The Death and Life of Great American Cities Jane Jacobs, 1992-12-01 Compassionate, bracingly indignant, and keenly detailed, a monumental work that provides an essential framework for assessing the vitality of all cities. The most refreshing, provocative, stimulating and exciting study of this [great problem] which I have seen. It fairly crackles with bright honesty and common sense. —The New York Times A direct and fundamentally optimistic indictment of the short-sightedness and intellectual arrogance that has characterized much of urban planning in this century, *The Death and Life of Great American Cities* has, since its first publication in 1961, become the standard against which all endeavors in that field are measured. In prose of outstanding immediacy, Jane Jacobs writes about what makes streets safe or unsafe; about what constitutes a neighborhood, and what function it serves within the larger organism of the city; about why some neighborhoods remain impoverished while others regenerate themselves. She writes about the salutary role of funeral parlors and tenement windows, the dangers of too much development money and too little diversity.

The Death and Life of Great American Cities Jane Jacobs, 2011-09-13 Published to coincide with the 50th anniversary of its initial publication, this special edition of Jane Jacobs's masterpiece, *The Death and Life of Great American Cities*, features a new Introduction by Jason Epstein, the book's original editor, who provides an intimate perspective on Jacobs

herself and unique insights into the creation and lasting influence of this classic. The Death and Life of Great American Cities was described by The New York Times as “perhaps the most influential single work in the history of town planning. . . . [It] can also be seen in a much larger context. It is first of all a work of literature; the descriptions of street life as a kind of ballet and the biting satiric account of traditional planning theory can still be read for pleasure even by those who long ago absorbed and appropriated the book’s arguments.” Jane Jacobs, an editor and writer on architecture in New York City in the early sixties, argued that urban diversity and vitality were being destroyed by powerful architects and city planners. Rigorous, sane, and delightfully epigrammatic, Jane Jacobs’s tour de force is a blueprint for the humanistic management of cities. It remains sensible, knowledgeable, readable, and indispensable.

Walking in the European City Timothy Shortell, Evrick Brown, 2016-02-24 Sociologists have long noted that dynamism is an essential part of the urban way of life. However, walking as a significant social activity and crucial research method (in spite of its ubiquity as part of urban life) has often been overlooked. This volume considers walking in the city from a variety of perspectives, in a variety of places and with a variety of methods, to engage with the question of how walking can contribute to the sociological imagination and reveal sociological knowledge. Bringing together new research on sites across Europe, *Walking in the European City* addresses the nature of everyday mobility in contemporary urban settings, shedding light not only on the ways in which walking relates to other social institutions and practices, but also as a method for studying urban life. With attention to intersections of race and ethnicity, gender and class, as well as the manner in which processes of gentrification transform urban space, this book examines questions of access to public places, exploring the ways in which urban dwellers’ use of and relation to neighbourhood spaces are shaped by inequalities of status and power. As such, it will appeal to scholars of sociology, geography and anthropology with interests in urban studies, mobility and research methods.

State of the World's Cities 2010/2011 ,2010 One billion people worldwide live in slums and that figure is predicted to reach 2 billion by 2030. This new volume from UN-HABITAT unpacks the complex social and economic issues using the novel conceptual framework of the urban divide.

Urban Landscapes in High-Density Cities Bianca Maria Rinaldi, Puay Yok Tan, 2019-06-04 The positive effects of urban green spaces are well-known, ranging from the promotion of health, support of biodiversity to climate regulation. However, the practical implementation of urban landscapes is less discussed. How can we make these spaces functional, economically feasible and inclusive, especially as cities become more diverse? The publication explores strategies to reconcile the various demands, such as food production, resilience and nature conservation. Indeed, urban landscapes have to be restorative, ecological and aesthetically pleasing at the same time. This is a particular challenge in high-density cities like Singapore, Seoul or New York where space is a scarce commodity. The continuing growth of the worldwide urban

population imbues the topic with a special urgency.

Are We There Yet? Martin Stewart-Weeks, Simon Cooper, 2019-07-01 Digital transformation across the public sector has stalled. After over 25 years of considerable time, money, and effort at national, state, and local levels, we're still not 'there' yet. The reason is that successive waves of investment in digital transformation have focused largely on improving the transactional functions and activities of government. They have failed to embrace a bigger challenge - the need for governing and government to rethink a new 'theory of the business' - which that same revolution has caused and to which it is an inescapable part of the answer. This is a unique, timely, and distinctly Australian look at a global phenomenon by two 'reflective practitioners'. Their personal and practical experience of digital transformation in government and the public sector in Australia suggests it is a story missing half its plot. Packed full of insights from government and digital leaders from around Australia and across the world, this is a much-needed practical guide for public servants and leaders in any jurisdiction. It contains insights and ideas about the way digital technologies, and their associated tools, platforms, and cultures, are changing the business of governing and the design and delivery of public policy and services. *Are We There Yet?* lucidly diagnoses how digital technologies, including AI and big data, are transforming the role of the public servant and the project of governance itself. Stewart-Weeks and Cooper describe the important shift from power to problem-solving and explain how to harness digital transformation to make government work better for all of us." - Beth Noveck, author of *Wiki Government*, former Deputy Chief Technology Officer in the Obama White House, Professor in Technology, Culture & Society, New York University and Chief Innovation Officer for New Jersey I've read a lot about the potential impact of digital technology on public services ... this is the first book to persuade me that the power of digital, properly conceived, really can transform the nature of democratic governance. - Professor Peter Shergold AC, Chancellor, Western Sydney University, Former Secretary, Department of Prime Minister and Cabinet

An Analysis of Jane Jacobs's *The Death and Life of Great American Cities* Martin Fuller, Ryan Moore, 2017-07-05 Despite having no formal training in urban planning, Jane Jacobs deftly explores the strengths and weaknesses of policy arguments put forward by American urban planners in the era after World War II. They believed that the efficient movement

of cars was of more value in the development of US cities than the everyday lives of the people living there. By carefully examining their relevance in her 1961 book, *The Death and Life of Great American Cities*, Jacobs dismantles these arguments by highlighting their shortsightedness. She evaluates the information to hand and comes to a very different conclusion, that urban planners ruin great cities, because they don't understand that it is a city's social interaction that makes it great. Proposals and policies that are drawn from planning theory do not consider the social dynamics of city life. They are in thrall to futuristic fantasies of a modern way of living that bears no relation to reality, or to the desires of real people living in real spaces. Professionals lobby for separation and standardization, splitting commercial, residential, industrial, and cultural spaces. But a truly visionary approach to urban planning should incorporate spaces with mixed uses, together with short, walkable blocks, large concentrations of people, and a mix of new and old buildings. This creates true urban vitality.

Building Migrant Cities in the Gulf Florian Wiedmann, Ashraf M. Salama, 2019-07-25 Human history has seen many settlements transformed or built entirely by expatriate work forces and foreigners arriving from various places. Recent migration patterns in the Gulf have led to emerging 'airport societies' on unprecedented scales. Most guest workers, both labourers and mid to high-income groups, perceive their stay as a temporary opportunity to earn suitable income or gain experience. This timely book analyses the essential characteristics of this unique urban phenomenon substantiated by concrete examples and empirical research. Both authors have lived and worked in the Gulf including Qatar, Bahrain and the United Arab Emirates during various periods between 2006 and 2014. They explore Gulf cities from macro and interconnected perspectives rather than focusing solely on singular aspects within the built environment. As academic architects specialised in urbanism and the complex dynamics between people and places the authors build new bridges for understanding demographic and social changes impacting urban transformations in the Gulf.
