The World of Roman Costume Judith Lynn Sebesta, Larissa Bonfante, 1994 These essays survey, document and elucidate over a thousand years of Roman garments and accessories, from Etruscan influences to the transition to early Christian and medieval garb. Subjects include functional and symbolic uses, manufacture and industry, male, female and children's garb, and daily life and official dress.

Polykleitos, the Doryphoros, and Tradition Warren G. Moon, 1995 Polykleitos, the Doryphoros, and Tradition displays an impressive range of approaches, beginning with commentary on the artistic and philosophical antecedents that influenced Polykleitos' own aesthetic, as well as the role of contemporary Greek anatomical knowledge in his representation of the human form. Many of the essays offer extended analysis and detailed illustration of his surviving sculptures, later copies of his work, and reflections of his style in sculpture, paintings, coins, and other art in Greece, Italy, and Asia Minor. Several essays offer an extended discussion of Polykleitos' original bronze Doryphoros, its pose, its relation to other spearbearer sculptures, and the fine Roman marble copy of it now at the Minneapolis Institute of Arts.

The Politics of the Piazza Eamonn Canniffe, 2016-03-03 Through a detailed study of the principal spaces of Italian cities, this book explores the relationship between political systems and their methods of representation in architecture. Illustrated by contemporary photographs and analytical drawings, it examines significant piazzas and situates these examples in their social and political contexts, highlighting the urban evidence of shifts between autocratic and democratic forms of government through history. The ideological role of political architecture is analyzed through the work of various theorists including ancient sources, Renaissance thinkers and modern critics. The complex evolution of individual spaces over time is represented by their physical layering from ancient times to the present day. Other examples connect the development of different characteristic types of Italian urban form in chronological sequence, categorized by art historical and political periods.

The Making of the West, Combined Volume Lynn Hunt, 2012-01-04 Students of Western civilization need more than

facts. They need to understand the cross-cultural, global exchanges that shaped Western history; to be able to draw connections between the social, cultural, political, economic, and intellectual happenings in a given era; and to see the West not as a fixed region, but a living, evolving construct. These needs have long been central to *The Making of the West*. The book's chronological narrative emphasizes the wide variety of peoples and cultures that created Western civilization and places them together in a common context, enabling students to witness the unfolding of Western history, understand change over time, and recognize fundamental relationships.
