The Esoteric Tradition in Borges' "Tlon, Uqbar, Orbis Tertius" Didier T. Jáen, 1984

Tlön, Uqbar, Orbis Tertius Jorge Luis Borges, 1983 `Here is a handsome edition of one of Borges' ficciones, in a translation first published in Labyrinths in 1962. It's an important story in the Borges' canon, incorporating most of the author's philosophical and esthetic preoccupations in a typically brief compass. With great solemnity and a convincing array of scholarly detail (including annotated references to imaginary books and articles), Borges contacts a fable of an alternate world and its infiltration of our own. The reality of Tlon is idealist: material objects have no existence; language has no nouns; its principal discipline is psychology, since its inhabitants see the universe as nothing but a series of mental processes. A series of 24 illustrations accompanies the text. Their disturbing resemblances to our reality make them appropriate reflections of Borges's imaginative constructs.' -- The Kingston Whig-Standard

Understanding W.G. Sebald Mark Richard McCulloh, 2003 This volume provides a dissection of W.G. Sebald's fiction and his acclaim. A German writer who taught in England for 30 years, he published four novels, first in German and then in English. His work gained even greater acclaim after his death in 2001, just months after the publication of his title Austerlitz.

Magical Realism Lois Parkinson Zamora, Wendy B. Faris, 1995 On magical realism in literature

Test Tube Envy J. Andrew Brown, 2005 The scientific disciplines considered range from nineteenth-century phrenology and ethnography to twentieth-century chemistry, quantum mechanics, cybernetics, and chaos theory. In so doing, Brown critically engages the work of Foucault and other social and philosophical theorists as he examines the ways in which scientific prestige is manufactured and appropriated on the literary stage.--Jacket.

Reinterpreting Tlön, Uqbar, Orbis Tertius: On the Antirealism Tendency in Modern Physics , Borges has a rare ability to put wild ideas into detective stories with reporting style. At least that is the impression that we got on his short stories. In particular, one of his short story is worthnoting: Tlon, Uqbar, Orbis Tertius. The story told us about a mysterious country

called Uqbar, in apparently an unofficial reprint of Encyclopedia Britannica. It also tells about Tlon, a mysterious planet, created purely by imaginative minds. While this story clearly criticizes Berkeley view and may be not related to our daily reality, a reinterpretation of this story leads us to a long standing discourse in the philosophy of science: to how extent the entire modern physics follow such a Berkeley-antirealism tendency? This paper is intended to bring this subject into our attention. We will also discuss shortly on antirealism in certain trends in theoretical physics and cosmology.

Games of Inheritance Yitzhak Lewis, 2025-05-13 Games of Inheritance explores the thought of Argentine author and public intellectual Jorge Luis Borges (1899–1986) on questions of authorship and literary tradition. The book focuses on Borges's engagement with Jewish literary and intellectual traditions, highlighting the role of this engagement in developing and expressing his views on these questions. The book argues that the primary relevance of Borges's persistent reference to "the Judaic" is not for understanding his attitude toward Jews and Judaism but for understanding his position in contemporary Argentinian debates about nationalism and literature, empire and postcolonialism, and populism and aesthetics. By broadening the frame of Borges and the Judaic, this book shifts the scholarly focus to the poetic utility of Borges's engagement with Jewish literary and intellectual traditions. This allows a better understanding of the nuance of his views on the issues that most animate his oeuvre: authorship and writing, literature and tradition.

The Ideology of Genre Thomas O. Beebee, 2010-11 In a series of comparative essays on a range of texts embracing both high and popular culture from the early modern era to the contemporary period, The Ideology of Genre counters both formalists and advocates of the &death of genre,& arguing instead for the inevitability of genre as discursive mediation. At the same time, Beebee demonstrates that genres are inherently unstable because they are produced intertextually, by a system of differences without positive terms. In short, genre is the way texts get used. To deny that genres exist is to deny, in a sense, the possibility of reading; if genres exist, on the other hand, then they exist not as essences but as differences, and thus those places within and between texts where genres &collide& reveal the connections between generic status, interpretive strategy, ideology, and the use-value of language.

Cy-Borges Stefan Herbrechter, Ivan Callus, 2009 Cy-Borges provides radically new, posthumanist readings of such established Borgesian fictions as The Aleph, The Library of Babel, Funes the Memorious, The Garden of Forking Paths, and The Circular Ruins. They will be equally illuminating to readers of Hispanic and world literature, as to students of critical and cultural theory, and anybody who is fascinated with the idea of the posthuman and posthumanism.--BOOK JACKET.

Texto y subtexto de "Tlön, Uqbar, Orbis Tertius" de Jorge Luis Borges Ernesto Porras Collantes, 1983

An Amusement Park for Marcel Marceau in Tlön, Uqbar, Orbis Tertius, 2021 This image work totals 23 individual pages, each representing a ride in a fictional world. They are evoked in one moment out of poetic necessity, then dissolved, and continue to be derived. The protagonist of the work is the famous French pantomime actor, Marcel Marceau, who portrays himself as a lonely, white-faced clown in a tattered black bowler hat, carrying the genes of modern melancholy and self-deprecation. Borges' novel *Tlön, Uqbar, Orbis Tertius* describes the invasion and gradual occupation of the real world by a planet dominated by idealism in the fictional pages of an encyclopedia. Amusement parks are hedonistic locations of architectural wonders and rides, metaphors for the endless pleasures of escaping the everyday. -- description from Sam iz dat exhibition catalogue

Contemporary Latin American Fiction Keith H. Brower, 1989

Material Worlds Rachel Moffat, Eugene de Klerk, 2007 What are the contemporary definitions of materiality and culture and how do they interrelate? This expansive brief is the starting point for this publication, which draws from some of the definitions presented at the Material Worlds Conference, held at the University of Glasgow in 2005. Following the keynote set by Professor Catherine Belsey, participants debated how it is that the real is negotiated and mediated by cultural practice. Those who contributed to this volume seek to examine how the intangible can be made real through different media and how these influence our experience of the world. Furthermore they also ask what it is about the real that resists cultural transcription. Included in these papers are analyses of attempts to inscribe the soul; the ongoing difficulty of propertizing concepts; and the material, sometimes pornographic, manifestations of capitalism and empire. By the end of the conference a concern was expressed that even the antinomy between culture and the real was something which had largely been discursively or ideologically determined and demanded a fundamental revision. This is something which Professor Peter Hallward highlights when he seeks to outline the position of the real in modern philosophy.
