—entrepreneurs, investors, executives, and researchers who excel at transforming vast mines of data into the solid gold of insight and effective action. Packed with clear guidance, useful exercises, engaging stories, and handy resources, *Thriving on Overload* helps you build the capabilities that enable you to outperform your peers and prosper as never before in a world defined by excessive information.

**Subjects of Substance** Julian Henneberg, 2020 Recent U.S. literature has both been informed by, and critically engaged with, materialist conceptions of selfhood. Over the past decades, disciplines like neuroscience and evolutionary biology have increasingly recast the human self as a malleable construct produced by physiological processes. In a parallel development, literary authors have created their own conceptions of somatic subjectivity in conjunction or contrast with scientific and medical discourses. *Subjects of Substance* examines the forms, functions, and effects of materialist models of mind in selected memoirs and novels. Authors discussed include Michael W. Clune, Don DeLillo, Kay Redfield Jamison, Siri Hustvedt, Richard Powers, Elyn R. Saks, and David Foster Wallace.
