La fascinante historia de la alquimia descrita por un científico moderno Siro Arribas Jimeno, 1991

Resumen de Breve Historia de la Química de Isaac Asimov Ultano Kindelan Everett, 2012 Por Isaac Asimov, es un libro de 270 páginas resumido en 49. El autor hace una amenísima descripción cronológica del estudio que ha hecho el hombre, a través de los siglos, de las diferentes sustancias que cubren nuestro planeta, empezando por los filósofos griegos y sus especulaciones sobre la composición de la materia. Asimov describe como, la especulación, dio paso al análisis, y a la fundación de la ciencia que conocemos como Química.

A Short History of Chemistry Isaac Asimov, 1972-01-01 From the use of metals by prehistoric man to the alchemical experiments of medieval and renaissance man to the complex chemical skills of contemporary man, Asimov traces the development of this building block of our technological world.

El proceso de argumentación en la formación inicial de docentes Diana Patricia Landazábal Cuervo, María Cristina Gamboa Mora, 2018-12-04 En este libro se presentan los resultados de investigación respecto a la formación en argumentación como base del pensamiento crítico. El ejercicio de proponer problemas y preguntas para propiciar la argumentación ha demostrado ser positivo en la construcción de conocimiento, así como usar ambientes digitales de aprendizaje para generar motivación y propiciar nuevas formas de aprender y formar docentes. La conjugación de estrategias en las que se usaron los ambientes Dígalo y Simas contribuyó en la innovación en el aula de clase, y esto permitió a los estudiantes mejorar sus habilidades argumentativas, generar el diálogo y favorecer una cultura participativa necesaria en la formación política de sujetos. En este libro, los investigadores podrán encontrar un marco teórico que soporta la investigación realizada, así como los hallazgos al aplicar estas estrategias en la formación inicial de docentes. Además, se evidencian procesos y transformaciones durante el desarrollo de formación, y la importancia que tiene incluir este tipo de herramientas en las clases presenciales. La formación para la participación resulta relevante para la formación docente, por lo que se recomienda continuar investigando y sistematizando el uso de Dígalo y Simas en los contextos educativos. Esta investigación aporta a la discusión sobre la formación docente, el pensamiento crítico, la generación de habilidades para el siglo XXI y el uso de las tecnologías digitales en la educación.

Ciencia de los materiales fantásticos MONTES MARTOS, JUAN MANUEL, TERNERO FERNÁNDEZ, FÁTIMA

ÁNGELA, 2019-03-06 La originalidad de este libro radica en el eje de su planteamiento. Se trata de un estudio o descripción del pasado, presente y el fantástico futuro de los materiales, guiado por las sugerencias de las obras de ficción, es decir, de los materiales que aparecen, por ejemplo, en películas de superhéroes o cómics. En estas obras de ficción se describen a menudo gran número de materiales singulares, poseedores de propiedades igualmente únicas y fantásticas. Son estos materiales los que nos interesan, pues supone todo un reto conocer si en cierto modo ya existen, si podrían existir algún día, o si son completamente imposibles. Hoy sabemos que, controlando las características internas de los materiales, podemos alterar a conveniencia sus propiedades. Con esa poderosa herramienta es fácil entender que los avances sobre materiales no pararán de sucederse, solo restringidos por los límites que imponen las inexorables leyes de la Física y de la Química. ¿Podrían las obras de ficción ayudarnos en esa labor? ¿Y podría la Ciencia de los Materiales ayudarnos a discernir lo real de lo irreal, lo factible de lo definitivamente imposible? El Dr. Juan Manuel Montes Martos es catedrático en el Departamento de Ciencia e Ingeniería de Materiales y del Transporte de la Universidad de Sevilla. Se confiesa apasionado de los géneros de ciencia ficción y fantástico, y aprovecha la menor oportunidad que le brindan charlas y conferencias para hablar de su relación con los materiales. La Dra. Fátima Ángela Ternero Fernández es profesora en el Departamento de Ciencia e Ingeniería de Materiales de la Universidad de Sevilla. Comenzó su formación en el Instituto de Ciencia de Materiales (CSIC-España). Llegó al mundo de la fantasía y de la ciencia ficción tarde, pero se sumergió en ellos con avidez y rapidez, tal vez motivada por el hecho cierto de que sus hijos escuchaban con más interés las historias fantásticas que su padre les contaba, que las que ella se esforzaba por contarles.

Libros para todos Judith Gociol, 2018-01-26 En 1958 el filósofo Risieri Frondizi fue elegido rector de la Universidad de Buenos Aires y, entre las primeras medidas que tomó fue convocar a diez profesores de distintas facultades para que estudiaran la constitución de una editorial universitaria. Entre ellos estaba Boris Spivacow. Así nació Eudeba, un emprendimiento cultural que llegó a publicar un libro por día y a traducir materiales franceses, ingleses, rusos, griegos... Quizá no haya vuelto a conjugarse, como en torno al 58, un período en el que tanto el proyecto universitario como el editorial estuvieran tan definidos y articulados: un proceso rico, vasto, complejo y -también- contradictorio que es posible seguir a través del listado de títulos publicados que aquí presentamos. La magnitud -en calidad y cantidad- de ese catálogo, varios de cuyos títulos continúan reeditándose, se presentan enriquecidos por unas 300 reseñas bibliográficas realizadas por especialistas, representantes de un abanico de saber tan diverso como el que albergó Eudeba. Caja de resonancia del devenir político, económico y social del país (y de una Universidad que desde entonces creció exponencialmente), la historia de la editorial fue recuperada también a través de las actas de directorio que dan cuenta de lo realizado por las diferentes

gestiones, desde la fundación del sello hasta 2001. Es una invitación a repensar tanto el pasado como el presente de esta experiencia educativa y cultural en el marco del proyecto de recuperación de libros, documentos y testimonios de las experiencias de Eudeba y el Centro Editor de América Latina que la Biblioteca Nacional lleva adelante desde 2006.

Art. 71. Constitución del Ecuador. Es decir una forma de relacionamiento armónico entre sociedad y naturaleza. Puesto que la Pachamama contiene e integra a los seres humanos, lo expuesto anteriormente debe ser el punto de partida que necesariamente supone la inclusión de las sociedades humanas en el tratamiento de los derechos de la naturaleza. En este sentido y con esta premisa, en el presente libro daremos una visión de los derechos de la naturaleza desde las ciencias de la vida y de la tierra. Su carácter divulgativo mantiene la rigurosidad científica con que se abordan los problemas ambientales que afectan a nuestro planeta, y su relación con los derechos que la naturaleza tiene, reconocidos en la Constitución del Ecuador.
