Robert Lorand, Joseph M. Cohen (Writer on power resources), Jake Mello, David Panich

Assessing the Performance of Passive Houses in Mediterranean Climate Regions Vincenzo Costanzo, 2020-05-15

This book results from a Special Issue related to the latest progress in the thermodynamics of machines systems and processes since the premonitory work of Carnot. Carnot invented his famous cycle and generalized the efficiency concept for thermo-mechanical engines. Since that time, research progressed from the equilibrium approach to the irreversible situation that represents the general case. This book illustrates the present state-of-the-art advances after one or two centuries of consideration regarding applications and fundamental aspects. The research is moving fast in the direction of economic and environmental aspects. This will probably continue during the coming years. This book mainly highlights the recent focus on the maximum power of engines, as well as the corresponding first law efficiency upper bounds.

Climate Capitalism L. Hunter Lovins, Boyd Cohen, 2011-04-12 “How smart economics hold the key to addressing the multiple crises—from financial to food, climate to resource scarcity—facing the world.” —Achim Steiner, executive director, United Nations Environment Programme In *Climate Capitalism*, L. Hunter Lovins, coauthor of the bestselling *Natural Capitalism*, and the sustainability expert Boyd Cohen prove that the future of capitalism in a recession-riddled, carbon-constrained world will be built on innovations that cutting-edge leaders are bringing to the market today. These companies are creating jobs and driving innovation. *Climate Capitalism* delivers hundreds of in-depth case studies of international corporations, small businesses, NGOs, and municipalities to prove that energy efficiency and renewable resources are already driving prosperity. While highlighting business opportunities across a range of sectors—including energy, construction, transportation, and agriculture technologies—Lovins and Cohen also show why the ex-CIA director Jim Woolsey drives a solar-powered plugin hybrid vehicle. His bumper sticker says it all: “Osama bin Laden hates my car.” Corporate executives, entrepreneurs, environmentalists, and concerned citizens alike will find profitable ideas within these pages. In ten information-packed chapters, *Climate Capitalism* gives tangible examples of early adopters across the globe who see that the low-carbon economy leads to increased profits and economic growth. It offers a clear and concise road map to the new energy economy and a cooler planet. “A must-read for entrepreneurs, investors, industry experts, and corporations interested in capitalizing on the greatest wealth-creation opportunity of our lifetime: solving climate change.” —Jigar Shah, founder, SunEdison, and CEO, Carbon War Room “Well supported with examples of real business practice.” —Ed Crooks, Financial

Gender and Climate Change Financing Mariama Williams,2015-08-27 This book discusses the state of global climate change policy and the financing of climate resilient public infrastructure. It explains the sources of tensions and conflict between developing and developed countries with regard to global climate protection policies, and highlights the biases and asymmetries that may work against gender equality, women's empowerment and poverty eradication. *Gender and Climate Change Financing: Coming Out of the Margin* provides an overview of the scientific, economic and political dynamics underlying global climate protection. It explores the controversial issues that have stalled global climate negotiations and offers a clear explanation of the link between adaptation and mitigation strategies and gender issue. It also maps the full range of public, private and market-based climate finance instruments and funds. This book will be a useful tool for those engaged with climate change, poverty eradication, gender equality and women's empowerment.

A Decision Support System for Improving Water Use Efficiency in the Northern Murray-Darling Basin Yahya Abawi,2001

Fundamentals of Integrated Design for Sustainable Building Marian Keeler,Bill Burke,2015-02-05 *Fundamentals of Integrated Design for Sustainable Building* offers an introduction to green building concepts as well as design approaches that reduce and can eventually eliminate the need for fossil fuel use in buildings while also conserving materials, maximizing their efficiency, protecting the indoor air from chemical intrusion, and reducing the introduction of toxic materials into the environment. It represents a necessary road map to the future designers, builders, and planners of a post-carbon world. —from the Foreword by Ed Mazria A rich sourcebook covering the breadth of environmental building, *Fundamentals of Integrated Design for Sustainable Building* introduces the student and practitioner to the history, theory and technology of green building. Using an active learning approach, the concepts of sustainable architecture are explained and reinforced through design problems, research exercises, study questions, team projects, and discussion topics. Chapters by specialists in the green movement round out this survey of all the important issues and developments that students and professionals need to know. From history and philosophy to design technologies and practice, this sweeping resource is sure to be referenced until worn out.

Change at Hand Holly Ashley,2009 There are dozens of emerging interactive web applications and services (often referred to as the participatory web, or Web 2.0). This title addresses such questions as how can Web 2.0 applications be integrated with participatory development approaches and how can they facilitate and contribute to people's participation and decision-making.

An Analysis of a Survey of Oregon Coast Decision Makers Regarding Climate Change ,2009

Problematic Wildlife Francesco M. Angelici, 2015-12-18 This book provides insight into the instances in which wildlife species can create problems. Some species trigger problems for human activities, but many others need humans to save them and to continue to exist. The text addresses issues faced by economists and politicians dealing with laws involving actions undertaken to resolve the problems of the interaction between humans and wildlife. Here, the words 'problematic species' are used in their broadest sense, as may be appreciated in the short introductions to the various sections. At times, the authors discuss special cases while always extending the discussion into a more general and broad vision. At others, they present real cutting-edge analysis of ecological topics and issues. The book will be of interest to biologists, ecologists and wildlife managers involved in research on wildlife, parks, and environmental management, as well as to government departments and agencies, NGOs and conservation wildlife organizations. Even those in contact with nature, such as hunters, herders, and farmers, will be able to find a great deal of important information. Specific case studies are selected from among the most significant and prevalent cases throughout the world. A total of 26 papers have been selected for this book, written by zoologists, biologists and ecologists. Many have an interdisciplinary approach, with contributions by economists, criminologists, technical specialists, and engineers.

At Home on an Unruly Planet Madeline Ostrander, 2022-08-02 One of Kirkus Reviews' 100 Best Nonfiction Books of 2022 A gold Nautilus Book Award winner, Ecology & Environment From rural Alaska to coastal Florida, a vivid account of Americans working to protect the places they call home in an era of climate crisis How do we find a sense of home and rootedness in a time of unprecedented upheaval? What happens when the seasons and rhythms in which we have built our lives go off-kilter? Once a distant forecast, climate change is now reaching into the familiar, threatening our basic safety and forcing us to reexamine who we are and how we live. In *At Home on an Unruly Planet*, science journalist Madeline Ostrander reflects on this crisis not as an abstract scientific or political problem but as a palpable force that is now affecting all of us at home. She offers vivid accounts of people fighting to protect places they love from increasingly dangerous circumstances. A firefighter works to rebuild her town after catastrophic western wildfires. A Florida preservationist strives to protect one of North America's most historic cities from rising seas. An urban farmer struggles to transform a California city plagued by fossil fuel disasters. An Alaskan community heads for higher ground as its land erodes. Ostrander pairs deeply reported stories of hard-won optimism with lyrical essays on the strengths we need in an era of crisis. The book is required reading for anyone who wants to make a home in the twenty-first century.
