**The Boat of a Million Years** Poul Anderson, 2018-09-18 A New York Times Notable Book and Hugo and Nebula Award Finalist: This epic chronicle of ten immortals over the course of history “succeeds admirably” (The New York Times). The immortals are ten individuals born in antiquity from various cultures. Immune to disease, able to heal themselves from injuries, they will never die of old age—although they can fall victim to catastrophic wounds. They have walked among mortals for millennia, traveling across the world, trying to understand their special gifts while searching for one another in the hope of finding some meaning in a life that may go on forever. Following their individual stories over the course of human history and beyond into a richly imagined future, “one of science fiction’s most revered writers” (USA Today) weaves a broad tapestry that is “ambitious in scope, meticulous in detail, polished in style” (Library Journal).

Campbell, Anthony Boucher, Gordy Dickson, Jack Vance, Clifford Simak, and Harlan Ellison. *Going for Infinity* provides a firsthand look at six decades of science fiction and fantasy, as lived by one of the field's most honored contributors. *Sentiment, Inc*, Poul Anderson, 2016-02-28 The way we feel about another person, or about objects, is often bound up in associations that have no direct connection with the person or object at all. Often, what we call a change of heart comes about sheerly from a change in the many associations which make up our present viewpoint. Now, suppose that these associations could be altered artificially, at the option of the person who was in charge of the process....

Starfarers Poul Anderson, 1999-10-15 When evidence of an advanced civilization is discovered by SETI astronomers, an expedition into the far reaches of the galaxy is planned and an eclectic team of scientists is chosen to make the trip. But because the origin of the alien signals is thousands of light-years away, the crew will age only a few years while millennia pass on Earth. And though they are ready to face the ramifications of such a voyage, none of the starfarers are prepared for what awaits them at the outer edge of the cosmos--or back at the planet they once called home.

For Love and Glory Poul Anderson, 2004-02-01 From the multiple Hugo and Nebula Award-winning Grandmaster, a new novel of classic science fiction adventure. Mystery, discovery, and wonder on a cosmic scale are the core of Anderson's latest novel. Lissa, a human Earth woman, and her partner, Karl, a giant alien academic who resembles Tyrannosaurs—are interstellar archaeologists investigating the remote and uncharted planet Jonna. There, they seem to have hit the jackpot. For on that distant world they've discovered an immense artifact that may have been left by the mysterious beings called the Forerunners. This race predated all the known cultures in the starfaring galaxy and vanished long before any other intelligent species had taken to the stars. But Lissa and Karl aren't the first to have made the discovery on Jonna. On the far-off world the archaeologists cross paths with the two freebooters whose plans for motives towards the arcane object are not purely scientific. Their discovery may be the best preserved relic of the ancient beings yet found. Other artifacts from the

Forerunners—once reverse engineers—have revolutionized entire fields of technology, reaping huge financial rewards. If the same holds true for this newest discovery, Lissa realizes, only she and Karl stand between the seemingly friendly freebooters and what could be the treasure of a lifetime.

*Speculative Poetry and the Modern Alliterative Revival* Dennis Wilson Wise, 2023-12-08 If a literary movement arises but no one notices, is it still a movement? In *Speculative Poetry and the Modern Alliterative Revival: A Critical Anthology*, Dennis Wilson Wise argues that the answer is “yes.” Over the last ten decades, poets working in fantasy, science fiction, and horror have collectively brought forth a revival in alliterative poetics akin to what once happened in the mid-fourteenth century. Altogether, this anthology collects for the first time over fifty speculative poets—several of whom are previously unpublished—from across North America and Europe. Alongside such established names as C. S. Lewis, Patrick Rothfuss, Edwin Morgan, Poul Anderson, Jo Walton, P. K. Page, and W. H. Auden, this anthology includes representative texts from cultural movements such as contemporary neo-Paganism and the Society for Creative Anachronism. A lengthy critical introduction by the editor—written accessibly for a general audience—explains and contextualizes the Modern Revival for critics and readers alike, and extensive footnotes offer aids to anyone new to medieval history or Norse mythology. Overall, this indispensable anthology—the first major academic book to focus on speculative poetry—establishes where the medieval meets the modern in the hitherto unrecognized Modern Alliterative Revival.

*The Winter of the World* Poul Anderson, 1975 Classic SF from the Nebula and Hugo Award-winning author of *The Boat of a Million Years*. Thousands of years from now, after a new Ice Age has reduced our world to frozen ruins, new civilizations and cultures arise from the ice. But as the people uncover the lost technology of the past, they also rediscover war, conquest, diplomacy . . . and betrayal. Previous publisher: Signet.

**Inside Earth** Poul Anderson, 2016-02-12 The Valgolia rule the Galaxy. But they're fomenting revolt throughout their own empire. Their hope is to unite all of their subjects by giving them a common enemy. But the trick is finding a way not to be

destroyed by the rebellion in the process.

It was published as a complete novel in 1962, having been serialized as The Day after Doomsday in the magazine Galaxy, between December 1961 and February 1962. The novel explores events after the destruction of Earth, from the point of view of two returning starship crews, one entirely made up of men, the other consisting entirely of women. The story is set in the early 21st century. Even as the Cold War dragged on Earth has been suddenly contacted by the Monwaingi space-faring culture. The technology of interstellar travel is spreading across the galaxy, disrupting one culture after another. Monwaing itself was contacted only a few centuries previously. Another culture, the Vorlak, underwent a transition from a stable planetary society to a warlord culture similar to the Japanese Shogunate. The nomadic Kandemirian culture became a hegemonistic one similar to the Mongol Empire. Earth found itself on the fringes of a conflict between Kandemir and a coalition led by Vorlak, with Monwaing on the sidelines, actively supporting the anti-Kandemir forces. There is a lingua franca called Uru, which bonds the diverse cultures together.
