The ^AOxford Handbook of Humanism Anthony B. Pinn, 2021-07-27 As a system of thought that values human needs and experiences over supernatural concerns, humanism has gained greater attention amid the rapidly shifting demographics of religious communities. This outlook has taken on global dimensions, with activists, artists, and thinkers forming a humanistic response not only to religion, but to the pressing social and political issues of the 21st century. The Oxford Handbook of Humanism aims to explore the subject by analyzing its history, its philosophical development, and its influence on culture. It will also discuss humanism as a global phenomenon—an approach that has often been neglected in more Western-focused works.

Cleaver's "Soul on Ice" as descended from Malcolm X Mark Schauer, 2013-07-22 Essay from the year 2012 in the subject American Studies - Literature, grade: A, Northern Arizona University, course: African American Literature, language: English, abstract: Despite its limitations, Soul on Ice is not only the closest and most influential literary descendant of Malcolm X's autobiography, but a significant advancement in both the prison-writing genre and American radical political consciousness. Of 389 pages of text, the adjudication of Malcolm X's crime and subsequent incarceration encompasses 42 pages of his autobiography, compared to 171 pages devoted to his pre-prison life and 176 to his post-prison experiences. The bulk of X's prison narrative concerns his conversion to Islam and goes into extensive detail about his intensive self-education program. Though there are brief appearances by his early Charlestown mentor, Bimbi, visits from his family, and anecdotes like the first time he refused to eat pork in the prison mess hall, there is little in-depth depiction or analysis of the inmates' social economy. Conversely, Cleaver's prison blocks, mess halls, and yards are represented as, "a kind of modern Greek agora" in more vivid detail than X's brief anecdotes of, say, debates at Norfolk penal colony. The depth of Cleaver's literary and spiritual debt to X is best summed up in his own words: When I decided to join the Black Panther Party, the only hang-up I had was with its name. I was still clinging to my conviction that we owed it to Malcolm to pick up where he left off" (Harper 398-99).

Too Heavy a Yoke Chanequa Walker-Barnes, 2014-06-19 Black women are strong. At least that's what everyone says and how they are constantly depicted. But what, exactly, does this strength entail? And what price do Black women pay for it? In this book, the author, a psychologist and pastoral theologian, examines the burdensome yoke that the ideology of the Strong

Black Woman places upon African American women. She demonstrates how the three core features of the ideology-- emotional strength, caregiving, and independence--constrain the lives of African American women and predispose them to physical and emotional health problems, including obesity, diabetes, hypertension, and anxiety. She traces the historical, social, and theological influences that resulted in the evolution and maintenance of the Strong Black Woman, including the Christian church, R & B and hip-hop artists, and popular television and film. Drawing upon womanist pastoral theology and twelve-step philosophy, she calls upon pastoral caregivers to aid in the healing of African American women's identities and crafts a twelve-step program for Strong Black Women in recovery.

Un-Mapping the Global South Gero Bauer, Nicole Hirschfelder, Fernando Resende, 2024-03-19 This book offers new approaches and insights into the ongoing and topical discussions on the concepts and definitions of the global south. Instead of adding to the debates about how to properly define the global south as such, it aims at emphasising concrete experiences and accounts of (post-)colonial dislocation and disidentification as both a starting point and linchpin for the subsequent exploration. It brings into conversation theories and interrogations of the global south with specific local studies, without presenting them as the romanticised other or as non-western narratives. As a bold initiation of future conversations on issues that both directly and indirectly affect ideas about the global south, the volume will be of great interest to scholars and researchers of critical theory, literary and cultural studies, and global south studies.

The First Amendment and Related Statutes Eugene Volokh, 2008 The Third edition examines United States First Amendment law using expertly edited cases, original note materials, and class questions. Human Sexuality Simon LeVay, Sharon McBride Valente, 2006 This textbook introduces students to the diversity of human sexual expression and the diversity of perspectives from which sexuality can be viewed, from biology and medicine, evolutionary theory, to cognitive science and social psychology. The authors encourage critical thinking and enable students to contribute constructively and non-judgmentally to the social debate on sexual issues. The second edition presents new coverage on gay marriage, sex education, minority issues, recent brain imaging studies, advances in contraceptive technology and STD treatment, and sexual arousal disorders. The text is also more accessible with reorganized chapters on women's and men's bodies and enhanced pedagogy.

Race, Schools, & Hope Lisa M. Stulberg, 2008 How can school choice be a form of both giving up on public education and a form of hope and faith in American schooling? This book helps us to make sense of why and how African Americans

participate in and lead school choice reforms. The author argues that regardless of the success or failure of these reforms, they represent an important political phenomenon in American schooling and in African American history and politics. The first section of the book focuses on African American school choice in the post-Brown period, examining how these reforms became a response to desegregation politics and policies. The second section focuses on the author's experience as a co-founder of a charter school in Oakland, California at a time when Oakland's public schools were found to be severely underserving African-American students.

Pink Labor on Golden Streets Christiane Erharter, Dietmar Schwärzler, Ruby Sircar, 2015 Pink labor on golden streets: queer art practices is particularly concerned with combining, juxtaposing, or playing off various artistic strategies where form and politics intervene. Two artistic attitudes, often perceived as divergent, are described here: the choice of form attributed to political issues versus political stances dictating the question of form. This book sheds light on contradictory standpoints of queer art practices, conceptions of the body, and ideas of 'queer abstraction,' a term coined by Jack Judith Halberstam that raises questions to do with (visual) representations in the context of gender, sexuality, and desire--Page [4] of cover.

Fake Science Austin Ruse, 2017-07-17 If you listen to any political argument, you're eventually bound to hear something like: The science is settled on this. Or: Just look at the statistics! Or: There have been studies that say... You'd think we were living in the golden age of science and reason. But the truth is far more sinister, says Austin Ruse. We're actually living in the age of the low information voter, easily misled by all-too-convincing false statistics and studies. In Fake Science, Ruse debunks so-called facts used to advance political causes one after the other, revealing how poorly they stand up to actual science.

The Economics and Law of Public Procurement Annalisa Castelli, Gustavo Piga, Tünde Tátrai, 2024-12-11 Public procurement makes up a significant part of national economies: 10-25% of gross domestic product (GDP), depending on the country. Appropriate laws and regulations are an essential tool to direct the action of procurers towards the public good and avoid corruption and misallocation of resources, while at the same time sustaining progress and social goals. The original

approach of this book combines juridical, economic, and technical expertise to find common terrain and a common language in order to debate the specific issues that affect public administrations across the world that need advancing and modernizing. The book features contributions across four specific themes of interest to the procurer's day-to-day job in modern public purchasing organizations: preferences and political economy in public procurement, climate change, defence procurement, and human rights in public procurement. The aim is to let the new emerging trade-offs between competition and sustainability emerge, highlighting at the same time the possible synergies between the relevant policy objectives. The book takes into account sectoral specificities, reinforced by recent global events such as wars, natural disasters, and populism. The unique format features in each section an interdisciplinary debate between two experts across different disciplines who deliberate and engage one another so as to improve the mutual understanding across disciplines, followed by two additional contributions. This book will be of interest to scholars, researchers, and policymakers worldwide.
